FOREWORD

With the publication of the 276 cuneiform tablets exhibited in this volume we conclude the planned publication of the Ur III and Old Babylonian cuneiform tablets of the Horn Archaeological Museum. We are proud to have been associated with Marcel Sigrist in this project. His expertise can easily be judged by his work. We testify to his good nature and friendliness. We are equally proud that the majority of the Horn Archaeological Museum cuneiform tablets have now been published. Our pride has its roots in the acquisition of the tablets, which we joined with the promise to have them published. This trust was committed to us in 1976 by the Hartford Theological Seminary and we now consider the obligation complete.

In memory we thank Siegfried H. Horn, who arranged, on our part, the addition of these tablets to our collection that initiated this process. We also note the continued financial support of the Andrews University administrations. In a process that has consumed resources during almost thirty years, the long-term commitment of Andrews University to archaeological publication is obvious. Past and present, the leaders of Andrews University have never wavered to honor the duty of the present to restore the past by publishing what part of it has been discovered.

This volume serves well as the final effort of this project. It contains, as noted in the *Introduction*, a variety of texts: types, conditions, and presentations. Paul Ray, Jr., Managing Editor, has thoughtfully compiled a series index making referencing and cross-checking as easy as possible.

To those who have worked on this project, named and unnamed in this and previous volumes, thank you.

INTRODUCTION

The eighth volume in the Andrews University Studies series presents hand copies of the last Old Babylonian texts studied by me during my research at the university. Three volumes were devoted to texts from the Ur III period, three volumes contained Isin-Larsa year names, while the last two volumes are Old Babylonian texts with priority given to the best preserved tablets in this group.

The contents of the texts in the present volume reflect the diversity of genres in the collection. There are contracts, school tablets, legal and mathematical texts as well as letters. The poor state of preservation of a number of these texts made some of the copies difficult to read, and I have therefore added transliterations and translations. The indices will elucidate the diversity of the texts.

I would like to thank all the scholars who helped me read and understand these texts, notably Professors Johannes Renger, Dominique Charpin, and Dr. Eleanor Robson. Most of all I owe a debt of gratitude to Professor Marten Stol who critically read the manuscript in its various stages and whose annotations, corrections and improved readings have been decisive in the evolution of this work. Responsibility for errors is mine alone.

Finally I wish to thank Andrews University Press for accepting the last volume in this series which was begun over ten years ago.

Marcel Sigrist

obv.

Apil-ilišu, is his name,
 from Nitega
 Nabi-Sin for 6 months
 hired him;
 5 his salary for 6 months
 (is) 4 kor of barley which is on the quay of Larsa
 Nabi-Sin for Apil-ilišu
 (these) 4 <kur> he measured;
 [per month] 20 qu [of barley] (and) 24 qu of beer
 10 he will give him.
 [from this amount] 1/2 shekel of silver
 he took (already);
 if he does not serve his full term
 he will lose his wages;

rev.
