This manuscript has been reproduced from the microfilm master. UMI films the text directly from the original or copy submitted. Thus, some thesis and dissertation copies are in typewriter face, while others may be from any type of computer printer.

The quality of this reproduction is dependent upon the quality of the copy submitted. Broken or indistinct print, colored or poor quality illustrations and photographs, print bleedthrough, substandard margins, and improper alignment can adversely affect reproduction.

In the unlikely event that the author did not send UMI a complete manuscript and there are missing pages, these will be noted. Also, if unauthorized copyright material had to be removed, a note will indicate the deletion.

Oversize materials (e.g., maps, drawings, charts) are reproduced by sectioning the original, beginning at the upper left-hand corner and continuing from left to right in equal sections with small overlaps. Each original is also photographed in one exposure and is included in reduced form at the back of the book.

Photographs included in the original manuscript have been reproduced xerographically in this copy. Higher quality 6" x 9" black and white photographic prints are available for any photographs or illustrations appearing in this copy for an additional charge. Contact UMI directly to order.

Title: THE USE AND ABUSE OF AUTHORITY: AN INVESTIGATION OF THE ΞΟΥΣΙΑ PASSAGES IN REVELATION

Name of researcher: Laszlo I. Hangyas
Name and degree of faculty adviser: Jon Paulien, Ph.D.
Date completed: April 1997

The purpose of this dissertation is to carry out a linguistic, structural, and exegetical investigation of the term ΞΟΥΣΙΑ as it occurs in the Greek text of the Apocalypse.

Chapter 1 provides an overview of the pertinent literature dealing with ΞΟΥΣΙΑ. The review follows a chronological order to demonstrate a trend in the development of ΞΟΥΣΙΑ studies. Earlier works put more emphasis on the meaning of power or authority, whereas recent studies point to liberty and right as the primary meaning of ΞΟΥΣΙΑ. The current tendency emphasizes
philosophical and socio-ethical aspects without due consideration of the etymology of the term.

Chapter 2 surveys the usage of ἐξουσία in nonbiblical (Greco-Roman, Papyri and Inscriptions, Jewish apocalyptic, Qumran, Hellenistic Jewish, Rabbinic) and biblical (LXX, Biblia Hebraica, Greek NT) literary sources that are linguistic backgrounds to the meaning of the term. The Greco-Roman and Hellenistic Jewish works generally employ ἐξουσία with regard to human power relationships. The NT use of the term closely follows the LXX and the Jewish apocalyptic usage particularly in the area of delegated power/authority in human and supernatural relationships.

Chapter 3 focuses on the specifics of the twenty-one ἐξουσία occurrences in Revelation. These passages are investigated in the literary context and structure of the book. The role ἐξουσία plays in the overall literary context of the Apocalypse is further demonstrated by microstructural analyses of the passages. The term plays a special focusing role both in the macro- and the microstructures of the Apocalypse. Thus, it significantly contributes to the central message of Revelation, which is the activity and judgment of antidivine powers.
In the summary and conclusions of the dissertation the findings of the research are given. Theological and ethical implications are pointed out, and some areas for further study are suggested.

ACKNOWLEDGMENTS

First of all, I am thankful to God for providing both mental and physical strength for me to endure the whole process of writing this dissertation.

I am also thankful to the following organizations and individuals of the Seventh-day Adventist Church for financial provisions: General Conference, Trans-European Division, Hungarian Union Conference, Theological Seminary of Andrews University, Chan Shun Andrews University Scholarship Loan Fund, Cleveland (Ohio) Hungarian Church, and Elder Don Reynolds.

Special thanks go to my adviser, Dr. Jon Paulien, for guiding me through the researching and writing phases and for inspiring me to greater excellence; to Dr. Robert M. Johnston, for teaching me to pay attention to small details; and to Drs. Miroslav Kiš, Nancy Vyhmeister, and Ernest Bursey, for contributing to the overall shape of my study.

Finally, I am grateful to my wife and children who constantly encouraged, supported, and prayed for me from the beginning to the end of my research. May God grant eternal reward to all who had a part in the completion of this work.

INTRODUCTION

The purpose of this dissertation is to report the results of a linguistic, structural, and exegetical investigation of the term ἐξουσία as it occurs in the Greek text of the Apocalypse.

Chapter 1 provides an overview of the pertinent literature dealing with ἐξουσία. The review follows a chronological order to demonstrate a trend in the development of ἐξουσία studies. Within a given period journal articles, which address the same NT book, are grouped and studied together.

Chapter 2 surveys the usage of ἐξουσία in nonbiblical (Greco-Roman, Papyri and Inscriptions, Jewish apocalyptic, Qumran, Hellenistic Jewish, Rabbinic) and biblical (LXX, Biblia Hebraica, Greek NT) literary sources that are linguistic backgrounds to the meaning of the term. The survey follows an approximate chronological order due to the uncertainty of the dates of some ancient works.

Chapter 3 focuses on the specifics of the twenty-one ἐξουσία occurrences in Revelation. These passages are...
investigated in the literary structure and context of the book. The role ἐξουσία plays in the overall literary context of the Apocalypse is further demonstrated by microstructural analyses of the given pericopes.

In the summary and conclusions of the dissertation the findings of the research are given. Theological and ethical implications are pointed out, and some areas for further study are suggested.

Statement of the Problem

From a linguistic point of view, ἐξουσία has not been treated in a comprehensive manner as one of the key terms of Revelation. Neither macrostructural nor microstructural analysis of the ἐξουσία passages has been carried out to investigate the role the term plays within the literary structure of the Apocalypse. The dissertation explores the impact of ἐξουσία clustering on the formulation of the literary units of Revelation. The purpose of John’s irony, especially in the central chapters (11-13) of the book, is also investigated.

Statement of Thesis

The ἐξουσία clustering in some parts of the Apocalypse (chaps. 9 and 16-18), and particularly in the central chapters (11-13), clearly indicates John’s
intention. He employs the term in an artful way to highlight major movements in the antidivine power struggle. This anti-Christian rebellion culminates in Rev 13, where one-third of the ἐξουσία occurrences are concentrated. The life-and-death struggle focuses on the issue of worship. This apocalyptic combat theme is the conceptual backdrop to Revelation. In the center of the chiastic focus (11:19-15:4), John’s call for wisdom expresses his understanding that Christians are the fulfillment of the prophesied ἠμνηστία in Dan 11:33 and 12:10.

Delimitation of Study

The literature review is not intended to be an exhaustive analysis of studies dealing with ἐξουσία, but to present a selective and representative collection of works in chronological order. The criteria for selection are presenting new shades of meanings of the term and showing a trend in the development of ἐξουσία studies.

Although the background study covers some hundreds of years, it cannot be exhaustive especially in the case of the Greco-Roman, Qumran, and Rabbinic writings. Hellenistic Jewish studies are limited to the works of Josephus and Philo.

The dissertation does not address questions related to NT introduction. Both macro- and microstructural
analyses are based on the Nestle-Aland Greek text of the NT. References are made to the Critical Apparatus of the Greek text where it provides a better understanding. In some instances the differences between the LXX and the Theodotion translations are pointed out in comparison with the MT.

The discussion of the ἐξουσία passages is arranged according to the parallel elements of the chiastic structure of Revelation. The resulting dissertation is not a commentary or a detailed exegesis of the Apocalypse.

**Research Methodology**

As a linguistic and exegetical study of the Greek noun ἐξουσία, the dissertation focuses on the use of the term in nonbiblical and biblical literary sources. The major emphasis is on the NT usage of the word, particularly its use in Revelation. The ἐξουσία occurrences within a literary source are grouped and studied according to different shades of meaning.

The twenty-one ἐξουσία passages in Revelation are investigated by both inductive (an analysis of the Greek text in its canonical form) and deductive (following a priori definitions of literary forms) methodologies. The passages are first studied in the macro-context of the Apocalypse, then a microstructural analysis of the given
literary unit is provided, and finally key terms and stylistic peculiarities are pointed out.

The purpose of the contextual and microstructural analyses of the ἐξουσία passages is not to study the literary structure itself, but to demonstrate the role the term plays in a given unit. The overall purpose of this investigation is to reconstruct the original meaning of the text, as far as possible, by literary, topical, and terminological structures. The main emphasis of this dissertation is to contribute to the groundwork for a more detailed exegesis of the Apocalypse by providing an in-depth study of one of its key terms.

**Definitions of Terms**

Non-English translations of ἐξουσία are always underlined. Italics are employed for definitions and emphasis. A brief explanation of the most important and frequently used terms or expressions is usually given in the footnotes, at the first occurrence of the particular phrase.

The titles “Revelation,” “Apocalypse,” or “Book of Revelation” are used interchangeably. The name “John” indicates the author of Revelation without further comment. The term “investigation” describes both the contextual studies and the micro-analyses of the ἐξουσία passages in the Apocalypse.
CHAPTER I

LITERATURE REVIEW

This chapter provides an overview of the pertinent literature dealing with the Greek feminine noun ἡ ἐξουσία as it occurs in the Greek NT and especially in the Book of Revelation.¹ It appears that no comprehensive study of the ἐξουσία passages in Revelation or in the NT has ever been written.²

The literature review in this chapter follows a chronological order to demonstrate a trend in the development of ἐξουσία studies. First, nine decades before TWNT are surveyed then Werner Foerster’s article in TWNT/TDNT is discussed. Next, the literature between 1936

¹While ἐξουσία occurs 102 times in the Greek NT, it appears more frequently in Revelation (21 times) than in any other NT book.

²I found one unpublished M.A. thesis by Arthur J. Alexander, entitled “An Examination of Exousia and Dunamis in the Greek New Testament” (Wheaton College, January 1969). This study does not focus on the Book of Revelation and it considers authority “only in relationship to power, not authority per se” (6). A detailed review of this work follows.
and 1964 is surveyed and followed by a review of Otto Betz’s article in TBNT/NIDNTT. Finally, studies between 1966 and 1986, and in the last decade are discussed. Within a given time period journal articles, which address the same NT book, are grouped and studied together.

Before **TWNT**

The period surveyed before **TWNT** spans over nine decades beginning with the Greek-English lexicon by Liddell and Scott,¹ who derived ἐξουσία from the impersonal ἐξεστι, “it is possible/proper/permitted/lawful.”² The following three shades of meaning are provided: (1) power, means, authority to do a thing, permission, license, (2) absolute power, authority, might as opposed to right, and (3) abundance of means, resources. The Latin potestas is also supported as it refers to an office or magistracy.³ No

²This derivation is usually followed in subsequent works.

biblical references are listed, but only classical Greek literary sources.

The new feature in Edward Robinson’s lexicon is that he defines ἐξουσία as power (moral power) and ability. He is the first to make references to the book of Revelation. The four subsequent meanings of the term given over-emphasize the notion of power at the expense of authority.

fourth meaning of the term. Biblical references are only marginal.

2Ibid., 262. This idea later surfaces in Alexander Souter, *A Pocket Lexicon to the Greek New Testament* (London: Oxford University Press, 1956; reprint of 1916 ed.), p. 88, where he refers to (1) power, authority, weight, especially moral authority, influence, and (2) in a quasi-personal sense a spiritual power, and an earthly power, often in combination with ἀρχή. There is no a single reference to Revelation.

3See (1) Rev 9:3-19, where the specific meaning is strength, force, efficiency, (2) Rev 22:14, meaning right, (3) Rev 9:10; 11:6; 13:5, indicating power as entrusted, and (4) Rev 2:26; 6:8; 12:10; 13:2, 4, 7, 12; 14:18; 17:12, 13; 16:9; 18:1; 20:6, where the term denotes power over persons and things. Robinson’s and all subsequent other references to biblical and nonbiblical books besides Revelation are dealt with in chapter 2 of this dissertation.

4See (1) power to do anything, ability, faculty, (2) power to do or not to do, i.e., license, liberty, leave, right, (3) power as entrusted, i.e., commission, full-power, authority, and (4) power over persons and things, dominion, authority, rule, in the LXX for ἀρχὴ, dominion, kingdom.

5This tendency characterizes later works as well.
On the other hand, in Lightfoot's commentary on Colossians, originally dated in 1875 the emphasis shifts to "license." He considers the Pauline corpus and Luke, but not Revelation.

Cremer's *Biblico-Theological Lexicon* states that Ἐξουσία is a combination of the ideas of *right* and *might*. The lexicon also compares the German bevollmächtigen (to authorize), and its synonyms Berechtigung (entitlement) and Ermächtigung (authorization). Thus, Cremer's focus is on *right* and *permission*.

---

2. Ibid., 141, where Ἐξουσία "properly signifies 'liberty of action' (ἐξουσία)," and the "corresponding English word is license." Lightfoot also gives two "secondary ideas": (1) "authority," "delegated power" (Luke 20:2), and (2) "tyranny," "lawlessness," "unrestrained or arbitrary power" (Luke 22:53). Cf. LSJ, 1973 ed., 482; Robinson, 262.

4. Ibid., 236.

5. This meaning is detected in Rev 6:8 and 18:1.
Thayer's Greek-English Lexicon defines ἐξουσία as "power"; nevertheless, his interpretation is more balanced between power and authority. He is the first to note that, beside the Hebrew גַלְפָּה, the Aramaic ḫשָׁע (dominion, power) is also translated by ἐξουσία in the LXX.

The study by Walter Grundmann insists that ἐξουσία is the rendering of the Aramaic ḫשָׁע (in Dan 7:14) meaning

2. Ibid., 225; cf. Robinson, 262-263.
3. The following three shades of meaning are provided with regard to Revelation: (1) power of choice, liberty (Rev 22:14); (2) physical and mental power, which one either possesses or exercises (Rev 9:3, 10, 19; 11:6; 13:2, 4, 5, 12; 18:1); and (3) the power of rule or government, generally translated authority (Rev 2:26; 6:8; 11:6; 12:10; 13:7; 14:18; 16:9; 17:12, 13; 20:6).
6. He does not mention the Hebrew גֶלֶפָּה (dominion, kingdom) in the OT.
power (Macht)\(^1\) and authority (Herrschaft). He concludes that in ἐξουσία "the power (Macht), received from God, is expressed as a sound of full power, authority (Vollmacht)."\(^2\)

Summarizing the review of the representative studies for this period, one notices that the majority of the works tend to over-emphasize the notion of power as the primary meaning of ἐξουσία. Later studies, however, point out that permission or right are also important shades of meaning of the term. None of the works notes the importance of ἐξουσία in the Book of Revelation.

The Importance of TWNT/TDNT

Werner Foerster’s article in TWNT/TDNT\(^3\) is the most comprehensive exposition of ἐξουσία. He too derives ἐξουσία

\(^2\)Grundmann, 57.

from ἕξουσία, meaning an "ability to perform an action" to the extent that "there are no hindrances in the way."\(^1\) Thus, the term denotes the possibility granted by a higher norm or court, or "the right to do something or the right over something."\(^2\) Foerster notes that this "right" or "possibility" is illusory unless backed by real power (e.g., the power of the state); consequently "it is not always possible to separate between authority and power."\(^3\)

As a direct background to the NT usage of ἕξουσία, Foerster refers to the LXX, where the term first means "right, authority, permission or freedom in the legal or political sense," and then "the right or permission given by God."\(^4\) ἕξουσία therefore can be the rendering of the Hebrew פֶּלֶךְ in the sense of "kingdom" or "sphere of power," or it can be used for the Aramaic שָׁמָּהַ when the reference is to God’s power to express "the unrestricted sovereignty of

\(^4\)Ibid., 2:564.
God” (cf. Dan 4:14). Foerster concludes that “formally the usage of the NT is closest to that of the LXX.”

In regard to the use of Κύρια (or Κυριαία) for political relationships (e.g., in a general sense for “government”), it is stated that the singular form of the term can also be employed for “the absolute monarchical power of God,” or “the sphere over which one disposes,” or simply “sphere or kingdom.”

Discussing the NT concept of Κύρια, Foerster lists three specific roles the term plays when it denotes the power that decides: (1) the invisible power of God whose Word is creative power, (2) the lordship of God in a fallen world where nothing takes place apart from His Κύρια or

---

1Ibid., 2:564, 565.

2The term can mean the power of God in nature and in the spiritual world, the power that Satan exercises and imparts, and especially the power or freedom that is given to Jesus, and by Him to His disciples; cf. Foerster, 2:565.

3Ibid.

4Ibid., where Foerster argues that this meaning is borrowed from the rabbinical legal term רשות (ruling power, the right/freedom of possession to something, authority or commission, and government), and he concludes that רשות is “co-extensive with Κύρια, but it goes beyond it in the very matters in which the NT does so.”

5Foerster suggests that “if almost all the NT passages where Κύρια occurs can be construed with the help of רשות, derivatives from the stems שֶׁשֶׁב and שֶׁל שֶׁל may also be taken into consideration” (2:566).
authority, and (3) the freedom or authority which is given to the community.

When Foerster details the NT usage of ἐξουσία, he supports six shades of meaning along with references to Revelation: (1) absolute possibility of action; (2) the ἐξουσία and power of God variously displayed (Rev 14:18, where the context shows that nature is regarded as an ordered totality; Rev 6:8; 9:3, 10, 19; 16:9; 18:1, where ἐξουσία is given by God to the forces of destruction in nature and history); (3) ἐξουσία, which is Satan’s sphere of dominion (Rev 13: 2, 4, 5, 7, 12, when the Antichrist is given a free hand decided by God); (4) Christ’s divinely given power and authority to act (Rev 12:10); (5) the authority or freedom imparted to the community (Rev 2:26-28; 11:6; 22:14, where power cannot be used arbitrarily); and (6) a special use of ἐξουσία for supernatural powers, which leads to the concept of several cosmic powers (especially in the Pauline corpus) with whom “human life is connected in many ways.” He makes the following important comment on the power of evil: “The final mystery is not the power of

1Foerster adds: “Indeed, ἐξουσία is given to the Antichrist for his final activity, so that nothing takes place apart from the ἐξουσία or will of God” (2:566).

2Ibid., 2:573. Rev 20:6 is the only text on which he does not comment.
evil itself. It is the fact that the power of evil, which is radically hostile to God, may be exercised as such and yet encompassed by the divine overruling."¹ Foerster also notes on the special use of ἔξουσία for supernatural powers.²

In conclusion, Foerster mentions the Latin potestas as equivalent to ἔξουσία and makes the linguistic observation that ἔξουσία “is abstract, like the related θρόνος and κυριότης.”³ The relationship between ἔξουσία and θρόνος is especially determinative for the thematic arrangement of Revelation.⁴

Summarizing, Foerster presents a wealth of information and makes a significant contribution by broadening the scope of meaning of ἔξουσία in the NT. To the Hebrew וֶלֶד and the Aramaic וֶלֶד, he adds the rabbinical legal term as co-extensive with ἔξουσία, referring to

¹Ibid., 2:567.

²Usually together with ἀρχαί, κυριότητες, and δυνάμεως in Col 1:16 and Eph 1:21. Foerster later remarks: “It is not possible to distinguish between ἔξουσίαι and ἀρχαί, and to assign to them the different functions of two groups of powers, since neither the NT nor parallels give any indication in this direction” (ibid., 2:573).

³Ibid., 2:572.

⁴ἔξουσία and θρόνος appear more often (21 and 47 times respectively) in Revelation than in any other NT book.
the absolute monarchical power of God. He seems to be the only author who devotes several paragraphs of his article to the discussion of έξουσία in Revelation.

**Studies between 1936 and 1964**

The journal articles of this period are constantly struggling either with Markan or Pauline passages containing έξουσία (or έξουσίαι). There is no discussion of the term in the Apocalypse.

Oscar Cullmann’s article draws the much-debated conclusion that έξουσία in Rom 13:1 means both “the State and the Power [die Engelmächte] behind it” but “Christ’s reign is over the Powers [der Herrschaft Christi ist über die Mächte].”

1 See ibid., 2:565, no. 3; 2:566, no. 5; 2:567, no. 2; 2:568, nos. 3-4; 2:569-570, no. 5.

3 Ibid., 336.
Friedrich A. Strobel argues, contra Cullmann’s hypothesis, that in the above passage ἐξουσίαν simply refers to the “profane, civil-state,” where we are taxpayers.

In their very short articles under the same title, „ὡς ἐξουσίαν ἐχων,“ H. J. Flowers and Donald F. Hudson agree that this phrase in Mark 1:22 (par. Matt 7:29; Luke 4:32) can be derived from the Hebrew הַשָׂרָה (cf. ḫṣḥ, to rule, have dominion), denoting “as one exercising authority.”

6 See Flowers, 254; Hudson, 17. Flowers remarks that “the translation should be bold and clear, like a king.” Hudson, on the other hand, insists that “the authority is not merely that of a king, but of an emperor!” Hudson’s argument is based on his conviction that in Monumentum Ancyranum ἐξουσία is the Greek translation of the Latin auctoritas, denoting non-legal, personal authority, although
John Coutts¹ considers all ten occurrences of ἐξουσία in the Gospel of Mark² and divides them into two groups: (1) the authority Jesus exercised, and (2) the authority He delegated to the Twelve. He identifies the paradox of Mark as "the Twelve . . . endowed with unlimited powers [ἐξουσία] almost wholly inhibited."³

Joseph A. Fitzmyer's article⁴ investigates a possible Qumran background to 1 Cor 11:10, where ἡ γυνὴ ἐξουσίαν ἔχειν . . . διὰ τούς ἄγγελούς is an unparalleled Pauline construction.⁵ One needs to be reminded here that the in the Koine ἐξουσία often indicates legal authority or jurisdiction. My observation is that in Monumentum Ancyranum, ἐξουσία is the Greek rendering of potestas whereas αξιώμα stands for dignitas or auctoritas; cf. Res Gestae Divi Augusti in LCL, 332-405.

³Coutts, 117.
⁵See ibid., 57, where he asserts that "the unveiled head of a woman is like a bodily defect," which is not permitted in the church "because 'holy angels are present in their congregation'." Fitzmyer makes references to 1QM 7:4-6 and 1QSa 3:11-11 (and also to Lev 21:17-23), but in those sources the word woman does not occur.
debate over the interpretation of ἐξουσία as “veil” is not settled yet.¹

The dictionary articles of this period represent a balanced understanding of ἐξουσία, as both power and authority,² although they make no further contribution. With the exception of the Greek-English Lexicon by Bauer, Arndt, and Gingrich,³ references to Revelation are marginal.

¹David R. Hall, “A Problem of Authority,” ExpTim 102 (1990-91): 40, asserts that the literal English translation of ἐξουσίαν ἐχειν is “have authority.” Therefore he assumes that Paul’s purpose is “to establish the right of a woman prophet to do what she wished with her own head—e.g., in this context, to keep it covered”; Annie Jaubert, “Le voile des femmes (I Cor. XI. 2-16),” NTS 18 (1971-72): 430, argues that in this cultic and cultural context, to have a “veil” (ἐξουσία) on a woman’s head can “signify ‘permission’ in accordance with contemporary traditions”; Günther Schwarz, “ἐξουσίαν ἐχειν ἐπὶ τῆς κεφαλῆς? (1. Korinther 11 10),” ZNW 70 (1979): 249, proposes that as an equivalent to ἐξουσία the Aramaic מִיפָל should be understood, which means (1) power, strength, force, and (2) head cover, veil.

Cyril H. Powell's book on power gives only a simplified version of Foerster's explanation of ἐξουσία in TWNT/ TDNT. This section concludes with the studies of John L. McKenzie and D. Ritschl. These articles do not focus on any particular Bible text but make the general observations that "the power base of authority in the NT is love" and ἐξουσία and δύναμις in the Bible denote "much more than our modern word 'power'." It appears that these comments are more philosophical than exegetical, which has been one of the meaning of ἐξουσία with references to Revelation: (1) freedom of choice, right to act, decide, or dispose of one's property as one wishes (Rev 13:5; 22:14), (2) ability to do something, capability, might, power (Rev 9:3, 10, 19; 11:6; 13:2, 4, 12; 16:9; 18:1; 20:6), (3) authority, absolute power, warrant (Rev 2:26; 6:8; 11:6b; 12:10; 13:7; 14:18), and (4) the power exercised by rulers or others in high position by virtue of their office (Rev 17:12, 13, where the meaning is ruling power, official power). For a similar grouping, see Thayer's lexicon.

2Ibid., 101, Powell argues that ἐξουσία "involves the possibility of its performance in freedom, without obstacle either from right or might"; cf. Foerster, 2:562.

5McKenzie, 418.

the characteristics of most of the dictionary articles too, since the 1960s.¹

In summary, dictionaries of this period provide a more balanced understanding of ἐξουσία, although later works tend to leave out the corresponding Hebrew/Aramaic terms, and minimize the references to Revelation. Journal articles deal only with certain passages in the Gospel of Mark or the Pauline corpus.

The Concept of TBNT/NIDNTT

Otto Betz’s article in TBNT/NIDNTT² brings a fresh approach to the understanding of the rich meaning of ἐξουσία. The grouping of the term with δύναμις and θρόνος³ appears to be a unique feature of his article.⁴ Betz

¹See my summary below at the end of studies between 1966 and 1986.

³Cf. Foerster, 2:572, where he mentions θρόνος and κυριότης as related terms.

⁴Perhaps the listing of W. Wink comes closest to that of this grouping; cf. Walter Wink, The Powers, vol. 1, Naming the Powers: The Language of Power in the New
compares δύναμις and ἐξουσία, and concludes that the latter
"indicates the power to act which given as of right [sic] to
anyone by virtue of the position he holds."¹ ἐξουσία is
"freedom of choice, right, power, authority, ruling power, a
bearer of authority."²

Considering the LXX background to ἐξουσία, Betz
observes that the term rarely translates the Hebrew בְּלָעִית. He asserts that the Book of Daniel is an "important
background material for the NT use of the word," where
ἐξουσία is the Greek equivalent in the LXX for the Aramaic
נּוּשֵׂע (dominion, power).³

He, like W. Foerster,⁴ notices that the range of
meaning of ἐξουσία is particularly influenced by the
rabbinical Hebrew בְּלָעִית, and the Aramaic בְּלָעִית (power of
attorney, power to act, freedom to do something). Betz,

we find the following list for the NT concept of power:
ἀρχή /ἀρχόν, ἐξουσία, δύναμις, θρόνος, κυριότης, δύναμις, and
ἀγγέλος.

¹Betz, 2:601.
²Ibid., 2:606. Betz gives only potestas as the
 corresponding Latin word.
³Commenting on Dan 2:21; 4:31; 7:12, Betz states:
"The authority of the human world-rulers originates from the
supernatural realm; it is delegated by God, the Lord of
history" (2:607).
⁴Cf. Foerster, 2:565-566.
however, makes an important reference to some Qumran writings, where the Hebrew כְּדָנִיָּה corresponds with the Greek κυριαρχία, denoting kingdom or dominion.

When going into detail regarding the NT usage of κυριαρχία Betz lists three main shades of meaning of the term, which are further subdivided. He is the only one so far who observes that κυριαρχία appears most frequently in Revelation, Luke, and 1 Corinthians. It is surprising, therefore, that he only provides eight κυριαρχία references to Revelation discussed under the subheading “God’s delegated eschatological authority”: (1) Rev 6:8, an angel who punishes; (2) Rev 9:3, 10, 19, other creatures are involved in the judgment; and (3) Rev 13:2, 4, 12, the devil, like God, delegates his rule over the world to others, e.g., the Antichrist.

2Betz, 2:609, states that the "power, authority, and freedom of action belongs: (1) to God himself, (2) to a commission in the last days, and (3) to a Christian in his eschatological existence."

3Ibid., 2:608: "In the NT κυριαρχία appears 108 times." This number evidently includes the occurrences of κυριαρχοῖς (4 times) and κατεξουσιάζω (2 times) which leaves a total of 102 κυριαρχία passages in the Greek NT. The occurrences of κυριαρχία for Revelation, Luke, and 1 Corinthians are 21, 16, and 10, respectively.

4Ibid., 2:609-610.
In summary, Betz's article provides some unique features: grouping ἐξουσία, δύναμις, and ἑρωνοσ; noticing the importance of the Book of Daniel and some Qumran writings as background materials; and observing the frequency of ἐξουσία in the Book of Revelation. His overall emphasis is on the freedom, right, authority meaning of ἐξουσία, rather than simply on power.

Studies between 1966 and 1986

The 104-page M.A. thesis of Arthur J. Alexander1 is the only unpublished study I found that aimed to "survey δύναμις and ἐξουσία as being representative of the concept of power in the New Testament."2 The thesis is predominantly influenced by Foerster's article in TDNT. At the end of chapter 1 Alexander concludes that "ἐξουσία is best translated 'authority' and δύναμις 'power'."3 In chapter 3

one finds five references to Revelation, and Alexander comments on the jurisdiction of God and the limited authority of Satan in the Apocalypse.

The stated purpose of the 286-page Ph.D. dissertation by Wayne Richard Kempson is “to treat in depth, as much as possible, the motifs and themes [of Revelation] which exegetical study generates.” Kempson’s “interpretative conclusions” are founded “on a combination of the preterist, futurist and idealistic schools.” He perceives that “the literary structure is the key for constructing the theological structure” of Revelation. Based on a content analysis, Kempson “asserts the centrality of chapters 12 through 14 both in a theological sense and a

2Alexander asserts that “the Apocalypse clearly reveals that, although Satan and his cohorts can bring calamity and disaster upon the earth, this ability is within the jurisdiction of God who is the true possessor of τῆς ἐξουσίας,” and that “the authority of Satan may be universal in scope but it still is a limited authority” (ibid., 87).

literary sense."¹ He suggests that "the notion of power serves well as the theological center of the book."²

Kempson not only states that the Book of Revelation is "a theology of power"³ but also argues that there is a strong emphasis, especially in the second half of the Apocalypse, on the nature and tactics of any "abusive (tyrannical) power."⁴ Therefore, his final conclusion is the following: "Perhaps the greatest contribution the Apocalypse can make lies in the evaluation of abusive power as demonic and the denunciation of oppressive religion as bestial."⁵ It makes one wonder why he did not use the term "authority" more often in his study, or why he omitted any comment on the importance of ἐξουσία in the Apocalypse.

The trilogy of Walter Wink on power certainly is the most exhaustive study ever on the theme of power in the NT. The first volume⁶ was published in 1984 and presents an important study on the use of ἐξουσία in Revelation. The

second volume (1986) does not study εξουσία. The third appeared in 1992 and thus belongs to a later period.

In the 165-page first volume one finds a two-page explanation of εξουσία.¹ Wink defines the term as bearing "the sense of the right or authorization to exercise power."² He proposes that "'legitimation' comes closest to catching its meaning."³

Wink also remarks that 87 out of the 102 uses of εξουσία in the NT are "for the impersonal capacity for action which is bestowed by an office."⁴ Further he argues that "85 percent of its [εξουσία] uses refer to a structural dimension of existence, that permission or authorization provided by some legitimate authorizing person or body"⁵ (italics his).

¹Wink, Naming the Powers, 15-17.
²Ibid., 15.
⁴Wink, Naming the Powers, 15.
⁵Ibid., 15-16, Wink also states that the εξουσία in the NT are, "in the vast majority of cases, not spiritual beings but ideological justifications, political or religious legitimations, and delegated permissions."
An interesting feature of his study is the listing of "paired expressions for power"\(^1\) in the NT; in it one finds three references to Revelation.\(^2\) In the case of ἐξουσία and δύναμις he states: "Exousia denotes the legitimations and sanctions by which power is maintained; it generally tends to be abstract."\(^3\) Dynamis overlaps with exousia in the area of sanctions; it refers to the power of force by which rule is maintained\(^4\) (italics his).

In the last chapter of his book, "Interpreting the Powers," Wink notices the "different picture of Revelation" in regard to the language of power in the NT.\(^5\) He particularly mentions John’s use of ἐξουσία for "political rulership (2:26; 17:12-13)," for "the dominion of angels (14:18)," and for "delegated authority (9:3; 13:4, 5, 7,

It seems that Wink does not notice the frequency or importance of ἐξουσία in the Apocalypse.

His final remark—something of an overemphasis—is that "Paul's letters, like the rest of the New Testament, can be described as a theology of power."\(^2\)

Journal articles of this period only deal with certain passages in the Synoptics and the Pauline corpus. Thus, the accounts of Matthew,\(^3\) Mark,\(^4\) and Luke\(^5\) are discussed. Within the Pauline corpus the focus is on Romans.\(^6\)

primary meaning of εξουσία. In two cases the philosophical or practical aspects of the term are dominant without any reference to εξουσία passages.

The major study by Gunneweg and Schmithals furnishes Latin, Greek, French, and English equivalents of the German Herrschaft. An important comment is also

2With the exception of Geoffrey W. Bromiley, “Authority,” The International Standard Bible Encyclopedia, ed. Geoffrey W. Bromiley, et al., fully rev. in 4 vols. (Grand Rapids, MI: William B. Eerdmans Publishing Co., 1979), 1:364-371, beside several other OT and NT passages, particular attention is paid to Rev 6:8; 9:3, 10, 19; 12:10; 13:2. The following important remarks are insightful: “The right (authorized power) expressed by exousia is not abstract. It carries with it real power, even though this be extrinsically rather than intrinsically derived. . .. The true answer to misuse [of authority] is not surrender but true and proper use” (1:365-366); cf. Foerster, 2:563.

made on Monumentum Ancyranum—stating that no other Western language, except Latin, makes a distinction which perhaps indicates that the ideal unity of power and authority will never be attained.

Max Weber's study discusses the theme of social relations, under the subheading, "Power, Authority, and Imperative Control." Regarding the latter, he states: "'Imperative control' (Herrschaft) is the probability that a command with a specific content will be obeyed by a given group of persons."^5

---

^1Cf. Hudson, 17.

^2While auctoritas is "personally related" and "has to do with freedom," potestas is "institutionally related" and "has to do with compulsion." The first means a "persuasive power" but the second denotes "submission by force" (Gunneweg and Schmithals, 17).

^4Since Weber is concerned with legitimate Herrschaft (which he believes usually not to be found in historical cases in "pure" form), "authority" is both an accurate and a far less awkward translation than "imperative control"; cf. ibid., 15-16, n. 9. An even better rendering would be "domination, rule, reign"; cf. Langenscheidt's New College German Dictionary (New York: Langenscheidt, 1990; reprint of 1973 ed.), s.v. "Herrschaft."

^5Weber, 15, also makes a distinction between authority and power: "'Power' (Macht) is the probability that one actor within a social relationship will be in a position to carry out his own will despite resistance, regardless of the basis on which this probability rests."
Summarizing the tendencies of this period, Alexander, although realizing the difference between δύναμις and ἐξουσία, focuses on power. Kempson’s dissertation asserts that Revelation is “a theology of power,” and that one of the purposes of the Apocalypse is to unmask any “abusive power.” The first volume of Wink’s trilogy proposes that “legitimation” comes closest to catching the meaning of ἐξουσία, and that the entire NT is “a theology of power.” Journal articles only deal with a limited number of ἐξουσία passages in the Synoptics and the Pauline corpus.

Some of the dictionary articles distinguish between power and authority and emphasize the liberty and right aspects of ἐξουσία. They generally do not support the corresponding Hebrew/Aramaic or Latin terms and limit their Bible references. The arguments tend to be more philosophical than biblical.

Recent Developments

Jack D. Kingsbury discusses the relationship between authority and irony in Mark’s Gospel without exploring ἐξουσία in context.¹ Ron Farmer addresses the question of God’s power in the Apocalypse by applying the methodology of

process hermeneutic. Farmer concludes that Revelation provides “a new perspective on power, both divine and human.”

Interestingly the Anchor Bible Dictionary does not have an entry for authority per se. Some theological encyclopedia and lexica, however, continue to emphasize the difference between power and authority. Molinski’s article

2Farmer also argues that God’s power is “persuasive not coercive, influencing not controlling, relational not unilateral,” whereas the Beast’s power is “clearly coercive, controlling, and unilateral” (91, 97).

3David Noel Freedman et al., eds. The Anchor Bible Dictionary, 6 vols. (New York: Doubleday, 1992). Only the following entries are found: “City Authorities” (1:1049-1050) and “Scriptural Authority” (5:1017-1056).

points out that "authority must be distinguished from power and coercion" and that "authority begins where it is freely recognized and ends where it becomes power."¹ These works generally do not refer to Revelation. The Hebrew/Aramaic equivalents and Greek synonyms are only supported in one dictionary.²

The dictionary entry by Zsigmond J. Varga,³ however, does refer to Revelation. Varga provides the following

the term is derived from the Latin auctor (cause, sponsor, promoter, surety), which in turn comes from the verb augere (to increase [transitive and intransitive], to enrich); cf. similar etymology in Webster's New World Dictionary of American English, 3d college ed., ed. Victoria Neufeldt and David B. Guralmik, 4th printing with cor. (New York: Simon & Schuster, 1989), s.v. "Authority." See also William D. Mounce, The Analytical Lexicon to the Greek New Testament (Grand Rapids, MI: Zondervan Publishing House, 1993), s.v. "ἐξουσία"; here a long list of shades of meaning is given for the term: "power, ability, faculty; efficiency, energy; liberty, license; authority, rule, dominion, jurisdiction; pl. authorities, potentates, powers; right, authority, full power; privilege, prerogative."

¹Molinski, 62. His article ends with the following sober statement: "An earthly authority which does not point beyond itself becomes demonic and will show itself as arbitrary naked power" (65).

shades of meaning of the term: "(1) possibility, authority (Rev 13:5; 22:14), (2) ability, might, power (Rev 9:3, 10, 19; 11:6; 13:2, 4, 12; 16:9; 18:1; 20:6), (3) authorization, full authority, assignment, commission (Rev 2:26; 6:8; 11:6b; 13:7; 14:18), and (4) (political) power, ruling or official power (Rev 17:12-13)."  

The study Power: Focus for a Biblical Theology by Hans-Ruedi Weber\(^2\) concentrates on the term "power" rather than on "authority." In his 170-page book Weber mentions "authority" only five times on four pages.\(^3\)

The last volume of Walter Wink's trilogy\(^4\) focuses on the term "powers" but hardly mentions "authority."\(^5\) Two chapters of the book, "Unmasking the Domination System" and "Celebrating the Victory of God," however, discuss Revelation at length. Wink uses the expression "the

\(^1\)Ibid., 334-335.

\(^3\)On pp. 44, 82 Weber comments on Jesus' authority, and on pp. 62, 163, he discusses Rom 13 and Rev 13. He states that in Revelation "the exodus tradition reappears with its cosmic dimension," the Roman emperor "stands for all rebellious and self-idolizing power," and the Roman empire "appears as a satanic power with amazing and miraculous authority over all the nations" (163).

\(^5\)The index of subjects (419-423) lists the terms "power" and "powers" but not "authority."
Domination System"¹ which he interprets as "what happens when an entire network of Powers becomes integrated around idolatrous values."²

Later in his book, Wink uses another phrase, "the Delusional Apparatus" or system, to describe the "game being played on us by the Powers That Be."³ He argues that "that game is nowhere more trenchantly exposed than in the surrealistic images of Revelation 12-13."⁴ Wink devotes seven pages to these chapters under two subheadings.⁵ He believes that the "new insight here [Rev 12] is that order is not the opposite of chaos, but rather the means by which a system of chaos among the nations is maintained."⁶ Wink

¹"The Domination System" is the "outcome of the systematic repudiation by institutions of their divine vocations in order to pursue self-aggrandizement and greed" (ibid., 107). Wink also refers to "Satan" as the "world-encompassing spirit of the Domination System" (ibid., 9).

²Ibid., 9.

³Ibid., 89.

⁴Ibid. It may be noted here that out of the total of its 21 occurrences in Revelation, ἐξουσία appears 6 times in these chapters (12:10; 13:2, 4, 5, 7, 12).

⁵"The Delusional Apparatus according to Revelation 12-13" (ibid., 89-93) and "The Manufacture of Idolatry according to Revelation 13" (ibid., 93-95). Wink makes it clear: "I do not attempt a thorough exegesis of these two chapters [Rev 12-13], but focus only on the issues relevant to the theme of the Powers" (ibid., 351, n. 4).

⁶Ibid., 90.
concludes that this is an "element of power-worship . . .
stressed over and over by John."¹

Wink's study ends with a positive picture for the future: "The Book of Revelation contemplates a transformation of power relations"²; therefore, its message is a clear revelation of God's final victory over every evil:

The Book of Revelation may be gory, surrealistic, unnerving, even terrifying. But it contains not a single note of despair . . . The struggle continues, but the issue is no longer in doubt. The far-off strains of a victory song already reach our ears, and we are invited to join the chorus.³

The Theology of the Book of Revelation by Richard J. Bauckham⁴ does not deal explicitly with the theme of "power" or "authority,"⁵ but focuses on the theocentric aspects of

¹Ibid., 93. Wink also notes that the phrase "was allowed" (Greek εἴσοδον) is a "refrain all through Revelation 13," and is an expression of the fact that people "suppressed the truth about God and worshiped created things; therefore, God 'gave them up' to darkened minds and folly (Rom 1:18-32)." He concludes: "I am not aware of such a concatenation of permissions stated so repetitively anywhere else in Scripture. . . . The human race 'allowed' these things—all of them associated here with the centralization of state power under a satanic Domination System" (ibid., 92).

²Ibid., 99.

⁵Only the expression "power, absolutilizing of" appears in the index (ibid., 168).
the Apocalypse. According to Bauckham, "Revelation portrays the Roman Empire as a system of violent oppression, founded on conquest, maintained by violence and oppression." He concludes that Revelation's relevance today is that "it resists any absolutizing of power or structures or ideals within this world" and "it unmasks this dominant construction of the world as an ideology of the powerful which serves to maintain their power." Bauckham, as Wink did earlier, ends his book by pointing to God's ultimate victory when His kingdom comes.

1Bauckham states: "The theology of Revelation is highly theocentric. This, along with its distinctive doctrine of God, is its greatest contribution to New Testament theology" (23). He adds: "The throne itself, on which God sits in heaven, is mentioned very frequently. It is one of the central symbols of the whole book" (31). He further argues that "we need to understand the correlation between the understanding of God in Revelation and Revelation's critique of Roman power if we are fully to understand both" (35).

2Ibid., 35; cf. also 89-90. Bauckham asserts that the two aspects of Roman ideology are "deceitful illusion" and "the worship of power" (36-37); cf. Wink, Engaging the Powers, 89, 93. Bauckham concludes that "Rome's evil" is "absolutizing her own power and prosperity," in other words, it is a "deified political and military power" (38).

Summary

This review of the representative studies dealing with ἐξουσία or authority as it is used in the NT reveals the following characteristics:

1. There is a shift in the rendering of ἐξουσία. Whereas earlier dictionary articles usually emphasize the notion of power, later works represent a more balanced understanding by providing the meanings of authority and power. Recent works point to liberty and right as the primary meaning of ἐξουσία.

2. The term is derived from ἐξουσία and the corresponding Hebrew and Aramaic words are נָסָם and פְשִׂית. The Latin equivalents potestas or auctoritas are usually provided as reference especially in earlier works.

3. More recent dictionary articles generally limit their Bible references to the point where those from Revelation are becoming marginal or nonexistent. There is an emphasis on the difference between power and authority, which is based on philosophical or socio-ethical considerations, but without the necessary etymological study.

4. W. Foerster’s article in TWNT/TDNT is still the most comprehensive exposition of the term that notes and discusses the importance of ἐξουσία in Revelation.
5. O. Betz's article in *TBNT/NIDNTT* has the unique features of grouping ἐξουσία, δύναμις, and θρόνος, observing the importance of Daniel as a background material, and pointing out the frequency of the term in Revelation.

6. Journal articles limit their ἐξουσία studies to the Gospels and the Pauline corpus, with the exception of R. Farmer's recent article dealing with the notion of power in Revelation.

This review makes it evident that no comprehensive study has ever been written for the purpose of examining the Greek term ἐξουσία as it occurs and plays a special role in Revelation. Perhaps a study of the term as it appears in the entire NT can also be a future task.

Since the philosophical arguments of the theological dictionaries are determinative for interpreting authority/power in the Bible, it is imperative to investigate and explore the biblical meaning of ἐξουσία. A particular problem, which needs to be addressed, is the use and misuse of delegated authority in human and supernatural relationships.

During the course of this investigation first the nonbiblical and biblical backgrounds of ἐξουσία are considered then an examination of the term in the Greek text and literary structure of the Apocalypse follows.
CHAPTER II

THE BACKGROUND TO THE USE OF ΕΞΟΥΣΙΑ IN THE
BOOK OF REVELATION

The purpose of this chapter is to survey the usage of Εξουσία in nonbiblical and biblical sources. Such a study will serve to show the linguistic backgrounds to the meaning of the term. The survey is not intended to be exhaustive but rather to demonstrate a trend in the development of the meaning of Εξουσία and its Hebrew/Aramaic equivalents.

Nonbiblical Works

The two main categories of nonbiblical works which provide evidence regarding the use of Εξουσία and its Hebrew/Aramaic equivalents are Greco-Roman and Jewish writings. These are presented in chronological order, following dates provided by the Loeb Classical Library.

1The discussion of early patristic works is left out because it would go beyond the scope of this study requiring another dissertation in itself. For reference, see G. W. H. Lampe, ed., A Patristic Greek Lexicon (Oxford: Clarendon Press, 1961-1968), s.v. "Εξουσία."
Greco-Roman Writings

These sources furnish us with a general background to the rich meaning of ἐξουσία. First classical Greek authors then some papyri and inscriptions are studied.

Classical Greek Authors

Perhaps the first attestation for ἐξουσία is in the writings of the orator Antiphon (ca. 480-411 B.C.). Here ἐξουσία means chance, opportunity, possibility. Foerster, and Liddell and Scott translate it "ability" or "power to do." Interestingly the first occurrence of δύναμις is also found in Antiphon’s works.

Thucydides the historian (ca. 472-396 B.C.), a contemporary of Antiphon, in his eight-volume History of the Peloponnesian War, used ἐξουσία together with ἀρχην and δύναμις. In the first instance ἀρχην is a reference to the

commander Ἐπιτάδας, and the phrase πρὸς τὴν ἐξουσίαν is an accusative of comparison. Thucydides reported that the commander gave fewer rations to his soldiers “than his supplies would have allowed it.” In the second place μᾶλλον ἐξουσία means “a better opportunity,” which is given to the enemy in a sea battle. The subjunctive ἦν δύνηται expresses a prospective “capability.”

The orator Isocrates (436-338 B.C.), a younger contemporary of Antiphon and Thucydides, employed an accusative cum infinitivo clause¹ to express “gaining the power (ἐξουσία) to do.” Liddell and Scott translate this expression as “permission to do.”² The above construction is also used by Isocrates to express the potential danger when “one does what he likes” for his own happiness.³

Xenophon the historian (ca. 429-357 B.C.), an even younger contemporary of the foregoing writers, also mentioned ἐξουσία in at least two of his works. In

Memorabilia we find the word two times¹ and in Hiero once.² The construction can be rendered in two slightly different ways³ to describe the danger of violence and injustice when some want "to rule" (ἄρχειν). In the second instance in Memorabilia the conditional clause expresses a possibility.⁴ Finally, in Hiero ἡξουσία denotes an apparent contradiction in the attitude of the tyrants (ὁι τυράννοι), when they "enjoy freedom" but fail to provide it for others.⁵

The philosopher Plato (427-346 B.C.), a contemporary of Isocrates and Xenophon, employed ἡξουσία several times. In Alcibiades the term denotes the liberty or freedom to do

what a person thinks (δοκέω), or desires (βουλομαι), expressed as a conditional clause. The pair ἔξουσία and ἀρχή, is also used by Plato to denote “freedom” and “authority.” Further, he is probably the first one to use the plural form (πάσαις ἀρχαῖς καὶ ἔξουσίαις) of the pair to describe “rulers” or “magistracy.”

In a number of cases Plato employed ἔξουσία to describe “freedom” that is provided by society. In these instances the term is translated in a variety of ways: “possibility,” “permission to do,” “license,” and “power

6Plato Symposium 182E, LCL, 114: ἔξουσίαιν ὃ νόμος δέδωκε; idem, Gorgias 461E, LCL, 308, a reference is made to the “freedom of speech” (ἔξουσία τοῦ λέγειν); ibid., 525D, 526A, LCL, 526, the expressions describe an abuse of freedom: διά τὴν ἔξουσίαν μέγιστα ... ἀμαρτήματα ἀμαρτάνουσι, and ἐν μεγάλῃ ἔξουσίᾳ τοῦ ἀδικεῖν.

The orator Demosthenes (ca. 384-322 B.C.), a younger contemporary of Plato, also used ἕξουσία to denote “freedom.”\(^5\) Robinson interprets the term as “license, liberty, right.”\(^6\) “Freedom of peace” (τῆς εἰρήνης ἕξουσία)\(^7\) is probably a unique expression of Demosthenes, which is translated by Liddell and Scott as “freedom permitted by peace.”\(^8\) Finally, Demosthenes twice employed ἕξουσία\(^9\) in a

Aristotle, a student of Plato (384-321 B.C.), who devoted much time to ethics, used both the verb ἐξουσίαζω (to have power/authority)\(^3\) and the plural form of the noun ἐξουσία (authority, right, power).\(^4\) In the first case the verb is used with a genitive of comparison,\(^5\) in which the Apis ox in Egypt had "more authority than many monarchs."\(^6\) In the second place ἐξουσία can mean persons in "authoritative position"\(^7\) or "magistracy."\(^8\)

"supreme authority,"¹ "authority,"² "consular power,"³ and "full power."⁴ In all these instances ἐξουσία has to do with the power/authority of an office or position. The term always denotes delegated power when it is used in the singular.

One can observe a similar usage of ἐξουσία in the Roman Antiquities by the historian Dionysius of Halicarnassus (ca. 62-6 B.C.). The noun ἐξουσία describes the "office of the magistrate"⁵ and the verb ἐξουσιάζω denotes the "ruling power of the magistrate."⁶

⁴Diodorus Siculus 17.54.6, Diodorus Siculus VIII, LCL, 274, reads: συγχωρομένης αὐτῷ τῆς ἐξουσίας; cf. Robinson, 263, here ἐξουσία is rendered “commission, full-power, authority.”

Plutarch (ca. A.D. 50-120) employed ἔξουσία in three different areas: (1) personal, moral power, (2) arbitrary power, and (3) authority or power of an office. In a number of instances the term is paired with δύναμις. As a personal characteristic, ἔξουσία denotes the "power of the soul." In a negative sense, it can mean "arbitrary power." In most of the cases, however, the term signifies the authority of an "office" or "position," used in the singular as well as in the plural form.

These two features (positive and negative uses of ἔξουσία) can be observed also in the works of Herodian the historian (ca. A.D. 180-250), who employed ἔξουσία both to

denote the authority of an "office,"¹ and to describe a "capricious rule"² or "tyranny."³

In summary, the surveyed classical Greek authors have used ἐξουσία with different meanings: (1) authority/power of an office, (2) misuse of authority (tyranny), (3) ability or possibility to do, and (4) personal freedom, liberty, right. The majority of the occurrences fall under the first two categories.

As a general observation, the ἐξουσία occurrences in these works have to do with human arrangements of power: personal or moral freedom, authority, permission or right provided by state law, or in a more general sense, simply the ability and possibility of performing an action.⁴

Papyri and Inscriptions

These documents usually describe legal procedures, and ἐξουσία is generally used in a secular context. The

In two instances ἐξουσία denotes the right of a father over his child, as granted by law.⁴ In one place the term refers to the right of a property owner expressed in his will,⁵ and still in another context ἐξουσία describes the right of a trade partner.⁶

In two passages, the term designates the tribunicia potestas (tribunician power) of the Roman emperors.⁷ In one

place, ἐξουσία defines one aspect of the legal responsibility of a representative.¹

Finally, in one instance, the term refers to the personal authority/control (or command) of a merchant-seaman.²

The study of G. H. R. Horsley provides further insights into, and comments on, the use of ἐξουσία in some papyri and inscriptions.³ His analysis of a "Love Charm"⁴ affirms that the lead tablet inscription is a magical text that contains various permutations of vowels (nomina barbara), followed by an invocation⁵ built on verbal and

¹Pöxy. 261.15, reads: ἐπὶ τε πάσης ἐξουσίας καὶ παντός κριτηρίου; cf. Select Papyri I, LCL, 180; BAG, 278; Foerster, 2:253, translates "authorities."

⁴Ibid., 45.

⁵The text includes a plarindome (ωωωωωωωωω), containing one of the divine names frequently used in magical texts. The Greek reads: ἀξίω καὶ παρακαλῶ τὴν δοιναμὴν σου καὶ τὴν ἐξουσίαν σου, which translates "I ask for and request your power and authority."
substantival doublets including ἐξουσία and δύναμις, perhaps expressing the “power of words.”

Horsley lists three inscriptions and a papyrus fragment under ἐξουσία. The inscriptions all refer to civil authorities or magistracies, whereas the papyrus fragment describes delegated authority.

Perhaps one of the most important ancient documents is Monumentum Ancyranum, or Res Gestae Divi Augusti, first published by Buysbecche, a Dutch scholar, in 1555. The inscription is preserved both in Latin and in Greek.

The pairing of δύναμις and ἐξουσία might carry a magical overtone or it is simply an expression of emphasis; cf. Wink, Naming the Powers, 7, for his list of “paired expressions for power” in the NT.

Horsley, 83-84. inscription 4441 reads: καὶ λόγον ὑφέξεται τῇ ἐξουσίᾳ; inscription 97 reads: Βρόμιος Βασίλεας καὶ μέγας ἀνήρ . . . βουλῇ εὐχαριστεῖ . . . καὶ ταῖς ἐξουσίαις.

Res Gestae Divi Augusti, LCL, 333, 344-405.

Ibid., 335.

The Latin version reads: Post id tempus praestiti omnibus dignitate, potestatis au(tem n)ihilo amplius habui quam qui fuerunt m)ihilo quaque in ma(gis) tra(t)u conlegae; the Greek version reads: Ἀξιώματα τοῖς πάντων δίηγενα, ἐξουσίας.
According to the document, Emperor Augustus distinguished between *dignity* (Latin *dignitas*, Greek ἄξιωμα) and *authority* (Latin *potestas*, Greek ἐξουσία).

E. G. Hardy, commenting on Augustus’ statement, argues that after 23 B.C.

Augustus cut himself adrift from any regular magistracy, and the real bases of his power stood wholly outside the collegiate system. As a matter of fact, the various elements which made up the position of princeps made him not only first in dignity, but master of the empire.

C. K. Barrett, who also comments on Augustus’ statement, focuses on the term “dignity” and derives it from the Latin *auctoritas*. Then, he adds that “auctoritas is moral authority, almost ‘(power of) leadership.’ The *auctoritas* of Augustus, backed by his tribunician and proconsular rights, in fact gave him all the *potestas*, or actual power, he needed.”

2 Ibid., 161.
4 The phrase “tribunician power/right” (*tribunicia potestas* or δημαρχική ἐξουσία) occurs 5 times (1.4; 1.6; 2.10; and 3.15) in the document.

later followed by Gunneweg and Schmithals, who asserted that "where only one concept (e.g., authority) is available for us, the tension between authority and power of office resides within this concept."\(^1\) They also concluded that "potestas without auctoritas cannot endure."\(^2\)

Summarizing, the surveyed papyri and inscriptions use ΚΩΣΩΙΑ in a secular (legal) sense, predominantly denoting human rights that are granted by state law. The term, used in the plural, usually defines a group of state officials (authorities or magistracies).

**Jewish Writings**

In this second main category of nonbiblical works some pieces of the OT Pseudepigrapha (especially apocalyptic writings), Qumran writings, two Hellenistic Jewish writers (Philo and Josephus), and rabbinical works are studied. Where appropriate, the similarities between the Jewish writings and the biblical works are pointed out.

**The OT Pseudepigrapha**

\(^1\)Gunneweg and Schmithals, 22.
\(^2\)Ibid., 57.
200 B.C. and A.D. 100, points out that an important feature of these works is the notion that "the angels to whom God had given authority over the nations and over the physical universe itself, had outstripped their rightful authority and had taken the power into their own hands."¹

Later in the same chapter, "Angels and Demons," Russell notes how the problem of human suffering was explained by these apocalyptic writings.² Further, he refers to "the world of spirits,"³ then points to the final outcome of the complex problem of evil addressed by Jewish

²Ibid., 238, Russell observes: "The problem of human suffering was seen to be part of the greater problem of cosmic evil. Every part of the created universe was affected by it, and human life had to be lived out under its shadow. The same force of evil could be seen in microcosm in human history and in macrocosm in cosmic history."

³Ibid., Russell states: "Thus the world of spirits is divided into two. On the one side are the angels who remain true to God, who execute his will and direct men in the way they ought to go; on the other side are the fallen angels and demons who obey the chief of the demons and commit all kinds of wickedness upon the earth. This present world is now in the hands of these 'principalities and powers'; men's lives are in the power of Satan and his angels."

⁴Ibid., 240, Russell summarizes: "No matter what their own intentions might be, the angels were agents of the divine will. It was God who gave them power to administer the universe and even to lead the nations astray. Even the demons are subordinated to God and cannot act without his permission. It is by the permissive will of God that the Prince of Darkness himself continues his way until now. There will come a day of reckoning when God's authority will
apocalyptic. These important characteristics will be noted as the survey proceeds.

As part of the OT Pseudepigrapha, a group of five Jewish apocalyptic writings are studied here. These works are “writings falsely attributed to ideal figures featured in the Old Testament.” The purpose of selecting only these five writings is to demonstrate their usage of ἐξουσία, as it illuminates the relationship between Jewish and Christian apocalypses.

The Testament of Levi (T. Levi), one of the Testaments of the Twelve Patriarchs, originated in the second century B.C. Here ἐξουσία occurs twice. According be acknowledged by all.”

to Lightfoot, the phrase θρόνοι καὶ έξουσίαι in T. Levi 3:8 refers to “celestial hierarchy,”\textsuperscript{1} placed in the seventh heaven, in the immediate presence of God. Robinson translates the expression as “powers of the other world.”\textsuperscript{2} The closest, and only, NT allusion to this phrase is Col 1:16, that reads: εἴτε θρόνοι εἴτε Κυριότητες εἴτε ἀρχαὶ εἴτε έξουσίαι. The grouping of these four nouns is unique. Although θρόνος and έξουσία are both very important terms in Revelation, they never appear there in pair.

One of the most important among Jewish apocalyptic writings, is 1 (Ethiopic) Enoch. This composite work was probably written between 200 B.C. and A.D. 100,\textsuperscript{3} and in its Greek fragments έξουσία appears three times.\textsuperscript{4}

  \item Lightfoot, 153.
  \item Robinson, 263; cf. BAG, 278; Foerster, 2:571.
  \item Charlesworth, 1:7.
\end{itemize}
In 1 Enoch 9:5 one reads about God’s sovereignty based on His creative activity, whereas 1 Enoch 9:7 and 25:4 refer to delegated authority to humans. Though the Greek fragment of 1 Enoch 17:1 does not contain ἐξουσία, it is discussed by Foerster as denoting “different powers which rule nature.” Perhaps Rev 14:18 could be considered as a remote allusion to 1 Enoch 17:1.

Although the exact date of the composition of 2 (Slavonic) Enoch is yet unknown and the text now exists only in Slavonic, Foerster considers it a description of the seventh heaven, similar to that of T. Levi 3:8.

6 It reads in Greek: καὶ ἄλλος ἄγγελος [ἐξῆλθεν] ἐκ τοῦ θυσιαστήριου [ὁ] ἔχων ἐξουσίαν εἰπ τοῦ πυρὸς.

8 Foerster understands 2 Enoch 20:1 (the longer recension) as denoting “supernatural powers” (2:571). In the Greek language ἐξουσία would appear together with δυνάμεις, ἀρχαὶ, and κυριόττητες.
The Greek Apocalypse of Baruch (3 Baruch)\textsuperscript{1} is probably from the first to third century A.D.\textsuperscript{2} The plural form of κέρουσία occurs only once in 3 Baruch 12:3,\textsuperscript{3} denoting "principalities" or "authorities" with angels who rule over them. A similar expression with δύναμις also appears in this work,\textsuperscript{4} perhaps referring to angels in charge of heavenly beings. Another important construction in 3 Baruch is Κύριος ὁ θεός ὁ παντοκράτωρ (the Lord God, the Almighty),\textsuperscript{5} which appears in the NT, especially in the Book of Revelation,\textsuperscript{6} that might reflect the common apocalyptic milieu of A.D. 100.

\textsuperscript{6}The term παντοκράτωρ is used 10 times in the NT (2 Cor 6:18; Rev 1:8; 4:8; 11:17; 15:3; 16:7, 14; 19:6, 15; 21:22). The above construction can be found 6 times in Revelation (4:8; 11:17; 15:3; 16:7; 19:6; 21:22).
The last, and most important, item of this pseudepigrapha is the Testament of Solomon (T. Sol.), also from the first to third century A.D. \(^1\) 'Εξουσία occurs a total of nine times\(^3\) in this writing, predominantly in the doxologies\(^4\) where it designates authority over demons granted by God to Solomon.\(^5\) In two passages, however, the term denotes the authority of the Son of God over evil spirits.\(^6\) Finally, in two places\(^7\) the plural form of ἐξουσία

Sol. 20:15 as “the clearest and most explicit passage”\textsuperscript{4} that
describes supernatural powers.\textsuperscript{5}

In summary, the surveyed pseudepigrapha employed
εξουσία/εξουσίαι with three shades of meaning: (1) delegated
authority over demons, (2) heavenly principalities (angels
or demons), and (3) God’s sovereignty. The term is used
mostly in the Testament of Solomon. An important
construction for Revelation is Κύριος ὁ θεός ὁ παντοκράτωρ
which occurs in 3 Baruch 1:3. The similarities between
these works and some NT passages might reflect the common
apocalyptic milieu of A.D. 100.

\textsuperscript{1}The Greek reads: καὶ τίνες οἱ εξουσίαι [οἱ δαίμονες] αὐτῶν
κατά ἀνθρώπων; cf. ibid., 98.

\textsuperscript{2}The Greek reads: οἱ γὰρ ἀρχαὶ καὶ εξουσίαι καὶ
dυνάμεις; cf. ibid., 62.

\textsuperscript{3}This “separation” is attested in Rev 12:7-12, which
reads: οὗ ἄγγελος αὐτοῦ [δράκοντος] μετ’ αὐτοῦ ἐβλήθησαν. This
theme might also reflect the common apocalyptic milieu of
A.D. 100.

supernatural powers are designated “rulers of the spirit
world.”

\textsuperscript{5}For similar expressions for these powers, see Eph

Qumran Writings

In this section one of the Hebrew terms for power, חָיָה "dominion, kingdom," is surveyed in two Qumran documents. It occurs that the word is used both positively and negatively. The Hebrew/Aramaic מַלְאָכִי "ruling power, government," does not appear in the Qumran Writings.

In the Community Rule (1QS) the term occurs four times, always in a negative sense. In the War Scroll (1QM) מַלְאָכִי is employed nine times in the following three different contexts: (1) in a positive way (3 times); (2) in

---

1 מַלְאָכִי is also used in the MT 17 times: Gen 1:16; 1 Kgs 9:19; 2 Kgs 20:13; Isa 22:21; 39:2; Jer 24:1; 51:28; Mic 4:8; Pss 103:22; 114:2; 136:8, 9; 145:13; Dan 11:5; 2 Chr 8:6; 32:9.

2 When references are made to God or His people the meaning of the term is always positive, in all other cases it has a negative connotation.

3 Cf. Betz, 2:608.

a negative sense (5 times);¹ and (3) with a general meaning (1 time).²

Summarizing, it appears that in the two surveyed Qumran documents קַוָאִיק is used in harmony with the community’s understanding of the merciless struggle between the forces of light and darkness.³

**Hellenistic Jewish Authors**

Both Philo and Josephus employed כּוּאִיקא following the classical Greek usage, but they particularly emphasized the aspect of authoritative, ruling power.⁴ Josephus used the term five times more⁵ than Philo.⁶

³Cf. 1QS 1:15, where one of the purposes of the Qumran community is expressed as follows: “That they may love all the sons of light, each according to his lot in God’s design, and hate all the sons of darkness, each according to his guilt in God’s vengeance”; cf. Vermes, 62.

⁶See Günter Mayer, Index Philoneus (New York: Walter de Gruyter, 1974), s.v. “כּוּאִיקא”; 31 occurrences of the term are listed.
Philo

Foerster asserts that Philo (ca. 20 B.C.-A.D. 50) generally followed the "ordinary Greek usage" of ἔξουσία meaning "permission, authority, right, office." Philo also discussed some aspects of the problem of "absolute power." Wink notes that ἔξουσία is used thirty-one times by Philo, but "without reference to spiritual Powers." Betz simply states that Philo followed "the general Greek usage" with emphasis on authoritative, ruling power, which includes the absolute power of the king, the governor, the people, and God. In the NTGED four different shades of the meaning of ἔξουσία in Philo's writings are listed: (1) freedom of action, (2) ruling power of officials, (3) authorities, and (4) absolute sovereignty of God.

My own investigation indicates that Philo's uses of ἔξουσία can be divided into two main groups: (1) authority

in human relationships\(^1\) and (2) authority of supernatural beings.\(^2\)

One of the largest groups of ἐξουσία occurrences with regard to human relationships, has to do with abusive, despotic power.\(^3\) The term is used with an adjective to describe power/authority both quantitatively and qualitatively. In Flaccum 44 refers to the "superior power" of the Roman prefect Flaccus,\(^4\) who abused his authority to the extent that a Jewish delegation, headed by Philo, was sent to Rome to see emperor Gaius Caligula.\(^5\) De Iosepho 67 perceives the danger when a group of people becomes despotic.\(^6\) De Iosepho 166 describes Joseph in Egypt as he

\(^1\)The first main group consists of (1) abuse of power, despotic power (7 times), (2) authority, power, permission, right (7 times), (3) absolute authority, claimed or granted (5 times), and (4) authorities, officials (once).

\(^2\)The second main group contains (1) God’s authority/power (10 times), and (2) the power of angels (once).

\(^3\)Flacc. 44; Ios. 67, 166; Legat. 114; Mos. 1.328; Praem. 137; Spec. 3.137.

\(^4\)The Greek phrase reads: ἀπὸ μείζονος ἐξουσίας ἀναρριπτίζειν.

\(^6\)The Greek reads: δεσποτικὴν ἐξουσίαν ἔχει ὁ δῆμος; cf. Betz, 2:608; Foerster, 2:564.
pretended to abuse the "vastness of his authority." In *Legatio ad Gaium* 114 Philo comments on emperor Gaius' "appetite" for "the greatest power." In *De vita Moysis* 1.328 Philo reflects on the character of Moses, who did not use his ruling power in an "insolent" manner. De *praemiis et poenis* (*De exsecrationibus*) 137 speaks about a person who is so possessed by power that he exhibits injustice through his despotic authority. Finally, in *De specialibus legibus* 3.137 Philo warns the masters not to use their power violently against their slaves.

The second largest group of ἔξουσια passages deals with the *legal aspects* of human power relationships. The term is used in a variety of ways. It denotes *power* in a

2 The clause reads in Greek: ὅταν προσλάβῃ κενοδοξίαν ὅμοιοι καὶ φιλονεικίαις μετὰ τῆς μεγίστης ἔξουσιας; cf. Yonge, 767.

3 The Greek says: ἠδεσαν γὰρ αὐτὸν ὅποι καταλαξομενόμενον ἀρχῆς ἔξουσια; cf. Yonge, 490.

general sense; permission granted to a “free man,” to “gladiators,” to the “populace”; and right, given to “husbands,” and to “fathers.”

The third group of εξουσία occurrences defines both claimed and granted absolute authority. Thus, the term refers to the claimed authority of “kings or leaders,” and

4In Flaccum 57, here the genitive absolute construction reads: εξουσίων μιᾷ ἡμέρᾳ γενομένων καὶ περισσυπουλημένων τὰ ἱδία; cf. Yonge, 730.

5De specialibus legibus 2. 24, says: ἀνέθηκε τὴν εξουσίαν τοῦ τὰ ὁμοσθεντα, and ibid., 3. 70, reads: μήτε ἀναδύσεθαι τὴν εξουσίαν ἐχέτω; cf. Foerster, 2: 564; Yonge, 570, 601.

6Legatio ad Gaium 28, reads: ἢ γὰρ ύπο ταντελῆς εξουσία κατὰ τοὺς τῶν Ἀραμαῖων νόμους ἀνάκειται πατρί; cf. Yonge, 759; Wink, Naming the Powers, 157, n. 3.

7The noun εξουσία usually occurs with the adjective αὐτοκράτης (ruling/acting by one’s own authority; absolute power).

8De opificio mundi 17, reads: πολλὴν φιλοτιμίαν βασιλείας ἢ τινὸς ηγεμόνος αὐτοκράτους εξουσίας μεταποιουμένου; cf. Betz, 2: 608; Foerster, 2: 564; Wink, Naming the Powers, 157, n. 3; Yonge, 4.
emperors. In two instances, εξουσία denotes granted authority: (1) by God to the godly and (2) by parents to their child.

Finally, the plural phrase, εξουσίαις καὶ ἀρχαῖς, is used once to signify those who are in high positions.

In the second main group of εξουσία occurrences the majority of the passages deal with God’s absolute power. This power or authority is manifested in three ways: (1) God’s ruling power in history, (2) His power that changes...
individual human lives, and (3) God’s creative activity and sustaining power. In one instance only, ἐξουσία refers to the limits of the power of angels.

In summary, it is clear that Philo employed the term for both human and supernatural (spiritual) powers. He obviously had some concerns about abusive authority, probably motivated by his own personal experience with Roman authorities. Philo also emphasized the legal aspects of ἐξουσία without any reference to delegated authority.

1Legum allegoriae 1.95, reads: [κυρίος] ἐξουσίαν ἐχοντος; cf. Betz, 2:608; Foerster, 2:564; Yonge, 35; De sacrificiis Abelis et Caini 60, says: δέξηται χαρακτήρας ἐξουσίας...ἀυτοῦ; cf. Betz, 2:608; Foerster, 2:564; Yonge, 101; De somniis 2.294, reads: τῆς δεσποτικῆς ἐξουσίας [θεοῦ]; cf. Yonge, 409.

2Legum allegoriae 3.73, reads: οὐκ ἐξουσία πεποίηκεν ἀλλ’ ἀγαθότητι; cf. Wink, Naming the Powers, 157, n. 3; Yonge, 58; De Cherubim 27, says: πρώτας δυνάμεις ἀγαθότητα καὶ ἐξουσίαν...ἐξουσία δὲ τοῦ γεννηθέντος ἄρχειν; cf. Betz, 2:608; Foerster, 2:564; Yonge, 83; De specialibus legibus 1.294, reads: οὐ πρὸς τὰς ὑπερβολὰς τοῦ κράτους αὐτοῦ καὶ τῆς ἐξουσίας ἁπιδῶν; cf. Wink, Naming the Powers, 157, n. 3; Yonge, 562.

4Contrary to the argument of Wink, Naming the Powers, 157, that ἐξουσία is never used by Philo for "spiritual Powers."

5Eight out of 31 times Philo’s total ἐξουσία usages are concentrated in 2 of his writings: In Flaccum (2 times) and Legatio ad Gajum (6 times).
Almost one-third (10 times) of his total ἐξουσία passages deal with God’s absolute power/authority.

**Josephus**

A general observation of Josephus’ (Joseph ben Matthias, A.D. 37-ca. 100) usage of the term reveals that he employed ἐξουσία with a much wider scope of meaning than Philo did. However, his focus was on human arrangements of power, including the idea of delegated authority, and not so much on power in the supernatural realm.

Foerster makes the valid statement that Josephus’ usage of ἐξουσία parallels the “Classical Greek” use.¹ Thus, it generally denotes human relationships,² rather than the absolute monarchical power of God.³ Foerster also points out that in a few instances ἐξουσία is employed by

¹Foerster, 2:564; cf. Betz, 2:607-608, here the following categories are provided: (1) permission, freedom of action, (2) power of kings, (3) delegated power of rulers/officials, (4) authorities, (5) authority of civil governments, granted by God, and (6) God’s power. See also NTGED, 483, with the following shades of meaning: (1) absolute sovereignty of God, (2) freedom of action, (3) ruling power of officials, and (4) authorities.

²Foerster, 2:564, lists: (1) authority, permission, right, power of disposal, (2) authorities, (3) power of the king, and (4) influence.

Josephus to mean an "antithesis to law" in human relationships.¹

Wink asserts that the term is used 151 times in the writings of Josephus, which includes the notion of liberty.² Wink also notices that ἐξουσία is often paired with "other power language."³

According to Rengstorf's concordance, ἐξουσία is employed 155 times by Josephus, especially for the purpose of describing authority/power in human, legal relationships.⁴ The term appears 79 times in Antiquitates Judaicae and 76 times in Josephus' other works.⁵ The most frequent meaning of ἐξουσία is authority/power in the political or religious sphere of human relationships.⁶

¹Foerster, 2:563, parallels ἐξουσία to ἐβρικ, meaning self-asserted freedom or caprice.

²Wink, Naming the Powers, 157-158; the correct number is 155.

³Ibid., 158, here AJ 17.231; 18.214, 345; 20.11; and Vit. 190 are mentioned. The terms used with ἐξουσία are: δύναμις and ἀρχή.

⁵Bellum Judaicum (58 times), Vita (11 times), and Contra Apionem (7 times).

⁶Out of its 155 occurrences, the term 114 times mean opportunity, permission, liberty, right, or simply power/authority.
Considering the overlap between meanings and the elusiveness in the meaning of the term, \(114 \varepsilon\varphi\omega\sigma\iota\alpha\) passages can be divided as follows: (1) general usage, which denotes authority/power 32 times, authority/permission, authorization 17 times, liberty/freedom 6 times, right/privilege 6 times, and opportunity once; (2) characteristics of authority 4 times; (3) authority/power especially, when \(\varepsilon\varphi\omega\sigma\iota\alpha\) denotes kingly/imperial power, political power, or delegated authority.

of the king/Caesar 26 times; and (4) religious or political power 22 times.2

Cf. also Foerster, 2:563, translates "self-asserted freedom, caprice."

plural form of ἐξουσία signifies the authority of Roman procurators.\(^1\)

In summary, Josephus used ἐξουσία far more intensively than Philo did in his works. The great majority of Josephus’ usages, however, have to do with human power relationships. Thus, some thoughts are devoted to the question of delegated human power/authority, and to the problem of abusive authority, manifested in the actions of the rulers of the first-century Roman empire. Josephus makes relatively few references to supernatural powers.

**Rabbinic Works**

It appears that the majority of the מְשַּׁל (ruling power, government) occurrences in the Mishnah have to do with personal, legal rights or (especially in the plural form of the term) civil establishments. On the other hand, the term generally denotes supernatural powers in the Talmud and in other Rabbinic works.

In the Mishnah, one finds at least four different usages\(^2\) of מְשַּׁל, most commonly prescribing personal rights.

\(^1\)BJ 2.350, reads: θεραπεύειν γάρ, συκ ἐκβιζεῖν χρη τὰς ἐξουσίας, literally: “but to be submissive not to irritate those in authority”; cf. Betz, 2:608; Foerster, 2:564; Whiston, 621, renders “to be submissive to those in authority, and not give them any provocation.”

\(^2\)(1) personal rights (7 times); (2) freedom of choice (twice); (3) civil authorities (twice); and (4)
Thus, the term defines the rights of someone, in a general sense:¹ the rights of a house owner over livestock that wanders onto his property;² the rights of an attorney, in the case of a betrothal;³ the regulations, dealing with Levirate marriage;⁴ the rights of a widow to inherit;⁵ the rights of a divorced woman;⁶ and the rights of a married woman.⁷

In two instances, מְשֻׁרָה expresses the human freedom of choice.⁸ In Aboth 3:16 God’s omniscience and human freedom are compared.⁹ In Shebuoth 3:6 oaths are compared in relation to free choice.¹⁰

The plural form, מושרים (powers, authorities), signifies human authorities in a pejorative sense. Finally, מושרים appears once in a polemical context, defending monotheism and referring to supernatural powers.

In the Babylonian Talmud (B. Talmud) מושרים is also employed in four different contexts, predominantly describing the activities of supernatural powers. Thus, in Hagigah 12b, it is stated that the heaven is the dwelling

Once the term means *right* or *authorization* to teach.\(^5\) Finally, מְשֹרֵּד somewhat similarly conveys the idea of *permission* granted to angels for destruction.\(^6\)

In the Jerusalem Talmud (J. Talmud) מְשֹרֵּד describes the *absolute power* or *authority* of God,\(^7\) whereas the plural form of the word denotes *supernatural powers* in a polemic

\(\)\(^1\)It reads: "That the Sadducees [Minim] might not say: There are many ruling powers in Heaven"; cf. Betz, 2:608; Foerster, 2:572.

context. A similar statement can also be found in Genesis Rabbah, clearly indicating a monotheistic overtone.

In summary, in the Mishnah the singular form, משל, is more common, and it usually stands for personal, human rights. The plural form, מרשון, generally denotes human or supernatural powers.

The Babylonian Talmud, similarly, employs the singular form for permission or authorization, whereas the plural form exclusively stands for supernatural powers, always in an apologetic context. The Jerusalem Talmud and the Midrash Rabbah follow the above pattern.

Summary

The earliest ἐξουσία occurrences had to do with the ability and possibility of someone who performs an action. Later the Greco-Roman works predominantly employed ἐξουσία to denote the power/authority of an office and the misuse of such authority. Inscriptions generally described personal human rights granted by state law.

2Genesis Rabbah 1:7 on Gen 1:1, Jacob Neusner, Genesis Rabbah: The Judaic Commentary to the Book of Genesis (Atlanta, GA: Scholars Press, 1985), 7, reads: "So that no creature may differ, saying, 'Two powers gave the Torah, two powers created the world.'"
Among Jewish writings the pseudepigrapha used ἐξουσία to refer to delegated authority either in the human or in the supernatural realm. Both Philo and Josephus followed the classical Greek usage of ἐξουσία and had some concerns about abusive authority. While almost one-third of Philo's ἐξουσία passages dealt with God's authority, Josephus' focus was on human arrangements of power.

Biblical Writings

The two main categories of biblical writings are the LXX and the NT. The Theodotion (Θ) translation of Daniel is noted when it differs from the LXX. The Hebrew/Aramaic equivalents of ἐξουσία in the MT are pointed out as this study progresses.

Ἐξουσία/ἐξουσιάζειν in the LXX

This survey of the ἐξουσία/ἐξουσιάζειν word-group is based on the critical edition of the LXX text by Alfred Rahlfs. The Hatch and Redpath concordance lists seventy-

two occurrences of ἐξουσία (including 13 in Theodotion’s Daniel) and eighteen uses of ἐξουσιαζέων in the LXX.¹

Foerster, in the TDNT, does not provide an exact number of ἐξουσία in the LXX.² Betz, in the NIDNTT, gives fifty occurrences of the term.³ In the NTGED one finds the approximation, “ca. 50 times,”⁴ while Wink supports fifty-nine ἐξουσία uses in the LXX.⁵

My own computer analysis of the LXX text⁶ furnishes 65 references for ἐξουσία, and 16 for ἐξουσιαζέων. In the Theodotion text of Daniel and Bel ἐξουσία appears 12 times.⁷

In the TDNT we find the following shades of meaning of ἐξουσία in the LXX: (1) right, authority, permission/freedom (in a legal or political sense); (2) permission

granted/withheld by the Jewish law; (3) right or permission given by God; (4) power of the king or God; and (5) authorities. The NIDNTT shows a similar grouping of the term: (1) permission to do (by law); (2) dominion, power granted by God; (3) dominion, kingdom; and (4) God’s rule. The NTGED also provides a somewhat similar list: (1) freedom of action; (2) territory of one’s dominion; (3) ruling power/dominion delegated by God; (4) God’s power (absolute sovereignty); and (5) authorities. W. Wink remarks in the first volume of his trilogy that when ἐξουσία is used in the LXX, it is “usually in reference to humans, occasionally to God, but never to angels or demons or other spiritual powers.”

My own investigation indicates that the noun ἐξουσία is employed in the LXX in five different ways. The verb

The remaining 2 occurrences are unique: 3 Macc 7:12 refers to royal permissions (πάσης βασιλικῆς ἐξουσίας) and 4 Macc 6:33 describes an authority of
ἐξουσιάζειν also has five shades of meaning, but different from the above.¹

'Εξουσία

The largest group of εξουσία occurrences (30) in the LXX has to do with might, power, permission, or delegated authority.² The earliest attestations of εξουσία in this sense are 1 Esdr 4:28, 40, where references are made to the king's power (ὁ βασιλεύς τῆς ἐξουσίας αὐτοῦ),³ and to a woman's authority (αὐτῇ ἡ εξουσία). Esth 3:13b contains a statement by King Artaxerxes regarding arrogance which could characterize kingly power (μὴ τῷ θαρσεῖ τῆς εξουσίας ἐπαρέσουσα). Eight passages in the books of Maccabees⁴

¹Out of the total of 16 occurrences, the verb denotes: (1) tyrannical rulership (5 times); (2) official rulers (4 times); (3) power, control, authority (4 times); (4) to empower (twice); and (5) kingly power/authority (once).

clearly indicate delegated authority,¹ whereas four passages² state the fact that one has (or does not have) authority (ἐξω ἐξουσίαν). In two instances ἐξουσία simply denotes “power.”³ In Prov 17:14, ἐξουσία and ἀρχή are juxtaposed, perhaps as synonyms (ἐξουσίαν δίδωσιν λόγοις ἀρχή δικαιοσύνης). Wis 10:14 describes how wisdom helps to gain power over those who tyrannize others (ἐως ἴσθεγεν αὑτῷ... ἐξουσίαν τιραννιστῶν αὐτοῦ).⁴ In Sirach ἐξουσία means “power to do,” in an accusative cum infinitivo construction (δε ἐχει ἐξουσίαν τοῦ φονεύειν);³ “authority” delegated by God to humans (ἐδώκεν αὐτοῖς ἐξουσίαν);⁶ and “freedom” or “authority” expressed as a wish by an aorist subjunctive (μὴ δῶς ἐξουσίαν).⁷ In Daniel ἐξουσία denotes “delegated

authority,”¹ or “having power.”² In Bel 25 the term means “permission” granted by Nebuchadnezzar (δός μοι τὴν ἐξουσίαν).

The second group of ἐξουσία passages (16) in the LXX defines dominion or kingdom.³ First, that of a king,⁴ then, in a figurative sense, that of the sun and moon,⁵ and wisdom.⁶ In Dan 4:31, 37a, 37b the term appears five times, and in four instances it signifies the dominion of Nebuchadnezzar. In Dan 7:12, 14, 26, 27 ἐξουσία is the rendering of the Aramaic שֶׁכֶר (dominion, power), and reference is made to his translation. Sir 33:20; cf. BAG, 278.

¹Dan 3:97; 5:7, 29 expressed by the Greek διδωμι. The MT has the Aramaic שֶׁכֶר (to rule/have dominion or power over) or מִשְׁמַר (to rule/have power), whereas Θ renders ἀρχω; cf. BAG, 278; Foerster, 2:566.

⁶The Greek text of Sir 24:11 refers to wisdom that had dominion over Jerusalem: καὶ ἐν Ἱερουσαλημ ἡ ἐξουσία μου; cf. Foerster, 2:564, translates ἐξουσία as “kingdom,” Goodspeed, 269, renders it “authority over”.

designates the dominions of the beasts,¹ of ὄς ἀνθρώπου,² and of λαὸς ἄγιος ὕψιστος.³

The third group of ἐξουσία occurrences (10) clearly denotes God’s authority or dominion.⁴ In Esth 4:17b the term is rendered “control over.”⁵ In Jdt 8:15 ἐξουσία defines “authority.”⁶ In Ps 113:2 ἐξουσία translates the Hebrew נְעֶשֶׁת meaning “dominion.”⁷ In Wis 16:13 God has “power” over life and death. In Sir 10:4 and Dan 4:27 God has rulership over the whole earth (ἡ ἐξουσία αὐτοῦ [Κύριος] ἐπὶ πᾶσι τῇ γῇ). In Dan 4:17, 31 God is exalted as “the Lord/God of Heaven” who has “all authority” in Heaven and on the earth,³ in general, and over human dominions,⁹ in

⁹Dan 4:17 reads: τὸν κύριον τοῦ οὐρανοῦ ἐξουσίαν ἔχειν πάντων τῶν ἐν τῷ οὐρανῷ καὶ τῶν ἐπὶ τῆς γῆς. The MT text has the
particular. The NT attributes this authority to Christ in Matt 28:18, which reads: "ἐδώκω μοι πάσα εξουσία ἐν οὐρανῷ καὶ ἐπὶ [τῆς] γῆς." Finally, God's authority is expressed in Dan 4:37 by a subjective genitive (ἡ εξουσία αὐτοῦ) and in Dan 5:4 by a present participle (τῶν θεῶν ... τῶν ἔχοντα τὴν εξουσίαν).

The fourth group of εξουσία meanings (6) refers to an office of authority or magistracy. It is interesting to note that the first three occurrences are related to the priestly or high priestly office. In Dan 3:2 the plural form of εξουσία refers to magistracies in the Babylonian empire, while in Dan 7:27 the term denotes world dominions.

Aramaic ברור (to rule); cf. BAG, 277; Foerster, 2:565, understands here the "unrestricted sovereignty of God."

2It reads: τοὺς ἐπ᾽ εξουσιῶν κατὰ χάραν; cf. LS, 599.

3It reads: πᾶσαι [αἱ] εξουσίαι αὐτῷ ὑποταγήσονται. The MT has the Aramaic בָּרֹר (dominion, power). Θ translates αἱ ἀρχαί.
In the fifth group there is only one ἐξουσία passage,¹ which probably designates angelic beings.² Eph 6:12 (πρὸς τὰς ἐξουσίας ... πρὸς τὰ πνευματικά) is perhaps its closest NT parallel.

Ἐξουσιάζειν

The largest group of ἐξουσιάζειν occurrences (5) in the LXX has to do with tyrannical or abusive rulership.³ In 2 Esdr 7:24 ἐξουσιάζειν is the rendering of the Aramaic שׂז (to rule)⁴ to describe a leadership that enslaves people. In 2 Esdr 19:37 the term translates the Hebrew של (to rule)⁵ to express the harshness of a kingship over Israel. In 1 Macc 10:70 ἐξουσιάζειν occurs in the question of Apollonius to Jonathan the high priest regarding his claim for ruling authority.⁶ In Eccl 8:9 ἐξουσιάζειν translates

⁴The Greek reads: σὺ ἐξουσιάσεις καταδουλοῦσθαι αὐτούς.
⁵It reads in Greek: ἐπὶ τὰ σώματα ἡμῶν ἐξουσιάζουσιν; cf. Robinson, 263, translates “oppressive authority.”
⁶The Greek reads: τί σὺ ἐξουσιάζῃ ἐφ’ ἡμᾶς.
the Hebrew שימש (to rule over)\(^1\) to indicate the result of an abusive rulership. Finally, ἐξουσιάζειν appears in Sir 20:8 describing hatred against abusive rulers.\(^2\)

The second group of ἐξουσιάζειν passages (4) simply describes the position or office of rulers, usually in the form of a participle.\(^3\) The Hebrew/Aramaic verbs translated by ἐξουσιάζειν are: שימש (to rule over) in 2 Esdr 15:15; שמש (to rule) in Eccl 7:19; and ṣב (to rule) in Eccl 10:4, 5.

In the third group of ἐξουσιάζειν passages (4) the term has special meanings.\(^4\) It denotes “control,”\(^5\) “power,”\(^6\) and “rule.”\(^7\) Interestingly, the term also indicates a

certain abuse or disorder (addiction), which controls the behavior of a person.¹

In the fourth group of ἐξουσιάζειν occurrences, two passages² render the Hiphil form of the Hebrew שָׁחַר (to empower), referring to God's action, both in a positive (ὁ θεὸς ἐξουσιάζειν αὐτὸν) and in a negative sense (οὐκ ἐξουσιάζει αὐτῷ ὁ θεὸς).

In the fifth group there is again only one ἐξουσιάζειν passage. It describes the authoritative word of a king.³

In summary, the ἐξουσία/ἐξουσιάζειν word-group in the LXX predominantly denotes delegated authority and its misuse in human relationships. Occasionally ἐξουσία describes God's dominion over the covenant people. Once (2 Macc 3:24) the term probably refers to angelic beings.

'Ἐξουσία generally translates the Hebrew נְפִרָת (dominion, kingdom) and the Aramaic נְפָר (dominion, power).

"Εξουσία/εξουσιαζευειν in the NT

The term εξουσία appears 102 times\(^1\) both in the GNT\(^3\) and in the NTG\(^2\). In the book of Revelation itself, one finds εξουσία 21 times, 51 are in the Gospels and Acts, with 30 in the Pauline corpus and the Catholic letters. The following survey does not include the Apocalypse, for it is dealt with in chapter 3 of this dissertation.

Even the most detailed NT theological dictionaries fail to provide a comprehensive study of the 102 εξουσία passages of the Greek NT. Thus, in the TDNT, Foerster considers only three basic categories of the term: (1) the invisible power of God, (2) the lordship of God/Jesus, and (3) the freedom granted to the Christian community.\(^2\) These

The critical apparatus of the NTG\(^2\), however, notes (1) on Rom 8:38, that the Claromontanus text adds εξουσία, whereas the Ephraemi Rescriptus along with some Minuscules, Syriac, and Bihairic MSS support εξουσίαι; and (2) on Rom 13:1, that εξουσίαι appears one more time in the Claromontanus, and Athos MSS, the Majority, and the Syriac text, which adds up to a total of 104 εξουσίαι(1) occurrences in the available Greek MSS. This survey considers 102 NT passages.

categories are generally followed by the NIDNTT\(^1\) and the NTGED.\(^2\)

Wink, on the other hand, while counting 102 occurrences of \(\epsilon\acute{o}u\sigma\iota\alpha\) in the NT, argues that "87 of them [are used] for the impersonal capacity for action which is bestowed by an office."\(^3\) He then adds that "the single most significant fact about exousia as a term for power is that 85 percent of its uses refer to a structural dimension of existence, that permission or authorization provided by some legitimate authorizing person or body."\(^4\) Wink finally concludes that "the exousiai in the New Testament are, in the vast majority of cases, not spiritual beings but ideological justifications, political or religious legitimations, and delegated permissions."\(^5\) It appears that Wink considers only the everyday exercise of power as the

main use of ἐξουσία in the NT. The following survey is intended to challenge this view.

Before doing so, let us briefly consider three important aspects of authority/power in the NT. First, Edwin A. Abbott points out that in the Gospels ἐξουσία is "very commonly found with 'give,' and it generally means 'power that is delegated,' that is to say, not tyranny that is seized, but a right lawfully given, or an office or magistracy duly and lawfully appointed." Second, Paul Löffler examines the other side of the question and concludes that the suffering of Christ not only points to the fact that the reign of God has actually begun, but also to "a permanent struggle for the implementation of its goals, which are rejected by the established powers."

Third, Elizabeth A. Castelli considering the entire NT, remarks that "it imagines a world, indeed a universe, in which power infuses every sort of relationship, social and

1Cf. Varga, 334-335, who seems to follow similar direction by supporting 4 shades of meaning of ἐξουσία in the NT, and emphasizing the legal aspect of the term: (1) possibility, authority; (2) ability, might, power; (3) authorization, full authority, assignment, commission; and (4) (political) power, ruling or official power.

supernatural." These three factors (lawfully delegated power; sometimes violent power struggle; and power-infused human and supernatural relationships) provide an important and complex background against which the various NT ἐξουσία passages can be understood in a balanced way.

'Ἐξουσία

The term ἐξουσία appears in the Gospels and Acts 51 times, exactly half of its NT occurrences. At least eight different fields of meaning, depending on the context, may be observed.

The Gospels and Acts

In the majority of cases (33) the term denotes authority. In the triple tradition of the Synoptics, one

2(1) authority (33 times); (2) authorization (3 times); (3) commission (once); (4) authority/power (8 times); (5) power of darkness/Satan (twice); (6) jurisdiction (twice); (7) authorities (once); and (8) control (once).

finds four references to Jesus’ εξουσία,¹ and only one reference to the delegated authority² of the disciples. Similarly, in the double tradition the focus is once again on Jesus’ authority,³ nevertheless, there is also an important reference to the statement made by the Roman centurion about delegated authority.⁴

¹(1) In regard to forgiveness of sins: Matt 9:6; Mark 2:10; Luke 5:24, here the Greek reads: εξουσίαν ἔχει ὁ θύσιν τοῦ ἀνθρώπου ἐπὶ τῆς γῆς; cf. Abbott, 102, n. 5; Budesheim, 198; (2) Questioning Jesus’ authority to heal and teach: Matt 21:23; Mark 11:28a; Luke 20:2a, here it reads: ἐν ποιᾷ εξουσίᾳ ταύτα ποιεῖς; (3) Questioning the source of Jesus’ authority: Matt 21:21; Mark 11:28b; Luke 20:2b, here the Greek reads: τίς σοι ἔδωκεν τὴν εξουσίαν ταύτην; and (4) Jesus’ reply to the inquiries: Matt 21:27; Mark 11:33; Luke 20:8, here it reads: οὐδὲ ἐγὼ λέγω ὑμῖν ἐν ποιᾷ εξουσίᾳ ταύτα ποιῶ.

⁴Matt 8:9; Luke 7:8, here it reads: καὶ γὰρ ἐγὼ ἀνθρωπὸς εἰμι ὑπὸ εξουσίαν; cf. Josephus, BJ 2.195, who uses ἐπιτάσσομαι; cf. also Hugh J. Schonfield, ed., The Authentic
In the unique materials of Matthew, Luke, and the Gospel of John, one finds an additional four references to Jesus' authority, in three cases, as delegated by the Father. With regard to the Father's own authority, there is only one passage in Acts.

In two instances one finds εξουσία as delegated to the disciples. In one passage the reference to authority is made in general.

**New Testament** (London: Dennis Dobson, 1955), 139, n. 5; Powell, 102, n. 10.

1 Matt 9:8 reads: ἐδόξασαν τὸν θεὸν τὸν δόντα εξουσίαν τοιαύτην τοῖς ἀνθρώποις, and Matt 28:18 reads: ἐδόθη μοι πᾶσα εξουσία ἐν οὐρανῷ καὶ ἐπὶ [τῆς] γῆς; cf. Grundmann, 57, remarks: "That is Matthew's Kerygma. This Kerygma immediately moves Matthew close to the words of Daniel: ἡ εξουσία αὐτοῦ εξουσία αἰώνιος... (7:14, LXX)"; Wink, Naming the Powers, 16, notes: "The risen Jesus used the pluralistic singular of his own authority."

3 John 5:27 reads: εξουσίαν ἐδωκεν αὐτῷ κρίσιν ποιεῖν.

4 Acts 1:7 reads: χρόνος ἢ καιρὸς οὗς ἡ πατὴρ ἐθέτο ἐν τῇ ἰδίᾳ εξουσίᾳ.

In Luke’s temptation story, Satan claims to have the ability to delegate authority. Finally, in Acts 8:19, Simon requests the apostles to give him the authority to bestow the power of the Holy Spirit.

The second area where εξουσία is employed has to do with authorization (3) and in that sense it is used only in Acts with regard to Paul. A similar usage (third meaning) can be detected in Mark 13:34, where the term probably means commission.

The eight passages in the fourth group denote both power and authority. In four places in John, the term is

5The RSV and the NASB render “in charge.”

7(1-2) John 10:18, reads: εξουσίαν ἔχω θείαν αὐτὴν [τὴν ψυχῆν], καὶ εξουσίαν ἔχω πάλιν λαβεῖν αὐτὴν; cf. Abbott, 101, asserts that it happened “out of love for others”; Powell, 104, n. 14, states that John wanted “to show that heavenly...
used in connection with Jesus’ soteriological activity, whereas in three passages it refers to Pilate’s legal activity. In Luke 12:5, one finds an indirect reference to the devil’s destroying power/authority.

The fifth group of ἐξουσία passages (2) combines the ideas of power/authority and darkness. In these verses

power is far above ‘might’ and deserves a higher name. Accordingly he [John] calls it by the term ‘authority’ (ἐξουσία)”; (3) John 17:2, reads: ἐδώκας [πάτερ] αὐτῷ [υἱὸς] ἐξουσίαν τὰς σαρκός; cf. Matt 28:18; Abbott, 101; Powell, 103; (4) John 1:12, reads: ἐδώκεν αὐτοῖς ἐξουσίαν τέκνα θεοῦ γενέσθαι; cf. Mark 10:15; Matt 18:3; Abbott, 93, remarks the phrase means “adoption into the whole family of the Father.”

1John 19:10-11 reads: ἐξουσίαν ἔχω [Πιλάτος] ἀπολύσαι σε καὶ ἐξουσίαν ἔχω σταυρώσαι σε... σύν εἰπές ἐξουσίαν κατ' ἐμοῦ [Ἰησοῦς] συμβείναι εἰ μὴ ἦν δεδομένον σοι ἀνωθεν; cf. Matt 8:9; Luke 7:8; Gunneweg and Schmithals, 126, compare the scene with that of John 18:33, 36-38, commenting that the lordship of the “Lord Jesus Christ is shown, not as potestas, but as auctoritas.”. Cf. also Powell, 177-178, states that “Pilate uses the word [ἐξουσία] quite ‘untheologically’... Jesus uses the word ‘in a theological sense’”; H-R. Weber, 61-62.

2The Greek reads: φοβήθητε τὸν μετὰ τὸ ἀποκτείνα ἐξουσία ἐμβαλεῖν εἰς τὴν γένναν; cf. Wink, Naming the Powers, 9.

Luke expresses that power/authority is misused by Satan and by the Jewish authorities.

The sixth and seventh groups of verses (3) denote *jurisdiction*¹ and *authorities,*² respectively.

In the last (eighth) group of ἐξουσία passages there is only one verse in Acts 5:4.³ Here *control*⁴ is the most likely meaning of the term.

Summarizing, in the Gospels and Acts (with 51 occurrences of ἐξουσία) there are only fourteen instances (mainly in Luke and Acts)⁵ where the term denotes legal permission or authorization in human relationships.⁶ The

---

⁴ NASB translates "under your control;" RSV renders "at your disposal."

⁵ See Matt 8:9; Mark 13:34; Luke 7:8; 12:11; 19:17; 20:20; 23:7; John 19:10-11; Acts 5:4; 9:14; 26:10, 12. Counting the entire NT, this number (14) indicates only 13.7 percent of the total of 102 ἐξουσία passages. Further conclusions follow as the survey of NT epistles proceeds.

⁶ Contrary to Wink, who argues that 85 percent of the total ἐξουσία uses in the NT belong to this category (ibid., * Naming the Powers,* 10).
majority of the passages (37) have to do with the supernatural use\(^1\) of authority.

**The Pauline corpus and the Catholic letters**

The thirty ἐξουσία passages in the Pauline corpus and the Catholic letters can be divided into five groups.\(^2\)

In the majority of cases (9) the term denotes right,\(^3\) especially in 1 Corinthians. In Rom 9:21,\(^4\) Paul uses ἐξουσία in a metaphorical context that has both canonical (Jer 18:1-6) and apocryphal (Wis 15:7-8) allusions. In 1 Cor 9, the term is clustered in five verses. Here Paul employed ἐξουσία six times to define\(^5\) or

the Powers, 15-16).

\(^1\)Jesus’ authority (25 times), delegated authority to the disciples/Christians (6 times), Satan’s authority (4 times), the Father’s authority (once), and authority to bestow the Holy Spirit (once).

\(^2\)(1) right (9 times); (2) special use with other power language (8 times); (3) authority/power (7 times); (4) authorities (5 times); and (5) liberty (once).

\(^3\)Rom 9:21; 1 Cor 9:4, 5, 6, 12, 18; 2 Thess 3:9; Heb 13:10.

'The Greek reads: οὐκ ἔχει ἐξουσίαν ὁ κεραμεὺς τοῦ πηλοῦ; cf. Abbott, 96, n. 1, remarks that “the parallel is between the ‘potter’ and the all-wise Creator rather than between ‘man’ and ‘clay’.”

\(^5\)Paul uses the term 3 times in rhetorical questions: 1 Cor 9:4 reads: μὴ οὐκ ἔχομεν ἐξουσίαν φαγεῖν καὶ πεῖν; 1 Cor 9:5 reads: μὴ οὐκ ἔχομεν ἐξουσίαν ἀδελφήν γυναῖκα περιάγειν; 1 Cor 9:6 reads: ἢ μόνος ἔγω καὶ Ἀπολλώνιος οὐκ ἔχομεν ἐξουσίαν μὴ ἐργάζεσθαι; cf. Abbott, 102, n. 5, argues that “Paul refuses
defend apostolic rights. In 2 Thess 3:9, εξουσία is once again used by Paul for the same purpose as in 1 Cor 9. The last item of this group is Heb 13:10, where a reference is made to the OT burnt offering, as a type of Jesus’ suffering outside of the gate of Jerusalem.

The second group of εξουσία occurrences (8) designates a special use of the term for both human and supernatural powers. Wink thinks that the phrase ἀρχαὶ καὶ εξουσίαι was launched by Paul “on its peculiarly Christian voyage as denoting spiritual entities.” A closer examination of the following eight passages, however, to use certain apostolic privileges.”

1 Paul uses the term 3 times again to make affirmative statements regarding apostolic rights: 1 Cor 9:12 reads: εἰ ἄλλοι τῆς ἰμάνος εξουσίας μετέχουσιν, οὐ μᾶλλον ἡμεῖς; ἀλλ’ οὖν ἐχρησάμεθα τῇ εξουσίᾳ ταύτῃ; 1 Cor 9:18 reads: μὴ καταχρῆσασθαι τῇ εξουσίᾳ μου ἐν τῷ εὐαγγελίῳ.

2 The Greek reads: οὖν ὅτι οὖν ἔχομεν εξουσίαν.

3 The Greek reads: ἔχομεν θυσιαστήριον ἐξ οὗ φαγεῖν οὐκ ἔχουσιν εξουσίαν οἱ τῇ σκηνῇ λατρεύοντες.

4 Exod 29:14; Lev 4:12, 21.

5 1 Cor 15:24; Eph 1:21; 3:10; 6:12; Col 1:16; 2:10, 15; 1 Pet 3:22. Usually together with ἄρχαί, δύναμεις, κυρίότητες; cf. Foerster, 2:571.

6 Wink, Naming the Powers, 17.
reveals that the above phrase defines not only spiritual but secular entities as well, or perhaps both.

Scholars usually classify these Pauline passages as referring to (1) “good” angels,¹ (2) “bad” angels,² or (3) both.³ My view, however, is that some of these passages⁴ refer not only to a spiritual realm, but to human dignitaries as well. The context of these verses shows that Jesus’ activity is universal encompassing both heavenly and human beings. Outside of the Pauline corpus, there is only one more place⁵ where a similar expression occurs.

¹ Eph 3:10 reads: ἵνα γνωρισθῇ νῦν ταῖς ἀρχαίς καὶ ταῖς εξουσίαις ἐν τοῖς ἐπουρανίοις; Col 1:16 reads: εἴτε θρόνοι εἴτε κυριότητες εἴτε ἄρχαι εἴτε εξουσίαι; Col 2:10 reads: δς ἐστιν ἡ κεφαλὴ πάσης ἀρχῆς καὶ εξουσίας; cf. Abbott, 87, n. 2; Lightfoot, 154.

² Eph 6:12 reads: πρὸς τὰς ἀρχάς, πρὸς τὰς εξουσίας, πρὸς τοὺς κοσμοκράτορας τοῦ σκότους τοῦτου; Col 2:15 reads: ἀπεκδυσάμενος τὰς ἀρχὰς καὶ τὰς εξουσίας; cf. Abbott, 87, n. 2; Caird, 101; Lightfoot, 154.

³ 1 Cor 15:24 reads: ὅταν καταργήσῃ πᾶσαν ἀρχήν καὶ πᾶσαν εξουσίαν καὶ δύναμιν; Eph 1:21 reads: ὑπεράνω πάσης ἀρχῆς καὶ εξουσίας καὶ δυνάμεως καὶ κυριότητος; cf. Abbott, 87, n. 2; Lightfoot, 154; Powell, 161-162.

⁴ Especially 1 Cor 15:24; Eph 1:21; Col 1:16; 2:10, 15; cf. Caird, 17, 78; Lightfoot, 154.

⁵ 1 Pet 3:22 reads: ὑποταγέντων αὐτῷ ἀγγέλων καὶ εξουσίων καὶ δυνάμεων; cf. Lightfoot, 154; Powell, 161-162; Souter, 88.
The third group of passages (7) denotes human and supernatural authority/power in different circumstances.\(^1\) Thus, the term stands for (a) human authority (or control) over the will/desire;\(^2\) (b) authority/freedom (or a symbol of it) on the woman’s head;\(^3\) (c) Paul’s apostolic authority/dignity, which is delegated by the Lord;\(^4\) (d) the authority/power of Satan described as the power of the air/darkness;\(^5\)

\(^1\) 1 Cor 7:37; 10:11; 2 Cor 10:8; 13:10; Eph 2:2; Col 1:13; Jude 25.

\(^2\) 1 Cor 7:37 reads: εξουσίαν δὲ ἔχει περὶ τοῦ ἰδίου θελήματος; cf. RSV renders “having his desire under control.”

\(^3\) 1 Cor 10:11 reads: διὰ τοῦτο ὅθελε ἡ γυνὴ εξουσίαν ἔχειν ἐπὶ τῆς κεφαλῆς διὰ τοὺς ἀγάλματος; cf. some of the various expositions of this controversial topic: Caird, 18, 22; Fitzmayer, 57; Foerster, 2:573-574; Hall, 41-42; Jaubert, 430; Schwarz, 249; Varga, 335-336; Vine, 89.

\(^4\) 2 Cor 10:8 reads: καυχήσωμαι περὶ τῆς εξουσίας ἡμῶν ἡ ἐδωκέν ὁ κύριος; 2 Cor 13:10 reads: χρήσωμαι κατὰ τὴν εξουσίαν ἡν ὁ κύριος ἐδωκέν μοι.

\(^5\) Eph 2:2 reads: κατὰ τὸν ἀρχοντα τῆς εξουσίας τοῦ ἀέρος; Col 1:13 reads: ὁς ἐρρύσατο ἡμᾶς ἐκ τῆς εξουσίας τοῦ σκότους καὶ μετέστησαν εἰς τὴν βεστιλείαν τοῦ ὕδω ἢς ἀγάπης αὐτοῦ; cf. Luke 22:53 for a similar phrase; RSV renders “dominion of darkness”; Abbott, 86, comments on Col 1:13: “The antithesis between ‘authority’ and ‘kingdom’ suggests that the writer uses the former in the sense of temporary power, delegated and misused. In this sense, and hence in the sense of blind ‘despotism’ (‘doing and saying what one likes’) it is used sometimes by the later Greek writers, as also in English poetry [e.g., by Cowper, Milton, Pope, Shakespeare, Shelly, Tennyson, and Wordsworth’]; Lightfoot, 141, provides the following interpretation of Col 1:13: “The transference from darkness to light is here presented as a transference from an arbitrary tyranny, an εξουσία, to a well-ordered
and (e) the authority (κράτος καὶ ἐξουσία) of God/Christ in a doxology.

In the fourth group one finds five ἐξουσία occurrences either in the plural or in the singular, with a plural meaning, denoting earthly authorities. The first four occurrences are clustered in Rom 13:1-3. The fifth passage, in Titus 3:1, contains a similar exhortation to that of Rom 13:1.

sovereignty, a βασιλεία.” Perhaps Acts 26:18 can be added to this discussion, which reads: τοῦ ἐπιστρέψαι ἀπὸ σκότους εἰς φῶς καὶ τῆς ἐξουσίας τοῦ Σατανᾶ ἐπὶ τὸν θεόν.

1Jude 25 reads: μόνον θεῷ σωτῆρι ἡμῶν διὰ Ἰησοῦ Χριστοῦ τοῦ κυρίου ἡμῶν δόξα μεγαλωσύνη κράτος καὶ ἐξουσία; cf. similar doxology in Rev 5:13: καὶ τῷ ἀρντῷ ἡ εὐλογία καὶ ἡ τιμή καὶ ἡ δόξα καὶ τὸ κράτος.

2Rom 13:1-3; Titus 3:1.

3In Rom 13:1-2 the term appears 3 times: Πάσα ψυχῆ ἐξουσίας υπερεχούσας ὑποτάσσεσθαι. οὐ γὰρ ἐστιν ἐξουσία εἰ μὴ ὑπὸ θεοῦ ... ὥστε δὲ ἀντιτασσόμενος τῇ ἐξουσίᾳ τῇ τοῦ θεοῦ διαταγῇ ἀνθέσθηκε. Rom 13:3 reads: θέλεις δὲ μὴ φοβεῖσθαι τὴν ἐξουσίαν; cf. some of the representative studies that made attempts to interpret this passage in view of the Roman empire: Abbott, 87, n. 2; Barraclough, 17, 20; Bruce, 88; Cullmann, 336; Gunneweg and Schmithals, 174; Käsemann, 376; Powell, 174; Stein, 328; Strobel, 93; Vonk, 339, 341-343; H-R. Weber, 62-63; Wink, Naming the Powers, 10. Cf. also Caird, 23-24, commenting on Rom 13:1-5, remarks: “Any derivative authority which sets itself up as an absolute authority, demanding absolute obedience, takes on a demonic character.”

4The Greek reads: ὑπομίμησε αὐτοῦς ἀρχαῖς ἐξουσίαις ὑποτάσσεσθαι.
In the fifth category there is only one verse in 1 Cor 8:9, where Paul warns the community to use their Christian *liberty* (or right) in a responsible way.

Summarizing, in the Pauline corpus and the Catholic letters (with 30 occurrences of ἐξουσία) there are 17 instances (mainly in Romans and 1 Corinthians) where the term denotes personal rights or legal authorities in human relationships. The remaining 13 passages have to do with the supernatural use of authority.

Before concluding this chapter let us briefly consider two verb forms of the ἐξουσία word-group as they are employed in the NT. Interestingly ἐξουσιάζειν and κατεξουσιάζειν appear only six times in the NT, and almost all occurrences have a pejorative meaning.

---

1. The Greek reads: Βλέπετε δὲ μὴ τὰς ἡ ἐξουσίας ἡμῶν ἀυτὴ πρόσκομμα γένηται τοῖς ἀσθενεσίν.

2. Rom 9:21; 13:1-3; 1 Cor 7:37; 8:9; 9:4-6, 12, 18; 11:10; 2 Thess 3:9; Titus 3:1; Heb 13:10. Adding this number (17) to the previous 14 (counted on the Gospels and Acts) represents only 30.4 percent of the total of 102 ἐξουσία passages in the entire NT. A final conclusion on this question follows in chapter 3 of this dissertation.

3. Contrary to Wink, *Naming the Powers*, 15-16, where he claims that 85 percent of the total ἐξουσία uses in the NT belong to this category.

4. A special use for supernatural powers (8 times), apostolic authority delegated by God (twice), Satan’s authority (twice), and the authority of God/Christ (once).
The verb ἐξουσιάζειν (to have power/authority; to rule over) appears four times in the Greek NT. In Luke 22:25, it describes the leadership style of Gentile rulers. In 1 Cor 6:12, the future passive form of the verb is put in a wordplay with ἔξεστιν (it is allowed/permitted/lawful) to express the personal responsibility of the Christians. Finally, in 1 Cor 7:4, the term occurs twice in a balanced statement about mutual agreement between married couples with regard to sexual autonomy.

---

2The Greek reads: οἱ ἐξουσιάζοντες αὐτῶν εὐεργεταί καλοῦνται; cf. the different double tradition texts in Matt 20:25 and Mark 10:42, where κατεξουσιάζειν is used. Cf. also Abbott, 89-90, where, commenting on Luke 22:25, argues that "Luke’s divergences from Mark and Matthew indicate a disposition in his Gospel to interpret official ‘authority’ in a bad sense."

3The Greek reads: πάντα μοι ἔξεστιν ἀλλ’ οὐκ ἐκώ ἐξουσιασθήσομαι ὑπὸ τίνος.

4The Greek reads: ἡ γυνὴ τοῦ ἰδίου σώματος οὐκ ἐξουσιάζει ἀλλὰ ὁ ἄνδρος ὁμοίως δὲ καὶ ὁ ἄνδρος τοῦ ἰδίου σώματος οὐκ ἐξουσιάζει ἀλλὰ ἡ γυνή; cf. Castelli, 211-212, points out that Paul’s position is a “combined refusal to sanction renunciation within marriage,” and further, “Paul’s notion of the body is not hierarchical but complementary.”
The verb κατεξουσιάζειν (to rule over; to exercise power/authority over) appears only twice\(^1\) in the Greek NT. This double tradition\(^2\) is again a description of the leadership style of Gentile rulers, perhaps more dramatic than Luke’s statement.\(^3\)

**Summary**

This background study of the nonbiblical and biblical occurrences of ἐξουσία (and the corresponding Hebrew and Aramaic פשע, שלט, and ḫâṣâ'î) reveals the following characteristics:

1. Within the category of nonbiblical works the Greco-Roman writings used ἐξουσία to describe human arrangements of power. The main concerns were personal human rights, the power of an office or position, and the misuse of authority (tyranny).

2. Among Jewish writings the OT Pseudepigrapha focused on the supernatural aspect of ἐξουσία. In the Qumran writings ḫâṣâ'î is used to denote both human and

\(^1\) Matt 20:25 and Mark 10:42.

\(^2\) The Greek reads: οἱ μεγάλοι αὐτῶν κατεξουσιάζουσιν αὐτῶν.

\(^3\) See the above comment on Luke 22:25.
supernatural dominions or beings. Philo and Josephus were addressing the practical questions of an authoritative, ruling power. They also discussed some problems related to delegated human power and described abusive authority. The Rabbinic works employed נפש to denote human rights or permission, while the plural form of the term designated supernatural powers or beings.

3. Within the category of biblical writings the ἐξουσία/ἐξουσίαζειν word-group is predominantly used in the LXX to denote delegated authority and its misuse in human relationships. ἐξουσία generally translated the Hebrew גִלְגָל (dominion, kingdom) and the Aramaic ṣ̄בִּיש (dominion, power). ἐξουσίαζειν usually stood for the Hebrew שִׂיפַּתי (to rule over) and שִּיב (to rule, have dominion).

4. In the NT the majority of the ἐξουσία passages had to do with the supernatural use of authority, while the term also denoted legal permission or personal rights. In some instances, especially in the Pauline corpus, ἐξουσία designated supernatural beings, perhaps under the influence of Jewish apocalyptic traditions.
In summary, this background study makes it clear that the majority of the NT use of ἐξουσία/ἐξουσιάζειν closely follow the LXX and the Jewish apocalyptic usage particularly in the area of delegated authority/power in human and supernatural relationships. Nevertheless, NT writers put more emphasis on the supernatural aspect of the term.
CHAPTER III

AN INVESTIGATION OF THE ΕΞΟΥΣΙΑ PASSAGES
IN REVELATION

This chapter builds on the conclusions of the previous two: the first dealt with the pertinent literature about Εξουσία and the second considered the linguistic backgrounds to the term. It is clear that no comprehensive study of the Εξουσία passages in the NT in general, and in Revelation in particular, has ever been written.

Chapter 2 of this dissertation provided a background study of the term, including the NT, whereas this chapter focuses on the Book of Revelation. First, following the methodology of chapter 2, the specifics of the twenty-one Εξουσία occurrences in the Apocalypse\(^1\) are studied. Second, the Εξουσία passages are investigated within the literary structure and context of Revelation.

114
'Εξουσία Occurrences in the Apocalypse

A simple numerical comparison of the εξουσία occurrences in the NT books reveals that the term appears more often in Revelation than in any other NT writing. The εξουσία passages in the Apocalypse may be divided into six groups.

The majority of the occurrences (8) have to do with authority/power. Thus, εξουσία denotes the power delegated by God to destroy, to hurt, and to perform miracles. In

1The top 5 NT writings where the term occurs a minimum of 10 times: Revelation (21 times); Luke (16 times); Matthew (10 times); Mark (10 times); and 1 Corinthians (10 times).

2Authority/power (8 times); delegated authority (7 times); supernatural power (3 times); Christ’s authority (once); eschatological authority (once); and eschatological right (once).

5Rev 9:3 reads: καὶ ἐκ τοῦ κατούμον ἐξῆλθον ἀκρίδες ἐς τὴν γῆν, καὶ ἐδόθη αὐταῖς εξουσία ἕως ἐξουσιάν ἐξουσίαν οἱ σκορπίοι τῆς γῆς; Rev 9:10 reads: καὶ ἐν ταῖς οὐραῖς αὐτῶν ἡ ἐξουσία ἀυτῶν ἀδικήσαι τοὺς ἀνθρώπους μήνας πέντε; Rev 9:19 reads: ἡ γὰρ ἐξουσία τῶν ἱππῶν ἐν τῷ στόματι αὐτῶν ἐστιν καὶ ἐν ταῖς οὐραῖς αὐτῶν.

one instance the term is related to the "second death,"¹ which is a unique expression² of the Apocalypse.

The second group of ἐξουσία passages (7) describes delegated human and supernatural authority that is exercised in the form of rulership, which is usually abusive.³ Thus, it is given by the Dragon⁴ and by God⁵ to the first (Sea) Beast of Rev 13. Perhaps the most enigmatic use of authority in Revelation is found in 17:12-13, where it is delegated to the "ten horns"⁶ of the scarlet Beast, only to be returned to him⁷ after "one hour." Finally, ἐξουσία is

---

²The phrase is found only in Rev 2:11; 20:6, 14.

³Rev 13:2, 4, 5, 7, 12; 17:12, 13.

⁶Rev 17:12 reads: οὗτοις [δέκα κέρατα] βασιλεῖαν οὐπώ ἔλαβον, ἀλλὰ ἐξουσίαν ὡς βασιλείας μίαν ὡραν λαμβάνουσιν μετὰ τοῦ θηρίου.

⁷Rev 17:13 reads: οὕτωι [δέκα κέρατα] μίαν γνώμην ἐχουσίν καὶ τὴν δύναμιν καὶ ἐξουσίαν αὐτῶν τῷ θηρίῳ διδόσαιν; cf. Eph 1:21, where ἐξουσία and δύναμις are part of the power
exercised by the second (Land) Beast of Rev 13\(^1\) in the presence of the first Beast.

In the third group of passages (3)\(^2\) one finds two instances where the term denotes the supernatural power of the angels over fire\(^3\) and the earth.\(^4\) In one place ἐξουσία refers to the power of God over the plagues.\(^5\)

In the fourth group there is one passage that emphatically proclaims the beginning of God’s βασιλεία and Christ’s ἐξουσία.\(^6\) This verse is also a unique combination of power language (δύναμις, βασιλεία, ἐξουσία) used in the Apocalypse.

\(^4\)Rev 18:1 reads: μετὰ ταύτα εἶδον ἄλλον ἄγγελον καταβαίνοντα ἐκ τοῦ οὐρανοῦ ἐχοντα ἐξουσίαν μεγάλην.

\(^6\)Rev 12:10 reads: ἀρτι ἔγενετο ἡ σωτηρία καὶ ἡ δύναμις καὶ ἡ βασιλεία τοῦ θεοῦ ἡμῶν καὶ ἡ ἐξουσία τοῦ Χριστοῦ αὐτοῦ.
In the fifth category we also find one passage: it announces the reward of the overcomers in Thyatira, which is sharing with Christ in His eschatological ruling power.\(^1\)

Similarly, in the sixth category there is only a single passage—the last of the seven macarisms\(^2\) in Revelation. It heralds the eschatological right\(^3\) of the redeemed.

Summarizing, in the Apocalypse (with 21 occurrences of \(\varepsilon \xi \omicron \upsilon \sigma \iota \alpha \) the majority (18) of the passages have to do with supernatural use\(^4\) of authority/power. In chapter 2 of this dissertation, a similar conclusion was drawn with regard to the Gospels, Acts, Pauline corpus, and Catholic

\(^1\)Rev 2:26 reads: καὶ ὁ νικῶν καὶ ὁ τηρῶν ἄχρι τέλους τὰ ἐργα μου, δύσω αὐτῶ καὶ ὑπείρασα ἐπὶ τῶν άθικῶν ... ὡς κάγω; cf. Rev 3:21, especially for the construction: "καὶ ὁ νικῶν ... δύσω αὐτῶ ... ὡς κάγω. This comparison appears only in these two verses. It is worthy to note here the following allusions to this passage: Rev 12:5; 19:15; and Ps 2:8-9(LXX).

\(^3\)Rev 22:14 reads: μακάριοι οἱ πλέοντες τὰς στολὰς αὐτῶν, ἵνα ἐσται ἡ ἐξουσία αὐτῶν ἐπὶ τὸ ζύλου τῆς ζωῆς; cf. Rev 2:7, where similar promise is given to the overcomers in Ephesus.

\(^4\)Authority/power delegated by God or Satan (12 times); the transcendent authority/power of God and the angels (3 times); Christ’s authority (once); the eschatological ruling power of the overcomers (once); and the eschatological right of the redeemed (once).
letters.  Therefore, it is safe to conclude here that the main thrust of the power language employed in the entire NT directs one's attention to the use (and abuse) of supernatural delegated power in human relationships.

Looking back to the summary of chapter 2, it is evident that the use of ἐξουσία in Revelation shows the closest linguistic connection to the LXX and Jewish apocalyptic usage, which is in harmony with the general NT use. In other words, all these writings do have a tendency to address the question of delegated authority/power in the human as well as in the supernatural sphere, which are sometimes intermingled.

Where 50 out of the 81 instances evidently denote supernatural use of authority/power.

Rev 13:12; 17:12, 13. All 3 passages refer to a religio-political power structure, which abuses delegated authority. Adding this number (3) to the previous 31 (counted above on the rest of the NT) represents only 33.3 percent of the total of 102 ἐξουσία passages in the entire NT.

Contrary to Wink, Naming the Powers, 15-16, who argues that 85 percent of the total ἐξουσία uses in the NT belong to this category.

To be true to the Hellenistic Jewish writers, Philo and Josephus, we may want to note here that they too dealt with the problems of delegated (and abused) authority, but their emphasis was not the supernatural aspect.
Let us consider next the pattern of the distribution of έξουσία in the entire Greek text of Revelation.

'Έξουσία Clustering in the Apocalypse

Even a casual reading of the Greek text of Revelation should direct one’s attention to the clustering of έξουσία in chapters 9 (4 times) and 13 (5 times). This clustering appears to be significant when one considers the overall context of the Apocalypse. Although the term occurs in twelve (2, 6, 9, 11, 12, 13, 14, 16, 17, 18, 20, 22) of the total of twenty-two chapters, nevertheless, the clustering points to the textual center of Revelation.

This center can tentatively be located to chapters 11-13 if the entire Greek text (405 verses) of the Apocalypse is equally divided into two halves. Calculating only the number of verses, not their length, the very center would be Rev 12:7-12. This inclusio or hymn contains at its center ἡ έξουσία τοῦ χριστοῦ αὐτοῦ that might be considered as a pointing device emphasizing or affirming Christ’s eschatological authority. Jesus’ authority appears to be

1Rev 9:3, 10, 19; 13:2, 4, 5, 7, 12.

equal with God's eschatological kingdom (βασιλεία) and power (δύναμις). In turn this power language points to the gift of salvation (σωτηρία).

Fig. 1. 'Εξουσία clustering in Revelation. Numbers above line indicate chapters, below line refer to εξουσία occurrences. Arrows point to clustering.

Figure 1 clearly reveals three basic features:

1. The most important εξουσία clustering in the three central chapters (11-13),

2. A significant increase of occurrences in the center, especially in one of the frame chapters (13),

3. Some further important clusters in chapters 9 and 16-18.

The foregoing study naturally raises the question whether this "macro-analysis" is sufficient to determine the
structural/theological center of Revelation. In other words, can pure text-analysis provide definitive evidence with regard to the theological (or linguistic) focus of the book?

Chiasm As a Structuring Device

It appears that chiasm (or chiasmus) is the linguistic and literary phenomenon which satisfies the above criterion of a structural center or “climactic centrality”.

---

by focusing the interest of the reader or hearer of a Bible passage on its central expression. "The basic figure of chiasm simply involves the reversal of the order of words in balancing clauses and phrases."¹

A brief survey of some representative structural studies convincingly shows that the literary arrangement or composition of chiasmus is not unique to religious or canonical writings. Chiasm can be observed both in ancient Near Eastern, Greek, or Latin sources,² and in the Qumran writings.³ The intention of the following investigation, however, is to consider only biblical writings.

Chiasm in the OT

Yehuda T. Radday makes the following general observation regarding the literary structure of Hebrew biblical narrative: "Chiastic structure is more than an artificial or artistic device. It is rather, and most

remarkably so, a key to meaning. Not paying sufficient attention to it may result in failure to grasp the true theme.1 A similar conclusion can be drawn from a study of biblical Hebrew poetry.2

Although the literary structures of the Torah, the Prophets, and the Writings are studied in detail, particular scholarly interest has been shown in the analysis of certain literary units of the following books: Genesis,3 Leviticus,4

Isaiah, Psalms, and Daniel. These analyses detect both “chiastic tetracolon” (ABBA pattern) and “concentric pentacolon” (ABCBA pattern) in these OT writings. Sometimes the patterns are part of longer chiastic

structures. This feature is especially evident when the
text of an entire biblical book is analyzed.

Chiasm in the NT

J. A. Bengel’s study from the mid-eighteenth century
is probably the first scholarly work using the Greek term
χιασμός and the Latin “chiasmus” as termini technici to
describe this Hebrew literary style.¹ According to his
index, Bengel identified and analyzed passages from the
following twelve NT books: Matthew, John, Acts, Romans,
1 Corinthians, 2 Corinthians, Galatians, Ephesians,
Colossians, 2 Timothy, Philemon, and Hebrews.²

T. H. Horne detects introverted parallelism in only
two NT passages (Matt 7:6; 2 Cor 2:15, 16).³ It seems that
Horne tends to emphasize the importance of parallelism over
against the focusing function of a chiasmus.⁴

¹J. A. Bengel, Gnomon Novi Testamenti (Stuttgart: J.
F. Steinkopf, 1860; based on the 3d ed., Tübingen, 1773),
xxxii, 1160-1161.
²Ibid., 1145.
³Horne, 2:513.
⁴He also uses the term epanodos (“going back”),
which refers to a parallelism that is “commencing and
concluding, with the notion to which prominence is to be
given; and . . . placing in the centre the less important
notion” (ibid., 2:513). This concept appears to be
contradictory to the basic idea of a chiasm.
N. W. Lund states in passing that there are many chiastic structures in the NT. Later, however, in his book he analyzes both OT and NT passages, including most of Revelation.

Perhaps the most notable achievement of Lund is the establishment of his "fundamental laws of chiastic structure." His seven laws can be summarized as follows:

1. The center is always the turning point;
2. There is a shift in the trend at the center;
3. Identical ideas occur in the extremes and at the center;
4. Sometimes there is a shift from the center to the extremes;
5. Certain terms in a passage tend to gravitate toward certain positions;
6. Chiastic units are introduced and concluded by frame-passages; and
7. Frequently a mixture of chiastic and alternating lines can be found within a unit.

Building on Lund's work, John W. Welch's essay considers chiasmus to be particularly influential in the following NT books: James, Galatians, 1 Corinthians, Hebrews, Ephesians, Colossians, Philemon, 1 Timothy,

2Idem, Chiasmus in the New Testament. In chaps. 7-10, he discusses 1 Corinthians, Ephesians, Colossians, Philippians, Philemon, and Romans (145-225), whereas in chaps. 11-16, the Synoptics are studied (229-319).
3Lund devotes 89 pages (ibid., 323-411) to Revelation alone.

following NT books: James, Galatians, 1 Corinthians, Hebrews, Ephesians, Colossians, Philemon, 1 Timothy, 2 Timothy, Jude, Revelation, and in certain respects the four Gospels. Welch concludes: "Where chiasmus is present, it has been found to hold a key to the perception of the central message of the book in questions."¹

J. Breck's article raises the question whether a differentiation should be made between inverted parallelism and chiasmus. He thinks the ABB'A' pattern to be considered an "inverted parallelism rather than chiasmus."² Breck further states that "the uniqueness of the chiastic structure lies in its focus upon a pivotal theme, about which the other propositions of the literary unit are developed. It therefore presupposes a center, a 'crossing point,' illustrated by the Greek letter chi (χ)."³ Breck detects "authentic chiasmus" with "a central doctrinal affirmation" in the following passages: 1 John 1:6-7; Phil

---

³Ibid., where Breck supports the figure A B' on the right and adds: "The image of concentric circles, rather than that of parallel lines, illustrates this characteristic most clearly. Because of this central focus, genuine chiasmus B A' is able to set in relief the central idea or theme the writer tries to express."
Beside these general works that cover several NT books, special attention was paid to the structure of the Letter to the Hebrews, of the Book of Revelation, and most recently, of the Pauline letters. Thomson believes that in the OT and other Semitic texts chiasmus is seen as "a literary feature," while in the Pauline letters it is more of "a rhetorical device," because the letters are "rhetorical" rather than "literary" in nature. Thomson distinguishes between "macro-chiasmus," when it covers

1Ibid., 72-73.

3Works dealing with Revelation are discussed in the next section of this dissertation.

5Ibid., 17, n. 23.
"whole sections of a book, or even a whole book,"¹ and "micro-chiasmus," when it shows a "four-member pattern," e.g., ABB’A’.² Thomson rules out the ABA pattern as chiastic, because "in principle, a chiasmus must have a minimum of four elements to make inversion of order possible."³ Thomson’s working definition of a chiasmus points to symmetry (or balance) and a central axis, as basic characteristics of this literary phenomenon.

Chiasmus may be said to be present in a passage if the text exhibits bilateral symmetry of four or more elements about a central axis, which may itself lie between two elements, or be a unique central element, the symmetry consisting of any combination of verbal, grammatical or syntactical elements, or, indeed, of ideas and concepts in a given pattern.⁴

While emphasizing symmetry and balance, Thomson also observes the paradox of asymmetry or imbalance in certain chiasms as a driving force for the argument.⁵ This feature makes the whole chiastic pattern "dynamic" and "fluid."⁶

In his conclusion, Thomson uses the terms "odd" and "even chiasmus" to designate the two types of compositions

¹Ibid., 24.
²Ibid., 23.
³Ibid., 25.
⁵Ibid., 40. Here Thomson proposes that "asymmetry or imbalance may have been deliberately used as an emphasizing device."

of the central element. A chiasm is "odd" if its central section (or element) is "unique" consisting of one element (ABCBA pattern). A chiasm is "even" if its central section has "a pair of balanced parallels" (ABBA pattern).

Thomson also reworks Lund's seven laws discussed earlier in this chapter.

Thomson's study shows a more careful and detailed approach to the complex phenomenon of chiasmus. A chiastic pattern is not the outcome of pure mathematical or geometric calculations and construction of words or sentences. It is an artful device used by biblical writers to point to the focus of a particular literary unit.

Chiasm in Revelation

This section attempts to demonstrate the complexity of chiasmus with a particular focus on the Book of

2Thomson, 26-27, where one finds 6 more carefully drafted observations that can be summarized in the following: (1) Chiasms frequently exhibit a shift at, or near, their center. (2) Chiasms are sometimes introduced or concluded by a frame passage which serves as a spring-board or a tail-piece. (3) Passages that are chiastically patterned sometimes also contain directly parallel elements; (4) Identical ideas may occasionally occur in the extremes and at the center of a given system. (5) Balancing elements are normally of approximately the same length. (6) The center often contains the focus of the author’s thought which is a particularly powerful feature with obvious implications for exegesis.
Revelation. The intention is not to provide an exhaustive structural study as such, but rather to show the role έξουσία plays within the overall chiastic pattern and context of the Apocalypse.

While it is evident that "no broad consensus exists" among scholars regarding the structure of Revelation, and "there are as many different outlines as there are interpreters," it is also true that "the literary structure [of Revelation] is the key for constructing the theological structure."

The Central Theme of Revelation

It seems odd that some scholars emphasize different themes or symbols in the Apocalypse as the main theological concern of John, without providing a supporting literary analysis. Thus, a great variety of themes—worship,

cyclical worship, oscillating oppositions of victory/hope and oppression/despair, heavenly throne (divine sovereignty or power), martyrdom, divine victory over evil (through sacrifice), and faithfulness—have been proposed recently (to mention only the prominent ones) to

convey the central message or purpose of Revelation. These studies leave the impression of subjectivity (or complexity), which can result in the rejection of a definite structure in the book.¹

Interestingly a broader scholarly consensus can be detected if one considers the theme of conflict, war, or combat² as the conceptual backdrop to Revelation. Adela Yarbro Collins, who developed Gunkel’s hypothesis, asserts that “the combat myth is the conceptual framework which underlies the book [Revelation] as a whole.”³ Elisabeth Schüssler Fiorenza suggests that “the main concern of the author [of Revelation] is not the course of history but the particular power struggle between the divine and antidivine forces which are represented on earth by the Christian community and the Roman Empire.”⁴ Richard Robert Creech believes that “the theme of conflict dominates the entire

²Hermann Gunkel, Schöpfung und Chaos in Urzeit und Endzeit: Eine religionsgeschichtliche Untersuchung über Gen 1 und Ap Joh 12 (Göttingen: Vandenhoeck und Ruprecht, 1895), is probably the first attempt to concentrate on the theme of combat myth as a prominent feature of Rev 12.

Apocalypse. The Lamb is the chief agent of God in that struggle."¹ Richard J. Bauckham² argues that, in Rev 12:1-14:5, "John portrays the combatants in the eschatological war." Later he adds that the distinctive feature of Revelation is that it "makes lavish use of holy war language while transferring its meaning to non-military means of triumph over evil."³ It has recently been re-emphasized by Barbara Wootten Snyder that the mythological framework found in the ancient combat myth "provides both literary coherence for the structure of Revelation as a whole" and also serves "to aid in the interpretation of the apocalyptic imagery and symbols."⁴ Charles Homer Giblin, on the other hand, has also argued recently that "a consistent thematic, that of God’s Holy War, pervades John’s entire composition."

Further he states that "this thematic serves to confirm the

structural unity and coherence of Revelation and to impart to it a distinctive and dominant theological emphasis."¹

**Thematic Division between Rev 11 and 12**

Another important characteristic of the Apocalypse is the thematic division between chapters 11 and 12. This division has been recognized by a great number of scholars who generally do not elaborate on the literary structure of the book or detect its overall chiastic pattern.²

Similarly, the significance of the central vision/section/scene of Revelation is attested by at least eight scholars who do not explicitly discuss the question of chiastic structures in the Apocalypse.¹ Six of these scholars consider virtually the same passage—Rev 11:19-15:4—as the center part of Revelation.²

The Chiastic Structure of Revelation

The chiastic structure of the Apocalypse itself was probably first studied in detail by Nils Wilhelm Lund who detected an overall "even chiasmus" of the book. ¹ Independently from him Kenneth A. Strand has gradually developed his literary analysis of Revelation in general,²

¹Lund, Chiasmus in the New Testament, 325-326; idem, Studies in the Book of Revelation (Chicago: Covenant Press, 1955), 27. The balanced parallelism of the central section of Lund's chiasmus contains Rev 11:1-13 (Church's Testimony in Judaism) and 12:1-17 (Church Persecuted by Judaism). Lund also provides insightful "micro-chiasms" for Rev 10-13, but, interestingly, these tend to be "odd" chiasms (Chiasmus in the New Testament, 391, 395, 398-400, 403-404), which are discussed below.

²Kenneth A. Strand, The Open Gates of Heaven: A Brief Introduction to the Literary Analysis of the Book of Revelation (Ann Arbor, MI: Braun-Brumfield, 1970), 43-45, where the term "chiasmus" or "chiasm" does not occur, but "reverse sequence" and "reverse order" of parallelisms are used instead. Strand concludes: "It seems more than coincidental that such parallelisms in theme should occur--and that they should occur in a generally reverse order!" (45); idem, "Chiastic Structure and Some Motifs in the Book of Revelation," AUSS 16 (1978): 401-408, where for the first
and of chapter 18 in particular, depicting a chiasmus within the overall chiastic arrangement of the Apocalypse.¹ It is interesting to note that while Strand proposes an "even"

¹Kenneth A. Strand, “Two Aspects of Babylon’s Judgment Portrayed in Revelation 18,” AUSS 20 (1982): 53-60, where an ABCB′A′ pattern is designated “a sort of chiasm” or “concentric symmetry” (53, n. 2); idem, “Some Modalities of Symbolic Usage in Revelation 18,” AUSS 24 (1986): 37-46, where the above ABCB′A′ pattern is called “a well-balanced chiasm” (38).

Building on Lund's pioneer work, John W. Welch advocates an "odd" macro-chiasm for the Apocalypse as a whole and thus provides a single/unique central section (or it might be called "imbalanced parallelism") for the book.1 Following Welch's study, Michel Gourgues,2 Jean-Pierre Prévost,3 and Roberto Badenas4 depict similar structures, with the only exception that they consider Rev 14 to be the center of the Apocalypse.

Beside the surface or macrostructural studies, microstructural analyses have concentrated on smaller units

1Welch, "Chiasmus in the New Testament," 248, argues that "central to the book [Revelation] is . . . the defeat of Satan and his expulsion from power." This center (marked by "E" in his chiastic pattern) comprises Rev 12:1-17.

3Jean-Pierre Prévost, Pour lire L'Apocalypse (Ottawa: Novalis, 1991), 139, where Gourgues's above pattern is adapted.

4Roberto Badenas, "Vraie et fausse adoration selon Apocalypse 14 (1ère partie)," Les Cahiers Liturgiques, no. 5 (1994): 16-26, who proposes a "precise chiastic organization" for Rev 4-22 (ABCDC'B'A' pattern), where "D" designates Rev 14, as "the entire earth is called to make a choice between true and false worship" (16-17).
of the book. These works describe both “even”\(^1\) and “odd chiasms”\(^2\) within the overall chiastic arrangement of the Apocalypse. The studies tend to focus on Rev 10-13, 18,\(^3\) and 20.

A number of scholars, therefore, consider the entire content of Revelation to be concentrically structured. Their surface structural analysis comes so close to the parallel arrangement of a chiastic pattern\(^4\) that it can be safely stated that a chiasmus and a concentric structure represent but variations of the same phenomenon.\(^5\)

\(^2\)Lund, Chiasmus in the New Testament, especially 391, 395, 398-400, 403-404, where Rev 10-13 is studied and a basic ABCB’A’ pattern is outlined for all four chapters, whereas Lund’s general outline for Revelation depicts an ABCC’B’A’ structure (325-326) discussed above; William H. Shea, “The Parallel Literary Structure of Revelation 12 and 20,” AUSS 23 (1985): 37-54, where these two chapters are considered to be “chiastic counterparts” (51) that can be outlined by an ABA’ pattern (49), which is, in a strict sense, not a real chiastic arrangement (cf. Thomson, 25).

\(^3\)See the articles by Shea and Strand on Rev 18 discussed above.

\(^4\)Cf. especially the structure of an “odd” chiasmus (ABCBA pattern), which appears to be the same as a concentric literary arrangement.

Perhaps the first attempt to describe a seven-unit arrangement of Revelation was made by Wilhelm Bousset who considered Rev 12:1-14:20 to be "The Culmination of Apocalyptic Prophecy."¹ Two decades later, Ernst Lohmeyer following a different system of dividing Revelation, focused on Rev 14:1-5 as the peak of the book.² After another ten years, Raymond R. Brewer pointed out that the "choruses" play a special role within the structure of the Apocalypse.³ His contemporary, Günther Bornkamm, emphasized parallelism as the main feature of Revelation without recognizing the importance of inverted parallelisms.⁴ Two decades later D.

Brewer, "The Influence of Greek Drama on the Apocalypse of John," Anglican Theological Review 18 (1936): 88, 90, where the importance of "choruses" in Rev 4-22 is emphasized as they form the bond between the lyric and dramatic elements in the plot of Revelation, thus providing concentric circles within the overall structure.

F. Montagnini observed parallelism and progress in the three septenaries of the Apocalypse,¹ used the term “concentric circles,”² and pointed to the complementary nature of Rev 12-14 and 17-21.³ Within the next few years Mathias Rissi developed a tripartite structure of Revelation,⁴ which was shortly adopted and modified by Elisabeth Schüssler Fiorenza.⁵ Also within a few years, the study of Jacques parallel elements of Revelation (e.g., 8:2-11:19 and 15:1-16:21; 12-13 and 17-18; 14:1-20 and 19:1-21) the concentric structure of the book can be outlined.

²Ibid., 186, 196.

³Ibid., 185.

Ellul depicted a symmetrical ordering of the Apocalypse, where everything is organized around its central part, which in turn focused on the crucifixion of Jesus.2

A symmetrical ordering characterizes the structural study by Elisabeth Schussler Fiorenza who established a “concentric pattern” of ABCDC’B’A’, where “D” (Rev 10:1-15:4) represents the “climactic center” of Revelation,3 which is “the prophetic interpretation of the political and religious situation of the community.”4 In her most recent work on Revelation Fiorenza maintains the same surface structure (ABCDC’B’A’ pattern) discussed above with the combined into 3 sections, being 4:1-19:10 “the central apocalyptic section”; idem, “The Revelation to John,” in Hebrews, James, 1 and 2 Peter, Jude, Revelation, 99-120, PC, ed. Gerhard Krodel (Philadelphia: Fortress Press, 1977), 102-111, where her tripartite structure follows precisely Mathias Rissi’s above mentioned structural division.

remark that "it is best envisioned as a conic spiral moving from the present to the eschatological future."¹

The idea that the Apocalypse is a drama,² which has seven "Acts" each having seven "Scenes," was revived by James L. Blevins.³ Although at first he did not explicitly state the concentric structure of Revelation, "Act IV: The Seven Tableaux (Rev 11:19-15:4)" was the obvious center of the book.⁴ In his second book, however, Blevins describes seven series of visions in Revelation, which he calls a "structuralist pattern of ABCDC'B'A'."⁵ In the center of this pattern "D" designates Rev 11:19-15:4 (Visions of Conflict),⁶ which is called the "climactic point"⁷ of the Apocalypse. Here the "timeless cyclical nature of Revelation becomes very evident."⁸

²This hypothesis had been popularized by John Wick Bowman, three decades earlier. See his studies above.

More recently Charles Homer Giblin provided insightful macro- and microstructural analyses of the Apocalypse, especially of its central section and second half. It seems that his macro-chiasms tend to be "odd chiasmus," whereas the micro-chiasms are best called inverted parallelisms.

John Eric Hurtgen in his recent dissertation on the sociolinguistic perspective of the Apocalypse takes Rev 11:19-15:4 as a test case, considering it "a pivotal section because it serves as part of the climactic center of the revelation to John." Hurtgen's study follows the

concentric structures (ABCDC'B'A' pattern) of Fiorenza and Blevins discussed above.¹

In her recent dissertation on the plot and liturgical setting of the Apocalypse Barbara Wootten Snyder² also proposes a rather long concentric structure of ABCDEFGG'F'E'D'C'B'A',³ which, based on the foregoing, can be called an "even" chiasm. She further describes the center of this concentrism (FGG'F' sections of the pattern) both as a chiasm and a parallelism.⁴ Finally, Snyder recognizes an important aspect of the concentric pattern by showing "the transitions from one temporal and/or spacial setting to another."⁵

Most recently, James H. Sims in his comparative literary analysis of Daniel and Revelation suggests a "menorah" appearance for the entire structure of the

³Ibid., 84, where the balanced center unit (GG' - Rev 11-12) refers to the contrasting correspondence between "War against the Saints on Earth" and "War against the Dragon in Heaven," respectively. Her understanding of concentric patterns is the following: "Technically, a chiasm refers to an A-B-B'-A' pattern, and concentrism refers to expanded chiastic patterns: A-B-C-etc.-C'-B'-A'. It is common, however, to refer to concentric patterns as chiasms, as well" (ibid., 81, n. 148).

Apocalypse, which resembles the concentric pattern of Fiorenza discussed above. For Sims, the "radiating center" of Revelation is 10:1-14:20, entitled "The Open Book and the Seventh Trumpet," which unnecessarily separates the seventh trumpet from the first six.

Earlier in this chapter a reference was made to Ekkehardt Müller's dissertation on the microstructure of Rev 4-11. His study—including a syntactical display of the entire Greek text and a list of most of the vocabulary of the Apocalypse—is the first comprehensive microstructural analysis of a larger part of Revelation. Based on the syntax of the Greek text Müller identifies seven large units of the Apocalypse, not counting the Prologue (1:1-8) and the Epilogue (22:6-21). He then further analyzes these

Fiorenza makes the same separation by focusing on Rev 10:1-15:4, which she calls the "climactic center" of the book. See "Composition and Structure," 366.

units and detects smaller sections or microstructures within the overall, large structure. Interestingly these microstructures all exhibit an "odd" chiasmus (ABCBA pattern) with one exception, Rev 11:11-13, where an "even" chiasm (ABCC'B'A' pattern) is detected.2

When Müller summarizes the implications of his study he remarks that the microstructural analysis was able to define the limits of passages thus helping the interpretation of small units. It has also pointed to stylistic features which help to discover the main emphasis, the intensification, and the climax of a paragraph. Finally, the analysis included the connections of passages on different levels up to the level of the entire Apocalypse.3

Following Müller's macro- and microstructural analyses of Revelation one can observe a large chiastic structure (ABCDC'B'A' pattern) of the book. Within this pattern D (Rev 11:19-14:20) signifies the literary center where one-third of the 21 occurrences of Εξουσία are concentrated. If Rev 8:2-11:18 and 15:1-18:24 (C and C') are added to the above center unit as bordering panels, they

2Ibid., 375.
3Ibid., 421-426.
contain more than two-thirds (17 out of 21) of all εὐσεβία passages in Revelation.

If one is to study εὐσεβία in full context, however, the entire content of Revelation should be considered, including the Prologue (1:1-8) and the Epilogue (22:6-21). Thus a total of nine units of the Apocalypse (ABCDED'C'B'A' pattern) is shown in Figure 2. This literary structure indicates that 17 εὐσεβία passages are concentrated in the center units (DED') of Revelation, which contain almost eleven chapters (8:2-18:24). The remaining four εὐσεβία occurrences are spread over four units (BCC'A') or four chapters (2, 6, 20, 22).

Figure 2 not only displays all nine literary units of the book but also depicts four pairs of parallel panels and points to the chiastic focus of the Apocalypse (E = 11:19-15:4), which overlaps its textual center (cf. figure 1). This macrostructure exhibits a large "odd" chiasmus. A similar literary arrangement was observed earlier in the majority of the microstructures in Revelation. Therefore, it is safe to conclude here that the Apocalypse shows the same definite chiastic ordering (ABCBA pattern) both on the macro- and the microstructural levels.

Summarizing, it is clear that although there is no scholarly consensus with regard to the structure of the
Apocalypse, the following areas of common interest can be detected:

1. The theme of conflict, war, or combat as the conceptual backdrop to Revelation
2. The thematic division between chapters 11 and 12
3. The importance of the central vision/section/act (Rev 11:19-15:4)
4. The overall chiastic/concentric structure of the Apocalypse.

What role does ἔξοψις play within the overall "imbalanced" or "odd" chiasmus of Revelation? What are the impacts of the ἔξοψις clusters on the chiastic arrangement of the whole book? How does the term function on the microstructural level?

After the following detailed analysis of the ἔξοψις passages within the structural context of the Apocalypse, the answer to this threefold question will be provided in the conclusions of this dissertation.
Fig. 2. A literary structure of Revelation. The numbers in the bottom of panels indicate the occurrences of ἐξονσία. The arrows point to the beginning and ending of major sections.
Considering the vocabulary of Revelation, it is clear that ἐξουσία is one of the key terms, beside θρόνος and προσκυνέω, employed by John. In the central units (DED’) of the above described chiastic ordering, which cover Rev 8:2-18:24, ἐξουσία and προσκυνέω are clustered, carrying the dynamism of the struggle of antidivine powers hostile to God and His people. Interestingly the third term, θρόνος, is clustered (27 out of the 47 occurrences) in unit C (4:1-8:1) of Revelation. From a structural point of view this

1The terms θρόνος and προσκυνέω appear much more times in Revelation than in any other NT writings (47 times out of 62 and 24 times out of 60, respectively). It is important to note here also that the theme of God’s kingship or kingly rule—expressed by the Greek βασιλεία (Rev 1:6, 9; 5:10; 11:15; 12:10) and βασιλευόω (Rev 5:10; 11:15, 17; 19:6; 20:4, 6; 22:5)—is one of the major concerns of John as it is opposed to antidivine dominion (Rev 16:10; 17:12, 17, 18).

2Cf. the heavenly throne theme in Revelation, listed above. See also Jon Paulien, "The Role of the Hebrew Cultus, Sanctuary, and Temple in the Plot and Structure of the Book of Revelation" AUSS 33 (1995): 245-264. He notices that allusions to the Hebrew cultus “appear primarily in the passages which introduce the various visions in the Apocalypse” (247-248). I may add here that all 7 units of Revelation, outlined by Paulien, also have determinative endings. Whereas the “introductions” can be labeled “sanctuary (ὁ ναός) settings,” the “conclusions” might be called “throne (ὁ θρόνος) settings” (cf. Rev 3:21; 7:13-17; 11:15-18; 15:2; 20:11-14; 22:1-5). Such structuring of the seven visions clearly conveys John’s powerful message: God is παντοκράτωρ, both in a cultic and a legal sense.
perhaps indicates that (1) unit C is a powerful theological background (or introduction) to the rest of the Apocalypse, especially to its central units, and (2) God is omnipotent and His ultimate triumph is certain because He is in control of every upcoming event described in Revelation.

In the parallel units of ABCC'B'A' one finds only four ἐξουσία passages. These have no direct impact on the dramatic nature of the antidivine power struggle.

The "imbalanced" structure of the Apocalypse focuses the reader's attention on the high peak of this power struggle. As was noted earlier, an imbalance in chiasmus can serve as a driving force for the advancement of an

5Looking at the macrostructure of the entire Apocalypse, however, all these four ἐξουσία passages have eschatological significance, discussed below.

6The three central units (DED') can be labeled "Activity and judgment of antidivine powers." Unit E itself describes the high intensity of this power struggle by presenting the "woman" and "her seeds" versus the "dragon" and his two "beasts."
argument. This seems precisely to be the case in Revelation.

The noun εξουσία, as part of the key terms used by John to make his dramatic scenes more vivid, carries the possibility of an abuse or misuse of power. It occurs that an abuse of power/authority is the motivating force behind coercion and power worship described in the Apocalypse. Thus, Revelation points to the source of conflict rather than simply depicting an apocalyptic combat.

The εξουσία clusters—especially in the chiastic focus (unit E)—demonstrate the theological intention of John. He describes an abusive and destructive system, which ironically mimics God and the Lamb while its sole purpose is self-assertion or self-aggrandizement. This source of conflict, which leads to the apocalyptic combat, is expressed by the εξουσία clusters not only in unit E but in units DD’ as well. Therefore, the apocalyptic combat theme becomes central to Revelation.

2This phrase perhaps carries more weight in the context of the Apocalypse than Christian war, combat, conflict or battle suggested by scholars. See an earlier discussion of these terms under the subtitle “Chiasm in Revelation.”

3Cf. the Greek phrases τίς δύοος τῷ θηρίῳ (13:4) and είχεν κέρατα δύο δύοια ἄριστον καὶ ἐλάληε ὡς δράκων (13:11).
As this section proceeds macro- and microstructural analyses of the ἐξουσία passages are carried out to show what role the term plays in the book. After the microstructural analysis of a given literary unit, key terms and stylistic peculiarities are pointed out. First, the four pairs of parallel units (A-A', B-B', C-C', and D-D') are investigated, then the study focuses on the central unit (E) of Revelation.

The Prologue and the Epilogue

In the furthermost two elements of the chiastic structure (A and A'—the Prologue [1:1-8] and the Epilogue [22:6-21]), one finds ἐξουσία only in the Epilogue (22:14). This passage, the seventh of the Beatitudes in Revelation, has two major variations, which do not affect the role of ἐξουσία within the text.

1 The NTG reads: Μακάριοι οἱ πλήνοντες τὰς στολὰς αὐτῶν, ἵνα ἔσται ἡ ἐξουσία αὐτῶν ἐπὶ τὸ ξύλον τῆς ζωῆς καὶ τοῖς πυλώσαν εἰς ἑτέλθωσιν εἰς τὴν πόλιν.

2 The seven sayings alternatively appear in the singular (1:3; 16:15; 20:6; 22:7) and in the plural (14:13; 19:9; 22:14). In two instances (20:6 and 22:14) ἐξουσία is part of the saying.

3 Codices Sinaiticus and Alexandrinus read πλήνοντες τὰς στολὰς αὐτῶν whereas the Majority text witnesses ποιοῦντες τὰς ἐντολὰς αὐτοῦ. The variation is probably a scribal intention; cf. Swete, 307.
From a macrostructural point of view the Epilogue has its chiastic counterpart in the Prologue where one finds the balancing first macarism.¹ This blessing has a clear parallel in the next-to-the-last Beatitude (22:7),² and also in Rev 22:18a.³ It seems that although the message of Rev 1:3 is split into Rev 22:7 and 18a, the blessing is really for those who keep "the words of the prophecy."⁴

The three Beatitudes in the Prologue and Epilogue point to the Parousia, thus providing an important element of thematic coherence for the whole "prophecy"⁵ of Revelation. The book starts and ends with the emphasized notion of the Second Advent.

¹Rev 1:3 reads: μακάριος ο άναγιγώσκων καί οί ἀκούοντες τούς λόγους τῆς προφητείας καί τηροῦντες τὰ ἐν αὐτῇ γεγραμμένα, ὅ γάρ καιρὸς ἐγγύς.

²Rev 22:7 reads: καὶ ἵνα ἔρχομαι ταχύ, μακάριος ὁ τηρῶν τοὺς λόγους τῆς προφητείας τοῦ βιβλίου τούτου.

³The Greek reads: Μαρτυρῶ ἐγὼ παντὶ τῷ ἀκούοντι τοὺς λόγους τῆς προφητείας τοῦ βιβλίου τούτου.

⁴It is noteworthy that both the first and the next-to-the-last Beatitudes refer to the Apocalypse as οἱ λόγοι τῆς προφητείας, which is claimed to be an intelligible message as opposed to speaking in tongues in 1 Cor 14:1-5; cf. Newman, 156.

⁵The essence of this "prophecy" is the nearness of the Second Advent. Beside the balancing macarisms the notion of the Parousia can be found an additional three times in the Prologue (1:4, 7, 8) and further two times in the Epilogue (22:12, 20).
Rev 22:13-16

Considering the immediate context of Rev 22:14, Giblin notices in vss. 14-15 a combination of blessing and curse.\(^1\) The microdynamic of the entire passage (Rev 22:13-16), however, exhibits an even chiasm, which can be displayed as follows:

A "I am saying" ἐγὼ τὸ Ἁλφα καὶ τὸ Ὡ ... 
B "Blessing" Μακάριοι οἱ πλούντες τὰς στολὰς αὐτῶν, ἵνα ἔσται ἡ ἐξουσία αὐτῶν ἐπὶ τὸ ξύλου τῆς ζωῆς ...
B' "Curse" ἐξῶ οἱ κύνες καὶ οἱ φάρμακοι καὶ οἱ πόρνοι ...
A' "I am saying" Ἔγω Ἰησοῦς ... ἐγὼ εἰμι ἡ ρίζα καὶ τὸ γένος Δαυὶδ ...

In this structure ἐξουσία occurs in one of the balancing central elements as part of the “blessing-curse” antithesis. The participle, οἱ πλούντες, is probably an equivalent to οἱ νικῶντες.\(^2\) J. M. Ford observes that Rev

22:14 has an evident parallel in Rev 7:14, which might refer to the Levitical washing of robes in preparation for a sacred meal.

The sentence flow of Rev 22:14 contains (1) a main clause and (2) a ἵνα-clause to express purpose or result:

(1) Μακάριοι οἱ πλύνοντες τὰς στολὰς αὐτῶν,

(2/a) ἵνα ἔσται ἡ ἐξουσία αὐτῶν

ἐπὶ τὸ ξύλον τῆς ζωῆς

(2/b) καὶ τοῖς πυλῶσιν εἰσέλθωσιν

εἰς τὴν πόλιν.

1The Greek text reads: Οὕτω εἰσίν οἱ ἐρχόμενοι ἐκ τῆς θλίψεως τῆς μεγάλης καὶ ἐπλυναν τὰς στολὰς αὐτῶν καὶ ἔλευκαναν αὐτὰς ἐν τῷ αἵματι τοῦ άρνίου; cf. Rev 19:7-8, which reads: χαίρομεν καὶ ἀγαλλιάζομεν καὶ δώσωμεν τὴν δόξαν αὐτῶ, ὅτι ἤλθεν ὁ γάμος τοῦ άρνίου καὶ ἡ γυνὴ αὐτοῦ ἤτοι μαζευμένη εἰς τὴν καθαρὰν καὶ ἔδοθεν αὐτῇ ἓνα περιβάλλον βύσσινον λαμπρὸν καθαρόν: τὸ γὰρ βύσσινον τὰ δικαιώματα τῶν ἁγίων ἐστιν. Here an analogous word is used for “robe” or “garment.” For a detailed discussion of these synonyms for eschatological clothing, see Charles, A Critical and Exegetical Commentary, 1:184-188, 2:127-128.

2Ford, Revelation, 348, comments: “The faithful fight the Holy War with the ‘Lamb’ but they must change their apparel before they enter the holy area and perhaps partake of the eschatological banquet.”

160

This is the only passage in Revelation (and in the Johannine writings) where the meaning of ἐξουσία comes very close to "right" in the sense that God "permits" or "grants" the victors to eat from the Tree of Life by fulfilling His own promise. It is also interesting to note here that this articular use of ἐξουσία in the nominative appears to be a rare feature in the Apocalypse, but it adds

1 It is so rendered by NASB, NIV, NKJV, and NRSV; cf. also נומ נב [Modern Hebrew NT], rev. ed. of 1976 (Jerusalem: The Bible Society in Israel, 1991), where מוע (right, droit) is the translation of ἐξουσία in Rev 22:14.

2 Robert L. Thomas, Revelation 8-22: An Exegetical Commentary (Chicago: Moody Press, 1995), 506, concludes that "this final blessing deals with the ultimate issues of life-access to the Tree of Life (22:2) and entrance to the Holy City (21:25)."

3 Rev 2:7 reads: τῷ νικώντι δῶσαι αὐτῷ φαγεῖν ἐκ τοῦ ξύλου τῆς ζωῆς, δέ εστὶν ἐν τῷ παράδεισῳ τοῦ θεοῦ. On this background it seems clear that ἐκ τοῦ ξύλου τῆς ζωῆς in Rev 22:14 simply means "to the tree of Life" and not "over the tree of Life." In other words, the focus is on the gift of salvation not on "civic rights" per se. For this interpretation, see Jurgen Roloff, The Revelation of John: A Continental Commentary, trans. John E. Alsup (Minneapolis, MN: Fortress Press, 1993), 251; John F. Walvoord, The Revelation of Jesus Christ (Chicago: Moody Press, 1966), 336; cf. also George R. Beasley-Murray, John, WBC, vol. 36 (Waco, TX: Word Books, 1987), 13, where a comparison is made to John 1:12, ἐδώκεν αὐτοῖς ἐξουσίαν, emphasizing the gift aspect of ἐξουσία.

4 Out of its 21 occurrences there are only three more verses in Rev 9:10, 19, and 12:10, where the articular ἐξουσία is used in the nominative. For the importance of the articular and anarthrous use of ἐξουσία in Revelation, see Charles, A Critical and Exegetical Commentary, 1:75.
more weight to the universal, eschatological fulfillment of this verse.¹

The Seven Churches and the New Jerusalem

Comparing the next two elements of the chiastic structure (B and B’- The Seven Churches [1:9-3:22] and The New Jerusalem [21:1-22:5]), one finds εξουσία only in Rev 2:26. From a macrostructural point of view, the lack of εξουσία in one of the chiastic counterparts (21:1-22:5) may indicate that the possibility of misusing authority/power will not be a question in the New World anymore. In Rev 22:5b βασιλεία refers to the kingly reign of the redeemed with God as it is opposed to antidivine dominion. ²

Revised 2:26-28

The εξουσία passage (Rev 2:26-28) has two important parallels in Revelation itself,³ and two allusions in the

¹Cf. ibid., where Charles considers this articular form of εξουσία “abnormal” and “to be equal simply to εξοικείαν εξουσίαν.” Following his earlier argumentation, however, that with the article full authority is implied within a particular context, it is reasonable to state that since Rev 22:14 refers to an eschatological reward, εξουσία does not mean a limited authority or right.

³Rev 2:26-28 read: καὶ ὅ νικῶν καὶ ὁ τιμῶν ἄχρι τέλους τὰ ἔργα μου, δώσω αὐτῶι εξουσίαν επὶ τῶν εθνῶν καὶ ποιμανεῖ αὐτοὺς ἐν
LXX. One of the allusions in the LXX, Pss. Sol. 17:23b-24, provides a clear indication that Ps 2:8-9 was interpreted Messianically as early as the first century B.C. The parallels in Rev 12:5 and 19:15a do not simply reaffirm the Christocentric interpretation of Ps 2:8-9, they also emphasize the themes of eschatological Messianic ruling power and judgment.

The microdynamic of Rev 2:26-28 exhibits an odd chiasm with an important introductory "frame passage,"

ράβδω σιδηρά ὡς τὰ σκεύη τὰ κεραμικά συντρίβεται, ὡς κἀγὼ εἰλήφα παρὰ τοῦ πατρὸς μου, καὶ δώσω αὐτῷ τὸν ἀστέρα τὸν πρωίνων. The parallels are Rev 12:5, which reads: καὶ ἔτεκεν υἱὸν ἄρσεν, ὁς μέλλει ποιμαίνειν πάντα τὰ ἐθνη ἐν ράβδῳ σιδηρᾷ καὶ ἡρπάσθη τὸ τέκνον αὐτῆς πρὸς τὸν θεὸν καὶ πρὸς τὸν θρόνον αὐτοῦ, and 19:15a, which reads: καὶ ἐκ τοῦ στόματος αὐτοῦ εἰκορείεται ρομφαῖα ὅξεια, ἱνα ἐν αὐτῇ πατάξῃ τὰ ἐθνη, καὶ αὐτὸς ποιμαίνει αὐτοὺς ἐν ράβδῳ σιδηρᾷ.

"Thomson, 27, observes that "a 'frame-passage' is a spring-board from which to launch into the chiastic . . . without itself being part of the chiastic pattern."
which refers to the overcomers. The unit shows the following pattern:

Καὶ ὁ νικῶν καὶ ὁ τηρῶν ἀχρί τέλους τὰ ἔργα μου,

A “Promise” δώσω αὐτῷ ἐξουσίαν ἐπὶ τῶν εθνῶν
B “Ruling” καὶ ποιμανεῖ αὐτούς ἐν ῥαβδῷ σιδηρῷ
C “Judgment” ὡς τὰ σκέυη τὰ κεραμικὰ συντίθεται,
B’ “Ruling” ὡς κἀγὼ εἶλήφα παρὰ τοῦ πατρός μου,
A’ “Promise” καὶ δώσω αὐτῷ τὸν ἀστέρα τῶν πρωίνων.¹

In this structure ἐξουσία occurs in the opening element (A) of the chiasmus, but the term can also be applied to element B’.² Καὶ ὁ νικῶν καὶ ὁ τηρῶν ἀχρί τέλους τὰ ἔργα μου, being a parallelism in itself, functions as an introduction.

Considering Rev 2:26-28 thematically, it seems that ἐξουσία is balanced against ἀστήρ πρωίνος,³ whereas part of the allusion to Ps 2:9 is a parallel piece to ὡς κἀγὼ εἶληφα

¹For this micro-analysis, see Müller, 453.

²It is so interpreted by NASB (“authority”), NIV (“authority”), NRSV (“authority”), RSV (“power”).

³See elements A and A’. Cf. also Rev 22:16b, where Jesus says: ἐγὼ εἰμὶ ἡ ρίζα καὶ τὸ γένος Δαυίδ, ὁ ἀστήρ ὁ λαμπρός ὁ πρωίνος. The five ἐγὼ εἰμὶ sayings of Jesus in Revelation (1:8, 17; 2:23; 21:6; 22:16) are clustered in the extremes of the parallel units (AB and B’A’) of the overall chiastic pattern. For this phenomenon, see Thomson, 27.
This parallelism directs one's attention not only to the source of Jesus' εξουσία but also to the importance of His use of authority. The other key verb of the center is συντρίβω (to break in pieces, crush, smash, shatter), which perhaps carries a further emphasis on the theme of divine judgment already expressed in one of the meanings of ποιμαίνω.

The content of element B of the above pattern (καὶ ποιμανεῖ αὐτοὺς ἐν ῥάβδῳ σιδηρῷ) shows a closer relation to Ps 2:9 and Rev 12:5; 19:15a than it does to Pss. Sol. 17:24, therefore the canonical parallels should be preferred. This is perhaps a further indication that Christ is the norm whenever the question of authority or its use is raised. It appears that in this passage the issue of authority is not

1See elements B and B'.

2Especially if one considers the influence of ποιμαίνω (to tend like a shepherd; to rule) on the central elements (BCB') of the pattern. Cf. Charles, A Critical and Exegetical Commentary, 1:76-77, argues that the Hebrew נֶאֶר (to shepherd) sometimes can mean "to devastated, destroy," as in Jer 2:16; 6:3; 22:22; Mic 5:5; Ps 80:14. See also Ford, Revelation, 404, suggests that "a double entendre" is intended by John in Rev 2:27a.

so much historically as eschatologically oriented. In short, Rev 2:26 testifies that the followers of Christ will share in His eschatological Messianic rule by being united with Him. Therefore this share in power "does not imply cruel, heartless domination," although the overcomer "will have a place in the final decisive victory of Christ over the world forces opposed to God." The eschatological Messianic rule will be a reversal of the present antidivine power struggle.

3 Philip Edgcumbe Hughes, The Book of Revelation: A Commentary (Grand Rapids, MI: Wm. B. Eerdmans, 1990), 52, states that "what is promised to the overcomer here is really union with Christ in his universal authority"; Bruce M. Metzger, Breaking the Code: Understanding the Book of Revelation (Nashville, TN: Abingdon Press, 1993), 37, defines the ultimate reward of those who conquer as being "with their Lord."

The Seven Seals and the Seven Judgment Scenes

In the third pair of the chiastic structure (C and C' - Seven Seals [4:1-8:1] and Seven Judgment Scenes [19:1-20:15]), one finds, for the first time, two balancing occurrences of ἐξουσία. From a macrostructural point of view it is a significant new feature, because it shows how important the term is within the overall chiastic arrangement of Revelation. It appears that ἐξουσία plays a special role in the large antithetical thematic parallelism.

3For this large chiastic pattern, see Naden, 117-118, who argues that Rev 4-7 are "mirrored" in Rev 19, being "historical" and "eschatological" chapters, respectively; William H. Shea, "Revelation 5 and 19 as Literary Reciprocals," AUSS 22 (1984): 249-257, where the hymns in these two chapters are stated "structural parallels" which are "reciprocal in nature" (252, 257).
of chapters 4-7 and 19-20. Thus, in Rev 6:8 θάνατος, "death," is hypostatized together with Hades, whereas in Rev 20:6 ο δεύτερος θάνατος, "second death," a phrase unique to the Apocalypse, is personified also.

3 Cf. Rev 6:10, the cry of the souls under the altar as a question: "Εἴως πότε, ὁ δεσπότης ὁ άγιος καὶ ἀληθινός, οὐ κρίνεις καὶ ἕκδικεῖς τὸ αἷμα ἡμῶν ἐκ τῶν κατακότοντων ἐπὶ τῆς γῆς; and Rev 19:1b-2, the cry of the great multitude in heaven as an answer: 'Ἀλληλούια: ἡ σωτηρία καὶ ἡ δόξα καὶ ἡ δύναμις τοῦ θεοῦ ἡμῶν, ὅτι ἀληθινός καὶ δίκαιος ὁ κρίνεις αὐτού: ὅτι ἔκρινεν τὴν πόρνην τὴν μεγάλην ἤτις ἔσθειρεν τὴν γῆν ἐν τῇ πορνείᾳ αὐτῆς, καὶ ἐξεδίκησεν τὸ αἷμα τῶν δούλων αὐτοῦ ἐκ χειρὸς αὐτῆς. For the main clusters of parallel words and ideas in chaps. 4-7 and 19-20, judgment and vengeance being the most direct and comprehensive, see Jon Paulien, "The Seven Seals," in Symposium on Revelation-Book I: Introductory and Exegetical Studies, 199-243, ed. Frank B. Holbrook, DARCOMS, vol. 6 (Silver Spring, MD: Biblical Research Institute, 1992), 204-206; cf. also Naden, 138, finds a clue to the thrust of all seven in the fifth part of each major septet; Neall, 249, where the urgent cry of the faithful ones in Rev 6:10 is considered "pivotal to the rest of the book"; Jacques B. Doukhan, Daniel: The Vision of the End, rev. ed. (Berrien Springs, MI: Andrews University Press, 1989), 102, commenting on Ps 94:1-3, asserts that "Love cannot work and save without the violence of His intervention."

2 The Greek θάνατος is the translation of the Hebrew פָּלֶג, plague, pestilence in the LXX. See especially Lev 26:25; Deut 28:21; Jer 14:12; Ezek 14:21, where the term is a part of the covenant curses.

3 For similar personification, see Rom 5:14, 21; 6:9, 12-14; 1 Cor 15:24-26; cf. also Swete, 88.

What do the emphasis and personification indicate?

Taking ἐξουσία, θάνατος, and ἐδοθη together as they are interrelated, it seems evident that the focus is on the enmity between the divine and antidivine powers,¹ which is expressed later as a cosmic struggle.² Considering the importance of the divine passive, ἐδοθη, commentators usually give the following explanations: (1) even a limited power/authority is exercised only by divine permission,³ and (2) the power/authority remains under God’s control,⁴

¹Cf. Prévost, 124, where three septenaries (seals, trumpets, and plagues) are compared showing a “Judgment-Salvation” dynamism in Rev 6-22. Based on this comparison the cry of the martyrs in Rev 6:10 indicates a delay of the Parousia (salvation but not judgment), whereas Rev 19:2 evidently describes judgment on the wicked as part of the final triumph of salvation. See also Russell, 181, points out the problem of unfulfilled prophecy for apocalyptic writers.

²See especially Rev 12:7-12, and its study below.

³Hughes, 87; Morris, 107; Paulien, “The Seven Seals,” 232-233; Powell, 74.

⁴Bruce M. Metzger, Breaking the Code: Understanding the Book of Revelation (Nashville, TN: Abingdon Press, 1993), 57, states that “because God gave humankind free will, there is always the possibility that we might misuse the portion of power entrusted to us. . . . Wars, starvation, devastation--these are the means by which it is made plain that power abused is still under God’s control.”
although it is misused. This is perhaps a reflection on God’s mercy.¹

Rev 6:8

The microdynamic of Rev 6:8 does not exhibit chiastic or parallel elements, but one can observe the centrality of ἐξουσία and the embracing occurrence of θάνατος, which perhaps are emphasizing devices:

(1) καὶ εἶδον, καὶ ἴδοὺ ἵππος χλωρός,

(a) καὶ ὁ καθήμενος ἐπάνω αὐτοῦ δυναμα αὐτῷ [b] θάνατος,

(b) καὶ ὁ ἄδης ἠκολούθει μετ’ αὐτοῦ

(2) καὶ ἔδωκεν αὐτοῖς ἐξουσία ἐπὶ τὸ τέταρτον τῆς γῆς

ἀποκτεῖναι (a) ἐν ῥομφαίᾳ

(b) καὶ ἐν λιμῷ

(c) καὶ ἐν θανάτῳ

(d) καὶ ὑπὸ τῶν θηρίων τῆς γῆς.²

Charles suggests that there are interpolations in this passage³ but his argument does not seem to be

¹Ford, Revelation, 108, notes that the influence of Death and Hades restricted “to one fourth of the earth may be symbolic of God’s mercy,” although it is still “an awesome judgment”; cf. Walvoord, 130-131.

²For a similar micro-analysis, see Müller, 507.

³Charles, A Critical and Exegetical Commentary, 1:169-171, is specific about καὶ ὁ ἄδης ἠκολούθει μετ’ αὐτοῦ and
convincing. Based on the foregoing, Rev 4:1-8:1 and 19:1-20:15 make up a satisfactory parallelism within the thematic organization of Revelation.

**Rev 20:1-10**

C. H. Giblin rightly observed that Rev 20:1-10 forms a "concentric structure," with vs. 6 as part of the central unit (vss. 4-6). The microdynamic of the passage exhibits the following inverted parallelism or ABA' pattern:

A  "Binding of the Dragon" (20:1-3)

Καὶ εἶδον ἄγγελον ... καὶ ἔδησεν ... τῶν δράκων

B  "1000-year reign of Christ and His priests" (20:4-6)

Καὶ εἶδον θρόνους καὶ ἐκάθισαν ἐπ' αὐτοῦς ... καὶ ἔζησαν καὶ ἐβασίλευσαν μετὰ τοῦ Χριστοῦ

A'  "Loosing of Satan" (20:7-10)

Καὶ ... λυθήσεται ὁ Σατανᾶς ἐκ τῆς φυλακῆς αὐτοῦ ...

ἀποκτεῖναι ἐν ῥομφαίᾳ καὶ ἐν λυμῷ καὶ ἐν θανάτῳ καὶ ὑπὸ τῶν θηρίων τῆς γῆς.

1Charles argues that there should be only four horses in this passage, therefore the ὁ ἀδης-clause makes it redundant and confusing, and that the use of θάνατος with a different meaning in the last clause is carelessness. A careful study of the larger context of the Apocalypse, however, shows that the pairing of these terms is not uncommon to the book (see 1:18; 20:13, 14), on the contrary, it has an important role within the overall parallel structure (or chiasmus).

Taking Rev 20:6 itself, the sentence flow of this Beatitude can be outlined in the following simple way:

1) μακάριος καὶ ἁγιός

ο ἐχων μέρος ἐν τῇ ἀναστάσει τῇ πρώτῃ:

2) ἐπὶ τῶν ὀ δεύτερος θάνατος

   (a) σὺν ἔχει ἐξουσίαν,

   (b) ἀλλ’ ἔσονται ἱερεῖς τοῦ θεοῦ καὶ τοῦ Χριστοῦ

   (c) καὶ βασιλεύσουσιν μετ’ αὐτοῦ [τὰ] χίλια ἔτη.¹

This verse shows neither chiastic nor parallel structures. But one can observe the antithesis between ἐξουσία and βασιλεύω, which points to the end of death’s present dominion over the redeemed.² Within the above-described inverted parallelism, however, ἐξουσία occurs in the central part, which perhaps indicates the focus of the passage dealing with the binding and loosing of Satan.

In summary, these balancing elements (C and C’) of the overall chiastic pattern of the Apocalypse carry the antithetical themes of both the limited authority of θάνατος and the final cessation of its power over the

redeemed. In other words, Revelation is in harmony with the "already and not yet" eschatological concept of the NT.:

The Seven Trumpets and the Seven Plagues

Comparing the last two balancing elements of the chiastic structure (D and D' - The Seven Trumpets [8:2-11:18] and The Seven Plagues [15:5-18:24]) one encounters a heavy concentration or clustering of the εἰρήνη passages. In the Seven Trumpets section the term appears six times, while in the Seven Plagues section εἰρήνη occurs four times. From a macrostructural point of view the Trumpets and Plagues have both thematic parallel elements and striking contrasts. These characteristics show a

1Cf. the different aspects of this "spiritual tension" expressed by Paul in Rom 5:1-5; 6:22-23; 8:18-25.

2Out of its 21 occurrences in Revelation εἰρήνη can be found 10 times (almost 50 percent) in these bordering panels of the central section.

3See Rev 9:3, 10, 19; 11:6, which are part of the fifth and sixth trumpet blasts.

4See Rev 16:9; 17:12-13; 18:1, which are related to the fourth plague and the destruction of Babylon.

5These elements include geographical (earth, sea, waters, Euphrates) and cosmic (sun) locations as well as natural disasters (lightning/thunder, earthquake, hails).

6These contrasts involve a gradual expansion on territorial limitations, from one fourth (fourth seal) to one third (first through fourth trumpets), then to the total surface of the earth and sun. For a detailed analysis of
progression in divine and antidivine activities, as well as in the nature of God’s judgment leading to the final consummation.¹

Since the Trumpets are to be interpreted as symbols of spiritual realities,² the ἡξορώματα passages of this section have to be explained in the same manner. An important observation is that the fifth element of three Septenaries (Seals, Trumpets, and Plagues),³ or perhaps that of all four (including the Letters to the Seven Churches),⁴ provides a dramatically changed scene. This changed scene points to a new direction in these visions.

Taking into account the thematic parallelism of sections D and D’, one finds their corresponding fifth elements to be Rev 9:1-12 and 16:10-11, respectively. Their comparison indicates that “they are but different aspects of substantially the same course of procedure.”⁵ In other these parallel and contrasting elements, see Paulien, Decoding Revelation’s Trumpets, 340-343.

words, under the fifth trumpet the activity\footnote{1} of demonic forces is in view,\footnote{2} while under the fifth plague their judgment\footnote{3} is depicted.

**Rev 9:1-11**

The microdynamic of Rev 9:1-11 shows an odd chiasm, which Giblin calls a "concentrically arranged"\footnote{4} structure. The passage can be outlined as follows:

A "A fallen star opens the abyss" (9:1-2)

\begin{quote}
καὶ εἰδὼν ἀστέρα ἐκ τοῦ σύμφωνου πεπτωκότα ... καὶ ἤνωξεν τὸ φρέαρ τῆς ἀβύσσου
\end{quote}

B "Power is given to the locusts" (9:3-5)

\begin{quote}
καὶ ἐκ τοῦ κατηκοῦ ἐξῆλθον ἀκρίδες ... καὶ ἐδόθη αὐταῖς ἐξουσία
\end{quote}

C "In those days" (9:6)

\begin{quote}
καὶ ἐν ταῖς ἡμέραις ἐκείναις
\end{quote}

\footnote{1} Cf. the detailed and vivid picture of a five-month torture by locust-scorpion-horses having human faces and lions' teeth in Rev 9:1-11. It is also noteworthy that this battle is self-destructive for it is directed toward τοὺς ἀνθρώπους οἵτινες ὤνῃ ἔχουσι τὴν σφαγία τοῦ θεοῦ ἐπὶ τῶν μετώπων.

\footnote{2} See the importance of ἀβύσσος in this regard as it is discussed below.

\footnote{3} Cf. the darkened kingdom of the Beast (who received his δύναμις, θρόνος and ἐξουσία from the Dragon) in Rev 16:10-11, where people became inactive because of pain.

B' “Power is in their (locusts) tails” (9:7-10)

καὶ ἐν ταῖς ὁφραῖς αὐτῶν ἡ ἐξουσία αὐτῶν

A’ “Their king is the angel of the abyss” (9:11)

ἐξουσίαν ἐπὶ αὐτῶν βασιλέα τὸν ἀγγέλον τῆς ἀβύσσου.

Within this chiasmus ἐξουσία occurs three times (Rev 9:3, 10) in two parallel units (B and B’). This is perhaps a conceptual balancing of corresponding elements.¹ The clustering of the term, on the other hand, also indicates intensification as well as focusing.² It appears as if John was using a magnifying glass to highlight a small but crucial detail.

The central element (C) of this chiasmus is particularly important as an imbalanced piece (vs. 6)³ which shifts to an “end-time phrase” (ἐν ταῖς ἡμέραις ἑκείναις),⁴

¹For this important literary device, see Thomson, 223-224, where he concludes that the purpose of the balancing of corresponding elements is either repetition (or recapitulation), contrast or expansion, or a combination of these. In our case expansion seems to be the goal.

²Cf. how John explains the torture by the locusts as he compares them first to the power (ἐξουσία) of the scorpions in general then to the power (ἐξουσία) of their tails (ὁφραί) in particular.

³The Greek reads: καὶ ἐν ταῖς ἡμέραις ἑκείναις ζητήσουσιν οἱ ἀνθρώποι τὸν θάνατον καὶ οὐ μὴ εὑρήσουσιν αὐτόν, καὶ ἐπιθυμήσουσιν ἀποθανεῖν καὶ φεύγει ὁ θάνατος ἀπ’ αὐτῶν.

⁴Giblin, The Book of Revelation, 102.
thus introducing a sudden change in terminology. It is evident that vs. 6 contains the focus of John’s thought. The present tense of the phrase φεύγει ὁ θάνατος ἀπ’ αὐτῶν could perhaps be designated “historical present” with future meaning. The repetition of οἱ ἄνθρωποι in the balancing elements (vss. 4, 5, 7 and 10 in BB’) also contributes to the dramatic tone of this structure.

One of the key terms employed in this passage is ἀβυσσός, which occurs seven times in Revelation and always in connection with τέρας. A careful study of these passages indicates that their focus is either on the activity or on the inactivity of demonic forces. The two additional occurrences of ἀβυσσός in the NT seem to support this usage.

2Ibid., 27.
3Rienecker and Rogers, 832, interpret the clause “death keeps fleeing from them.” Such a personification of θάνατος is a carefully worked out irony.
5Rev 9:1, 2, 11; 11:7; 17:8; 20:1, 3.
7In Luke 8:31 the relationship between demons and the abyss is clearly stated, whereas in Rom 10:7 ἀβυσσός seems to refer to a place where Christ was laid dead.
The LXX translates the Hebrew אַמָּה in the sense of "deep waters" or the "depth" of the earth.\(^1\) The term appears 49 times in the LXX, mostly in the Poetic/Wisdom literature (34 times). In about 35 instances the context is water/sea. In Revelation, however, θάλασσα is never connected to ἀβυσσὸς.

Other key words and phrases in this passage include ἄστερα πεπτωκότα,\(^2\) ἀκρίδες and σκορπίοι,\(^3\) μῆνας πέντε,\(^4\) and

---

\(^2\)A similar expression is used at the third trumpet blast (8:10), but the context there indicates that spiritual falling of leading Christian teachers is to be understood in the first place; cf. Paulien, *Decoding Revelation’s Trumpets*, 403. In Rev 9:1, however, a reference to Satan’s fall is more likely. The context of the passage (9:1-11) and the thematic parallelism of Revelation (cf. 12:9) support this proposal. See also the NT (Luke 10:18-19) and OT (Isa 14:12) allusions; cf. Giblin, *The Book of Revelation*, 101.

\(^3\)For the ancient Near-Eastern and OT backgrounds of the locusts, scorpions, and the sirocco, see Paul Lippi, "Locusts, Scorpion-Men, and the Sirocco in the Fifth Trumpet of the Apocalypse," Honors Project, Andrews University, 1974, 2-10. It can be concluded that the biblical background supports the notion of judgment as the symbolic meaning of locusts; cf. Ford, *Revelation*, 148.

Commentators generally agree that these terms in Rev 9:1-11 carry a symbolic description of the activity of demonic forces whose power is not only delegated but also controlled by God.

As was noted earlier, both the Trumpets and the Plagues show a progression in divine and antidivine activities. By comparing these two septets, however, one can observe a further development in the movements. Thus the sixth trumpet (Rev 9:13-21) describes a tremendous cavalry that not only harms but kills one-third of mankind, yet those who stay alive do not repent. The sixth plague (Rev 16:12-16), on the other hand, depicts the “last battle,” 'Αμακεθάων, on the great day of God the Almighty.

The Hebrew ἔδωκα means “destruction; place of destruction, abyss,” while the Greek Ἀπολλών is perhaps a pun on the name of the Greco-Roman god, Ἀπολλών; cf. Ford, Revelation, 152; Giblin, The Book of Revelation, 101. This wordplay, both in Hebrew and Greek, adds further flavor to the above-mentioned irony. Cf. also John 8:44 where Jesus calls the Devil ἄνθρωποκτόνος and ψεύστης.

Hughes, 111; Morris, 128; Paulien, Decoding Revelation’s Trumpets, 226; Powell, 76; Thomas, Revelation 8-22, 31; Walvoord, 160.

Cf. Rev 16:8-10, the same results of the fourth and fifth plagues.
Interestingly both the sixth trumpet and the sixth plague build on the same set of catchwords ("river Euphrates," "mouth," and number "three"), thus providing the major features of this progression.

**Rev 9:17-19**

Within the sixth-trumpet passage one detects another odd chiasm in 9:17b-19. The microdynamic of these verses displays the following pattern:

A "Horses with lion-like heads" (9:17b)

καὶ αἱ κεφαλαὶ τῶν ἱππῶν ὡς κεφαλαὶ λεόντων

B "Fire, smoke and brimstone out of their mouths" (9:17c)

καὶ ἐκ τῶν στομάτων αὐτῶν ἐκπορευέται πῦρ καὶ καπνὸς καὶ θείον

C "One third of mankind was killed by these three plagues" (9:18a)

ἀπὸ τῶν τριῶν πληγῶν τούτων ἀπεκτάνθησαν τὸ τρίτον τῶν ἀνθρώπων

B' "Fire, smoke and brimstone out of their mouths" (9:18b)

ἐκ τοῦ πυρός καὶ τοῦ καπνοῦ καὶ τοῦ θείου τοῦ ἐκπορευομένου

ἐκ τῶν στομάτων αὐτῶν

A' "Horses having serpent-like tails with heads" (9:19)

αἱ γὰρ οὐραὶ αὐτῶν ὡμοίαι ὄφεσιν, ἔχουσαι κεφαλάς.

---

In Rev 9:19 "serpent-like tails" and in Rev 16:13 "frog-like demonic spirits" are mentioned, probably indicating the same antidivine forces; cf. Rev 12:9.
Giblin calls the structure a description "in a concentric fashion." The focus of this arrangement is the centrally placed element (C), which points out the increase in demonic activities. The fifth trumpet brought not killing but torture (βασανισμός). The clear purpose of the sixth trumpet, however, is to kill (ἀποκτείνω).

Only in the last element of this microstructure (A’) one finds ἔξουσία, which explains the double intensity of the killing power of these horses. The earlier "human faces" (Rev 9:7) are not seen any more, and the source of power is not only the tail (9:10) but the mouth (9:19) as well. Finally, instead of "scorpion-like tails" (9:10) the horses now have "serpent-like tails" (9:19). This dramatic change depicts a shift from a half-human silhouette to a definitively bestial or demonic appearance. In short, the

3See Deut 28:13, 44, where the blessing promises that "the Lord shall make you the head and not the tail," whereas the curse predicts that "he (the alien) shall be the head, and you shall be the tail." See also Isa 9:15, where "the prophet who teaches falsehood is the tail." It seems that in the progress of the fifth and sixth trumpets not only the tail but the head (mouth) is also becoming demonic.

testimony of the two witnesses (prophets) will be in vain. This section further indicates that the witness of John’s first-century Christian community will also be fruitful.

This long1 reassuring enlargement is thematically divided into two sections, the first (10:1-11) focusing on John’s prophetic testimony,2 and the second (11:1-14) concentrating on the militant, prophetic Christian witness,3 even to the point of martyrdom. These sections may not be separated but must be distinguished from each other.4 In the second section έξουσια appears twice in one sentence5 thus providing a “balancing,” positive use6 of power/authority within the Seven Trumpets unit.

Rev 11:1-13

Rev 11:1-13 contains at least four subsections.¹

One can make further observations, however, by focusing on the activity of the two witnesses (11:3-12). An analysis of the microdynamic of this passage exhibits the following even chiasmus:

A "The duration of the two witnesses' testimony" (11:3-4)

καὶ προφητεύσουσιν ἡμέρας χιλίας διακοσίας ἐξήκοντα

B "The activity of the two witnesses" (11:5-6)

πῦρ ἐκπορεύεται ἐκ τοῦ στόματος αὐτῶν... οὕτω ἔχουσιν τὴν ἐξουσίαν κλείσαι τὸν οὐρανὸν,... καὶ ἐξουσίαν ἔχουσιν ἐπὶ τῶν ὦδάτων στρέφειν αὐτὰ εἰς αἷμα καὶ πατᾶξαι τὴν γῆν ἐν πάσῃ πληγῇ

B' "The activity of the beast from the abyss" (11:7-10)

τὸ θηρίον τὸ ἀναβαίνον ἐκ τῆς ἀβύσσου ποιήσει μετ' αὐτῶν πόλεμον καὶ νικήσει αὐτοὺς καὶ ἀποκτενεῖ αὐτοὺς

A' "The duration of the two witnesses' death" (11:11-12)

καὶ μετὰ τὰς τρεῖς ἡμέρας καὶ ἡμίσιν πνεῦμα ἰζών ἐκ τοῦ θεοῦ εἰσήλθεσαν ἐν αὐτοῖς.

¹Ibid., 436-437, where Giblin considers vss. 1-2, An Introduction; vss. 3-6, The Empowered Two Witnesses; vss. 7-10, Their Suffering for Their Testimony; vss. 11-13, The Vindication of the Two Witnesses.
The central two elements (BB') of this pattern contain a balanced statement regarding the divine and demonic activities. The two witnesses bear God's approval for a definite time period, while the beast's attack is abrupt, without time reference or demonic authorization. Nevertheless, for a short time the beast succeeds against the witnesses.

Giblin sees vs. 13 as the "climactic point" of the whole passage, which describes repentance. In relation to the foregoing ABB'A' structure, however, vs. 13 functions as a "tail-piece" or "frame-passage" which concludes the literary unit. This piece is obviously not without importance because it shows the ultimate effect of the witnesses, at least on the "remnant," οἱ λοιποὶ.

2 Cf. Rev 13:2, 5, where both time reference and power source are provided for the beast's activity.

3 Cf. Rev 13:7a, καὶ ἔδωκεν αὐτῷ πολέμος μετὰ τῶν ἁγίων καὶ νικήσας αὐτοὺς, for a similar wording of the beast's success, where only the last phrase of Rev 11:7, καὶ ἀποκτενεῖ αὐτοὺς, is missing. See also Dan 7:21 (θ). Giblin, "Revelation 11:1-13," 444. It should be noted, however, that neither μετανοεῖ nor μετάνοια is used in this passage (cf. Rev 9:20-21 and 16:8-11, where the verb form is used). Giblin's valid statement is perhaps based on the observance that the terms employed in the last clause of Rev 11:13, καὶ οἱ λοίποι ἐμφασοῦν ἐγένοντο καὶ ἔδωκαν δῶξαν τῷ θεῷ τοῦ σώρου, carry the notion of repentance.

4 Giblin, “Revelation 11:1-13,” 444. It should be noted, however, that neither μετανοεῖ nor μετάνοια is used in this passage (cf. Rev 9:20-21 and 16:8-11, where the verb form is used). 5 Thomson, 27.
Based on the above-displayed chiasm, it seems clear that John’s focus is not on a specific time period but on the prophetic activity of the witnesses. As noted above, the witnesses’ use of power can be contrasted with the misuse of power in the fifth and sixth trumpets.

The identity of the two witnesses is an enigma. They may characterize the “post-70 Christian mission,” with

1. The time given to the witnesses in Rev 11:3 is “1260 days”; cf. Rev 12:6 for the same number, and Rev 11:2; 13:5 for the same period of time (42 months).

2. Edwin Earl Reynolds, “The Sodom/Egypt/Babylon Motif in the Book of Revelation” (Ph.D. dissertation, Andrews University, 1994), 221. In Rev 11:5-6 a reversed chronology can be observed. First references are made to the miracles performed by Elijah (vss. 5, 6a; cf. 2 Kgs 1:10; Sir 48:3; Jer 5:14; 1 Kgs 17:1) then to the plagues brought about Egypt by Moses (vs. 6b; cf. Exod 7:17).

4. Even the misused power of the “locusts” and “horses” was limited by God. See the above notes on Rev 9:1-21 regarding the expansion of these powers; cf. also above comments on Rev 6:7.

5. See Num 35:30; Deut 17:6; 19:17 for the duality of the witnesses, and John 5:31-32, 36-37; 8:13-18 for the unity of the witnesses.

a worldwide prophetic perspective, or perhaps the content of this prophetic ministry in mind. In short, John’s goal in Rev 11:1-13 is to provide instruction “containing the divine Spirit’s explanation of the future course of the prophetic ministry.”

Rev 16:8-9

The next ἔξοσια passage within the thematic parallelism of the Trumpets and Plagues is Rev 16:8-9. From a macrostructural point of view this pericope finds its corresponding parallel element in the fourth trumpet (9:12). The striking contrast, however, between the opposing

---

4 The Greek reads: Καὶ ὁ τέταρτος ἔξεχεν τὴν φιάλην αὐτοῦ ἐπὶ τὸν ἑλίου, καὶ ἐδόθη αὐτῷ καυματίσας τοὺς ἀνθρώπους ἐν πυρί. καὶ ἐκαυματίσθησαν οἱ ἄνθρωποι καῦμα μέγα καὶ ἐβλασφήμησαν τὸ δύναμιν τοῦ θεοῦ τοῦ ἔχοντος τὴν ἔξοσιαν ἐπὶ τὰς πληγὰς ταύτας καὶ οὗ μετενόησαν δοῦναι αὐτῷ δόξαν.
functions of the sun in these two passages points to an antithesis. On the surface structural level, the closest parallels to the fourth trumpet are the fifth trumpet and the fifth plague. But a careful study of the above thematic parallel elements (Rev 16:8-9 and 9:12) shows a dramatic antithesis between the fourth trumpet and the fourth plague. It seems that in the case of the fourth plague God's judgment brings an increase and intensification of activity in nature, whereas in the fifth plague, as was noticed earlier, a decrease of activity can be observed.

These opposing movements in the first four plagues and the remaining three increase the dramatic tone of the Plagues Septenary. J. M. Ford argues that the fourth

1 In the fourth plague the sun "scorched men with fire," whereas in the fourth trumpet "one third" of the sun "was darkened."

2 Paulien, Decoding Revelation's Trumpets, 408, asserts that in the fifth trumpet the darkness of the fourth becomes total, which reveals the darkness of demonic control, whereas in the fifth plague the "darkness" is an apparent reversal of demonic control. It is important to note here, however, that this "control" is already limited by God in the fifth trumpet (see the clustering of the divine passives, ἐδόθη and ἐρρέθη, in Rev 9:1, 3, 4, 5).

3 These two extremes (darkness and burning heat) are opposing signs of misfunctions of the sun; cf. Gen 1:17-18, where the purpose of the sun is φαίνειν ἐπὶ τῆς γῆς... καὶ διαχωρίζειν ἀνὰ μέσον τοῦ φωτός καὶ ἀνὰ μέσον τοῦ σκότους (LXX).

4 See above notes on Rev 9:1-12 and 16:10-11.

5 For the importance of the fourth and fifth elements in the Septenaries, see Milligan, 93; Naden, 138.
plague is the antithesis of the cloud by day, while the fifth one of the pillar of fire by night from the Exodus tradition. She also perceives the fine irony built on the same tradition, which runs through the whole section. Against this background A. Y. Collins observes some important parallelisms of Rev 16:5-7 in the literary center (unit D) of Revelation.

The microdynamic of Rev 16:8-9 shows the following main inverted parallelism (AA') with important "frame-passages," particularly a "tail-piece":

Kai o téartos έξέβεβεν τὴν φιάλην αὐτοῦ ἐπὶ τὸν ἥλιον

A "It (sun) was given to scorch men with fire" (vs. 8)

καὶ ἔδοθη αὐτῷ καυματίσαι τοὺς ἀνθρώπους ἐν τούρι

A' "Men were scorched with fierce heat" (vs. 9a)

καὶ ἐκαυματίσθησαν οἱ ἄνθρωποι καῦμα μέγα

2Ibid. Ford points out the liturgical φιάλη and ἐμνήσθη which do not bring blessing but destruction in this context; cf. Rev 18:5.

a καὶ ἐβλασφήμησαν τὸ ὄνομα τοῦ θεοῦ
b τοῦ ἐχοντος τὴν ἐξουσίαν ἐπὶ τὰς πληγὰς ταύτας
a’ καὶ οὐ μετενόησαν δούναι αὐτῷ δόξαν.

The main inverted parallelism serves as a minor literary device emphasizing the dramatic tone of the plague which falls on the lost. Interestingly G. B. Caird points out another parallelism in Rev 7:16b which antithetically demonstrates one of the eschatological rewards of the redeemed.

The conclusion or “tail-piece” itself also forms another inverted parallelism (aba’ pattern) which focuses on God’s ultimate authority. A comparison of these inverted parallelisms (AA’ and aba’) clearly indicates John’s

1 It appears that πῦρ is the focus of this clause. For the importance of “fire” in Revelation denoting God’s judgment or wrath, or the eschaton, see Paulien, Decoding Revelation’s Trumpets, 248-249.

2 The Greek reads: οὐδὲ μὴ πέσῃ ἐπ’ αὐτοὺς ὁ ἥλιος οὐδὲ πᾶν καῦμα.

intention to emphasize that God is in absolute control,¹ even when He gives permission or delegates authority.²

The vivid picture ends with a negative result which resembles the consequences of the sixth trumpet.³ The blasphemous unrepentance manifested in the fourth, fifth, and seventh plagues⁴ is an evident sign of the "typical heathen spirit" as repeatedly rebels against God.⁵ In the fourth plague a fine irony can be perceived once again in the irrationality of human rebellion against God, τοῦ ἔχοντος τὴν ἐξουσίαν ἐπὶ τὰς πληγὰς ταύτας.

Rev 17:7-14

The next-to-last ἐξουσία passage within the Seven Plagues section is Rev 17:12-13.⁶ From a macrostructural

¹Charles, A Critical and Exegetical Commentary, 2:44, asserts that the articular ἐξουσία here "connotes full authority or power." See also Morris, 196.

²In Rev 16:8 it is expressed by the divine passive, ἐδόθη, which might also indicate a personification.

³The last clause of the sentence reads in Greek: καὶ οὐ μετενόησαν δοῦναι αὐτῶν δόξαν; cf. Rev 9:20-21. The aorist infinitive is used to express results; cf. Rienecker and Rogers, 848.

⁵Thomas, Revelation 8-22, 258.

⁶The Greek reads: καὶ τὰ δέκα κέρατα ἐδεῖξα τοὺς βασιλείας ἐσιν, οἵτινες βασιλεῖαν οὕτω ἔλαβον, ἀλλὰ ἐξουσίαν ὡς
point of view the overriding theme of Rev 17-18 is God’s verdict of condemnation. Although it seems that these two chapters focus in a unique way on the final outcome of the judgment over Babylon, their antithetical thematic parallel sections can be found in Rev 21-22, in the description of the New Jerusalem.

Rev 17 also shows some thematic parallelisms with chapters 11, 13, 14, 16, 18, and 19. The key phrases of these parallel passages are: πορνεύω, μεθύσκω, θηρίον, δυσμάτα blasphēmías, Βαβυλών ἡ πόλις ἡ μεγάλη, αύμα τῶν ἁγίων, βασιλεῖς μίαν ὀραν λαμβάνουσιν μετὰ τοῦ θηρίου. οὕτως μίαν γυνῆν ἔχουσιν καὶ τὴν δύναμιν καὶ ἐξουσίαν αὐτῶν τῷ θηρίῳ διδάσκοντον.

1 Giblin, The Book of Revelation, 161. The verdict is expressed by the Greek τῷ κρίμα in Rev 17:1, which points to the “result” of a judgment process (cf. Rev 18:20; 20:4). The Greek ἡ κρίσις, on the other hand, describes the “action” or “process” itself (cf. Rev 14:7; 16:7; 18:10; 19:2).

3Prévost, 146-147, where his comparison of the above chapters is entitled Des lamentations à la glorification. Considering, however, the overall chiastic arrangement of Revelation, units BB’ (1:9-3:22 and 21:1-22:5) are the primary parallel counterparts. Thus, the “Seven Churches” will eventually be united into one, the “heavenly Jerusalem”; cf. Heb 12:22-23a, which reads in Greek: ἀλλὰ προσελπισθάτη Σιών ὁρεί καὶ πόλει θεοῦ ζώντος, Ἱερουσαλήμ ἐπουρανίῳ, καὶ μυρίστιν ἀγγέλων, πανηγύρει καὶ ἐκκλησία πρωτοτόκων ἀπογεγραμμένων ἐν σύφρανοι.

4Cf. (1) Rev 17:2 and 14:8; 18:3, 9; 19:2; (2) 17:3 and 13:1, 5, 6; (3) 17:5, 18 and 16:19; (4) 17:6 and 16:6; 18:24; (5) 17:8 and 11:7; 13:8; (6) 17:9 and 13:18; (7) 17:14 and 19:11-16; (8) 17:16 and 18:8-9.
The majority of these terms are expressions of the activity and judgment of antidivine powers.

The microdynamic of Rev 17:7-14\textsuperscript{2} exhibits the following inverted parallelisms with "frame-passages":

\textit{A} "The beast from the abyss" (vs. 8)

\textit{B} "The mind which has wisdom" (vss. 9-10)

\textit{A'} "The beast goes to destruction" (vs. 11)

\textsuperscript{1}A detailed analysis of these phrases is beyond the scope of the present study. For a good comparison of common words and phrases in Rev 12-18, see Müller, 590-593, 611-613, 633-637.

\textsuperscript{2}This longer section, which includes the \textit{exousia} passage (vss. 12-13), is chosen because it forms a literary unit that can be entitled: \textit{τὸ μυστήριον τῆς γυναικὸς καὶ τοῦ θηρίου}; cf. Müller, 622-623, for a helpful analysis of this section. A further study also reveals that the angel's explanation is given in a reversed order, e.g., first about the beast (vss. 8-14) then about the woman (vss. 15-18). Regarding the woman, see also Rev 18:1-24.
A “Ten horns without kingdom” (vs. 12a)
καὶ τὰ δέκα κέρατα ... οὕτως βασιλείαν οὕπω ἔλαβον

B “Ten horns receive authority as kings” (vs. 12b)
ἀλλὰ ἐξουσίαν ὡς βασιλεῖς μίαν ὀραν λαμβάνουσιν

A’ “Ten horns give power and authority to the beast (vs. 13)
τὴν δύναμιν καὶ ἐξουσίαν αὐτῶν τῷ θηρίῳ διδάσκων

οὕτωι μετὰ τοῦ ἄρνιον πολεμήσουσιν καὶ τὸ ἄρνιον νικήσει αὐτοὺς.

It was noted earlier1 that John has a particular interest in small details. The above analysis of Rev 17: 7-142 provides a clear demonstration of that as one’s attention is drawn from the woman first to the beast, then from the beast to its ten horns.3 The double foci of this passage dealing with the seven-headed beast and its ten horns were noted earlier: 1 See above note on Rev 9:3, 10, with regard to John’s “focusing” technique.

2 Giblin, The Book of Revelation, 161-162, supports an a-x-y-z-x’-z’-a’ structure for Rev 17:8-18, which perhaps reflects on the interlinked inverted parallelisms of this passage.

3 For similar “focusing,” see Dan 7:15-28. Note also Gregory K. Beale, The Use of Daniel in Jewish Apocalyptic Literature and in the Revelation of St. John (Lanham, MD: University Press of America, 1984), 252, 259, as he especially refers to Dan 7:4-7, 20, 24, as “clear allusions” of Rev 17:7c, 12a.
horns include σοφία and ὡς βασιλείς. "Wisdom" is needed to explain (1) the double identity of the seven heads (seven mountains and seven kings) in Rev 17:9-11, and (2) the power dynamism between the scarlet beast and its ten horns in Rev 17:12-14. This passage builds on the obvious tension of having ἐξουσία but not βασιλεία. In other words, the inner division among the heads and their horns directs one's attention to their inherent failure and prospective doom. 3

They cannot help but carry out God's purpose, which is expressed by an ironic wordplay. 4

---

1 Cf. Rev 13:18a, for similar wording. See also Beale, ibid., 268-270, and my notes on Rev 13 below.

2 Charles, A Critical and Exegetical Commentary, 2:72, remarks that the ten horns "hold a quasi-kingly power"; Swete, 222, argues that "the ten βασιλείς are not βασιλείς in the same sense as the seven, but resemble them"; Thomas, Revelation 8-22, 300, concludes that the ten horns are "kings without kingdom." The interesting fact is that according to Rev 17:17, the ten horns eventually come to an agreement and will decide δοῦναι τὴν βασιλείαν αὐτῶν τῷ θεῷ. This clause clearly indicates that at some point of time the ten horns will have "the kingdom" which they unanimously hand over to the beast.

3 Rev 17:13-14, 16-17.

4 The Greek text of Rev 17:13, 17 read: οὕτωι μίαν γνώμην ἐχοὺσιν καὶ τὴν δύναμιν καὶ ἐξουσίαν αὐτῶν τῷ θεῷ διδάσασιν. ... ο γὰρ θεὸς ἐδώκεν εἰς τὰς καρδίας αὐτῶν ποιήσαι τὴν γνώμην αὐτοῦ καὶ ποιήσαι μίαν γνώμην καὶ δοῦναι τὴν βασιλείαν αὐτῶν τῷ θεῷ ἄχρι τελεσθήσονται οἱ λόγοι τοῦ θεοῦ. For a good explanation on the combination of δύναμις and ἐξουσία in this context, see Swete, 223.
One of the key phrases of the passage is τὸ θηρίον ὅτι ἤν καὶ σὺν ἔστιν καὶ παρέσται. It appears that this definition is directly contrasted with God, or perhaps it is again an ironic wordplay on the prerogative assigned to God and Jesus earlier in Revelation. This phrase is repeated in a modified form within the pericope, and, together with ἀβύσσος, it is parallel both to the beginning of demonic activity during the fifth trumpet (Rev 9:11) and to its continuation during the expansion of the sixth trumpet (Rev 11:7).

Based on the foregoing, it can be concluded that in Rev 17, in spite of God’s verdict in vs. 1, the demonic powers are still active. This activity points to the

Perhaps the most important aspects of the “beast-horns” power dynamic are: (1) the dramatic shortness\(^3\) of the time of their union,\(^4\) and (2) their ultimate failure and self-destruction.\(^5\) Generally speaking, the beast of Rev 17 represents “the principle of abusive governmental power.”\(^6\)

The beast together with its horns show “one of the inherent flaws of the will to power. It does not unite; it

divides."¹ This tragic division is later seen in the destruction of the harlot (Rev 17:16).

Rev 18:1-24

The last έξουσία passage within the Seven Plagues section is Rev 18:1.² From a macrostructural point of view, Rev 18 is part of God's verdict of condemnation.³ In the Seven Trumpets section (Rev 8:2-11:18), which is the thematic and structural parallel to the Seven Plagues, έξουσία is associated with various forces of evil or demons.⁴ In Rev 18:1, however, one finds the term used in a positive way.⁵

If one considers the context within the Seven Plagues (Rev 15:5-18:24), it is striking that the misuse of

¹Collins, The Apocalypse, 122.

²The Greek reads: Μετὰ τὰ ταῦτα εἶδον ἄλλον ἄγγελον καταβαίνοντα ἐκ τοῦ οὐρανοῦ ἔχοντα έξουσίαν μεγάλην, καὶ ἤγα\νευσθα ἐκ τῆς δόξης αὐτοῦ.

³This is the only chapter in Revelation which contains both the "action" (ἡ κρίσις, 18:10) and the "result" (τὸ κρίμα, 18:20) of the judgment process; cf. my above note on Rev 17:12-13.

⁵Cf. Rev 13:2 where the phrase, έξουσία μεγάλη, occurs too, but in a negative sense. See Ford, Revelation, 296; Swete, 226.
authority in Rev 17:12-14 is counterbalanced by God’s εξουσία in Rev 16:9, as well as by His angel’s εξουσία μεγάλη, which illuminates the earth in Rev 18:1. A similar feature was observed earlier within the context of the Seven Trumpets section.

Taking Rev 18 itself, one discerns a “concentric structure” or “chiasm,” which can be labeled an odd

1 E.g., οὐτοὶ μετὰ τοῦ ἄρνιου πολεμήσωσιν.

2 E.g., τὸ δύσμα τοῦ θεοῦ τοῦ ἑχοντος τὴν ἐξουσίαν ἐπὶ τὰς πληγὰς ταύτας; cf. Rev 16:7a, κύριε ὁ θεός ὁ παντοκράτωρ, which adds further emphasis to God’s absolute control of events on earth. For the use of παντοκράτωρ, see Rev 1:8; 4:8; 11:17; 15:3; 16:7, 14; 19:6, 15; 21:22. A careful study of the context of these passages shows that they are spread almost evenly in units CDED’C’ (4:1-20:15) of the overall chiastic arrangement of Revelation, which is significant if one focuses on the central panels of the Apocalypse. These sections may be entitled “Activity and judgment of antidivine powers.” The demonic forces (οἱ κοσμοκράτορες τοῦ σκότους τούτου, in Eph 6:12) are definitely doomed, for God is ὁ παντοκράτωρ.

3 Swete, 226, comments: “So recently has he [angel] come from the Presence that in passing he flings a broad belt of light across the dark Earth—a phrase used of the vision of God in Ez. xliii.” It is also important to note here that, as a part of the contrast, the demonic activity is associated with smoke (καπνός) and darkness (σκότος) in Rev 9:1-2, while the angelic activity is characterized by light (φως) in Rev 18:1.

chiasmus (ABCB'A' pattern). It clearly exhibits the following arrangement:

A  "Another glorious angel from heaven" (18:1-3)
   ἄλλον ἄγγελον καταβαίνοντα ἐκ τοῦ οὐρανοῦ ἐχοντα ἐξουσίαν μεγάλην

B  "Another voice from heaven (18:4-8)
   ἄλλην φωνήν ἐκ τοῦ οὐρανοῦ

C  "Laments over Babylon" (18:9-19)
   Καὶ κλαύσοντι καὶ κόμονται ἐπ' αὐτήν οἱ βασιλεῖς τῆς γῆς...

B'  "A voice in heaven" (18:20)
   Εὐφράινου ἐπ' αὐτήν, οὐρανός καὶ οἱ ἄγιοι καὶ οἱ ἀπόστολοι...

A'  "A mighty angel took up a stone" (18:21-24)
   Καὶ ἤρεν εἰς ἄγγελος ἱσχυρός λίθον...

The center of this structure (C) depicts the very moment of the destruction of Babylon. The ἐξουσία passage (18:1) is found in one of the extremes (A) of this pattern, which contributes an important aspect to the background of Babylon's fall.²

¹The drama of a rapid way of destruction is highlighted by the repetition of ὅτι μιᾶ ἀρα (cf. 18:10, 17, 19). The phrase recalls Rev 17:12, where it is used to describe the short existence of the beast-horns alliance; cf. Giblin, The Book of Revelation, 170.

²Adela Yarbro Collins, "Revelation 18: Taunt-Song or Dirge," in L'Apocalypse johannique et l'apocalyptique dans le Nouveau Testament, 185-204, ed. J. Lambrecht, BETL, 53
The essence of unit A (18:1-3) is to announce the tragic fact that Babylon ἐγένετο κατοικητήριον δαιμονίων καὶ φυλακὴ παντὸς πνεύματος ἀκαθάρτου.¹ In other words, Babylon has become the scene of evident demonic activity, which is now confronted with the "authoritative"² appearance of God’s glorious messenger who is about to carry out a great work "on behalf of God."³

The Woman Versus the Dragon

The last, imbalanced element (E - The Woman Versus the Dragon [11:19-15:5]) of the chiastic structure of Revelation contains seven εξωστία passages,⁴ which make up one-third of the total occurrences in the book. The heavy concentration or clustering³ points to a focus in John’s

¹Caird points out that Rev 18:1-3 testifies to the existence of a popular feeling about consorting of animals (birds) with demons. See Caird, Principalities and Powers, 58-59, where he argues, building on Isa 13:20-22; 34:13-15, that "not only in human life but in the world of nature there is a residue which cannot be brought into congruity with the holiness of God"; cf. Matt 8:28-34.

thought. The existence of this non-balanced central element (unit E) is a particularly powerful feature with obvious implications for exegesis.¹ It seems that the author’s focus is further underlined by “a shift” of signs (σημεῖα) at this central element of the chiasmus.²

The length of this central element (Rev 11:19-15:4) is still under discussion. A number of scholars consider Rev 12:1 (or 11:19) to 14:20 a closed unit,³ while others extend it, including Rev 15:1-4.⁴ Although Minear recognizes that Rev 12-22 relates “stages in the fulfillment

of the prophet's task (10:11)," he concludes that these chapters must be divided into smaller units.¹

Therefore, following Rev 11:18, Minear selects 11:19-15:4 as the first unit of the second half of the Apocalypse.² His reasoning includes: (1) "Heaven" is always the beginning of each vision; (2) Rev 11:19 is awkward if it is attached to the previous vision; (3) Rev 15:2-4 is an effective summary of the preceding chapters; (4) the hymn in Rev 15:3-4 is liturgically related to 11:19; and (5) in Rev 15:5 the opening of the temple again is a sign for a new set of plagues.³

To these valid observations one may add the "principle of Prolepsis or Anticipation" discussed by William Milligan.⁴ Based on this principle one can detect the use of prolepsis both in the beginning⁵ and in the

¹Minear, 115.
²Ibid., 105-129.
³Ibid., 115-116.
⁴Milligan, 114-116, particularly mentions the promises made to the overcomers in Rev 2-3 and their fulfillment in Rev 20-22.
⁵Rev 12:1, 3, which read in Greek: Καὶ σημεῖον μέγα ὄφθη ἐν τῷ οὐρανῷ, γυνὴ περιβεβλημένη τοῦ ἥλιου ... καὶ ὄφθη ἄλλο σημεῖον ἐν τῷ οὐρανῷ, καὶ ἴδον δράκων μέγας πυρρός ἔχων κεφαλὰς ἐπτά καὶ κέρατα δέκα.
ending verses of the above unit. These shifts of emphasis not only determine the contents of the following verses, but they also serve as literary devices. It appears that prolepsis is employed to mark off Rev 11:19-15:4 in a unique way, thus embracing the themes of combat and victory. Therefore, it is clear that Rev 11:19-15:4 is both a literary and a thematic center of the Apocalypse, the culmination of John's dramatic message. At this high peak he focuses on ἐξουσία and προσκυνεῖο, thus providing two dramatic keywords of the divine-antidivine power struggle.

₁Rev 15:1, 2, which read in Greek: Καὶ εἶδον ἄλλο σημείον ἐν τῷ σύμαχῳ μέγα καὶ θαυμαστὸν, ἀγέλους ἐπτά ἐχοντας πληγὰς ἐπτά τὰς ἐκσάτας... Καὶ εἶδον ὡς θάλασσαν ἐκλίνην μεμιγμένην πυρί καὶ τοὺς νικῶντας ἐκ τοῦ θηρίου...

²In the opening verses the focus turns from the Woman to the Dragon, while in the closing verses the emphasis moves from the Seven Plagues to the Overcomers.

³Thomson, 27, calls this chiastic phenomenon "shift and reversion," marking points of development in an argument.

⁴Because it is the unique, central element of the overall odd chiasmus (ABCB'A' pattern) of Revelation.

⁵Because it contains all the key figures and major events of the climactic antidivine power struggle, even including a victorious hymn of the overcomers.

⁶Out of its 21 occurrences in Revelation, it appears 7 times (12:10; 13:2, 4, 5, 7, 12; 14:18) in this unit.

⁷Out if its 24 occurrences in Revelation, it is found 9 times (13:4, 8, 12, 15; 14:7, 9, 11; 15:4) in this element.
These terms indicate the abuse of authority as a motivating force behind coercion and power worship.

**Rev 11:19-15:4**

From a macrostructural point of view Rev 11:19-15:4 serves "as the bridge"¹ between the Seven Trumpets and the Seven Plagues. Chapter 12 itself functions as "the preface"² to Rev 13-22, or as "an introduction, backdrop, and summary"³ to Rev 13-14, which "predicts a reign of terror."⁴ Chapters 13 and 14 are thematic "counterparts"⁵ that provide vivid pictures of the antidivine and divine activities with regard to worship.

The microdynamic of Rev 11:19-15:4 shows an odd chiasm (ABCB'A' pattern) with an introductory "frame-passage" which points to God's heavenly temple. The unit starts and ends with the notion of sign (σημείον) in heaven:

C. H. Giblin provides a somewhat similar analysis of a longer passage, “11:15-15:8 - The Seventh Trumpet-blast,” which he calls “a sevenfold scenario of creation-wide conflict set forth in concentric order.”1 The focus of his ABCDC’B’A’ pattern is Rev 14:1-5. Units C (13:1-18) and C’ (14:6-20) are contrapositioned describing the activities of the demonic triad (Dragon, Sea Beast, and Land Beast) and the angelic triad, respectively. Finally, units B (12:1-18) and B’ (15:1) are balancing elements depicting “heavenly signs,” but the latter unnecessarily separates vs. 1 from vss. 2-4, where it belongs. Considering the specially

1Giblin, The Book of Revelation, 15.
marked beginning and ending of Rev 11:19-15:4, it seems awkward to add Rev 11:15-18 and 15:5-8 to this section, thus separating from their literary units.¹

The focus (unit F) of my proposed structure is a remark on wisdom.² It occurs that the same rhetoric is followed in Rev 13 and 17, which are complementary chapters. Earlier in this study dealing with the microdynamic of Rev 17:7-14 it was noted that vss. 8-11 form an inverted parallelism (ABA' pattern). The central element (unit B) of that structure is a remark on σοφία,³ which is bordered by units AA' describing the activities of the beast. This perhaps indicates that the μυστήριον of the rise and fall of the beast can be explained only by those who have wisdom.

In the above structure, where σοφία appears to be in the center (unit F) again, one can observe the bordering antithetical units of EE' (Activity of the Land Beast and the Lamb). Further, the next parallel elements (units DD')

¹E.g., the seventh trumpet is cut off from the first six, and the Seven Plagues section (15:5-18:24) is left without introduction.

²Cf. Rev 17:9, where the word order is reversed. See also the doxologies of Rev 5:12 and 7:12, where σοφία is grouped with εὐλογία, δόξα, τιμή, δύναμις, and ἴσχύς.

³The Greek reads: ὅδε ὁ νοῦς ὃ ἔχων σοφίαν, αἱ ἐπτά κεφαλαί ἐπτά δρή εἰσιν, ὅπου ἡ γυνὴ καθηται ἐπ' αὐτῶν. καὶ βασιλείς ἐπτά εἰσιν: οἱ πέντε ἐπέσαν, ὁ εἰς ἔστιν, ὁ ἄλλος οὗτος ἤλθεν, καὶ οἶταν ἔληθ ὁλίγον αὐτὸν δεῖ μεῖναι.
highlight the characteristics of the holy ones, ἡ ὑπομονή καὶ ἡ πίστις τῶν ἁγίων.¹

Beale convincingly argues in his dissertation that the combined use of the Hebrew יָשָׁר (to understand, have insight) and יָבֵה (to understand, gain insight) in the Book of Daniel² is the best background against which to understand the use of νοῦς and σοφία in Rev 13:18 and 17:9a.³ This Danielic background stands for the idea of eschatological insight, especially in Dan 11:33 and 12:10.⁴ Beale concludes that this usage "indicates that John understands Christians to be the fulfillment of the prophesied mas'kilim in Daniel 11 and 12."⁵

¹Rev 13:10b. Its parallel element (14:12) has an extention including οἱ τηροῦντες τὰς ἐντολὰς τοῦ θεοῦ καὶ τὴν πιστὶν Ἰησοῦ.

⁴The phrases in the MT text read מְשָׁפֵכָלָל יְשֵׁם נְבֵי and מְשָׁפֵכָלָל יְשֵׁם נְבֵי respectively.

⁵Beale, "The Danielic Background," 165-166; idem, The Use of Daniel, 270. He offers two further suggestions: (1) the exhortations in Rev 13:10b; 14:12 may be based on Dan 12:12, and (2) the introductory formula, ὅτε, in Rev 13:10b; 13:18; 14:12 and 17:9 is John’s own way of pointing the reader back to the context of Daniel; cf. idem, "The Danielic Background," 168. Similar pointing back to the Book of Daniel can be perceived in Matt 24:15, which reads in Greek: "Ὅταν σὺν Ἰδοὺ τὸ βδέλυγμα τῆς ἐρημώσεως τὸ ἁθέν διὰ
If one considers the distribution of the seven ἐξουσία passages in Rev 11:19-15:4, it is striking that there are two balancing occurrences of the term in units B and B’, which are positive.¹ On the other hand, in units C and E (both in the first half of the chiasm) five additional ἐξουσία passages are clustered, all negative.² This balancing (or embracing) technique of describing divine and demonic activities has been observed earlier in this dissertation in the Seven Trumpets section³ and especially in the Seven Plagues section.⁴

Rev 12:1-18

The foci of the two embracing units (B and B’) are the first and second advent of Christ.⁵ The microdynamic of chapter 12 clearly exhibits a well-constructed inverted parallelism (ABA’ pattern) as follows:

Δαινήλ τοῦ προφήτου ἐστὶς ἐν τόπῳ ἄγιω, ὁ ἀναγινώσκων νοεῖτω.

¹Rev 12:10 and 14:18, respectively.
²Rev 13:2, 4, 5, 7 and 13:12, respectively.
³See the demonic activity in Rev 9:1-21 as it is counterbalanced by the activity of the divine witnesses in 11:1-14.
⁴See the demonic activity in Rev 17:12-14 as it is embraced by the divine activity in 16:9 and the angelic activity in 18:1.
⁵Bauckham, The Theology of the Book of Revelation, 94, states that “chapters 12-14 depict the messianic war from the incarnation (12:5) to the parousia (14:14-20).”
A  "The signs of a woman and the great red Dragon" (12:1-6)
   Καὶ σημεῖον μέγα ὄφθη ἐν τῷ οὐρανῷ, γυνὴ περιβεβλημένη τῶν ἡλιῶν ... καὶ ὄφθη ἄλλο σημεῖον ἐν τῷ οὐρανῷ, καὶ ἰδοὺ δράκων μέγας πυρρός ...

B  "A war between Michael and the Dragon" (12:7-12)
   Καὶ ἐγένετο πόλεμος ἐν τῷ οὐρανῷ, ὁ Μιχαὴλ καὶ οἱ ἄγγελοι αὐτοῦ τοῦ πολεμῆσαι μετὰ τοῦ δράκοντος ...

A'  "The Dragon’s war with the woman and her seed" (12:13-18)
   καὶ ὄργισθη οἱ δράκων ἐπὶ τῇ γυναικὶ καὶ ἁπῆλθεν ποιῆσαι πόλεμον μετὰ τῶν λοιπῶν τοῦ σπέρματος αὐτῆς ...

   The center of this structure is unit B which forms an inclusio that is bracketed by the cosmic and earthly scenes1 of the woman-Dragon conflict.2 The ἔξωσία passage

1The alternating vertical dimensions of Rev 12 are the following: (1) vss. 1-6: heaven-earth-heaven-earth (wilderness), (2) vss. 7-12: heaven-earth-heaven, and (3) vss. 13-18: earth (wilderness).

(12:10): is found at the very center of this inclusio, which is the textual center of Revelation.

It is noteworthy that this textual center deviates from the literary or structural center (13:18) noted above. This literary phenomenon makes sense if one considers wisdom-saying (13:18) as a reflection on the identity of John’s community, and the hymnic material (12:10b-12), including the εξουσία passage, as the central exposition of John, focusing on Jesus’ authority as a basis for perseverance. Thus, hortatory material (wisdom-saying) and exposition (hymnic material) point to a double foci in the Apocalypse.

1The Greek reads: καὶ ἡκουσα φωνὴν μεγάλην ἐν τῷ σύμαθίῳ λέγονταν, ἀρτι ἐγένετο ἡ σωτηρία καὶ ἡ δύναμις καὶ ἡ βασιλεία τοῦ θεοῦ ἡμῶν καὶ ἡ εξουσία τοῦ Χριστοῦ αὐτοῦ, ὁτι εἰπεῖ ὁ κατήγωρ τῶν ἄδελφῶν ἡμῶν, ὁ κατηγορών αὐτοὺς ἐνώπιον τοῦ θεοῦ ἡμῶν ἡμέρας καὶ νυκτὸς.

2For the proposed idea of biblical or mythical backgrounds to Rev 12:7-12, see Collins, The Combat Myth, 57-161; Prigent, 120-127; Snyder, 242-358.

3See my notes on the centrality of Rev 12:7-12 under the subheading “Εξουσία Clustering in the Apocalypse.”

4Cf. Guthrie, The Structure of Hebrews: A Text-Linguistic Analysis, 146, for similar conclusions regarding the two genres (hortatory material and exposition) in the Book of Hebrews, as they move “in concert, but not exact correspondence.”
The two key figures of Rev 12:7-12 are Michael¹ and the Dragon.² As a result of Michael’s victory over the Dragon, the hymn in vss. 10b-12 declares that Αρτι ἐγένετο ἡ σωτηρία καὶ ἡ δύναμις καὶ ἡ βασιλεία τοῦ θεοῦ ἡμῶν καὶ ἡ έξουσία τοῦ Χριστοῦ αὐτοῦ. It is clear that the last two phrases (βασιλεία and έξουσία) of this clause complement each other.³

God established the victorious authority of His Anointed

²The Greek ο δράκων is identified in Rev 12:9b, 10c as ο δησ ο άρχαίος, ο καλούμενος Διάβολος καί ά Σατανάς, ο πλανών την οικουμένην δόλη... ο κατηγορ τῶν ἀδελφῶν ήμῶν.” For Satan (Sammael) being the “accuser,” see Caird, Principalities and Powers, 34; B. Talmud Berakhoth 46a; B. Talmud Yoma 20a; Midrash on Exod 12:29. See also my notes below on the possibility of equating the Dragon with the Sea Beast (Rev 13:1-13).

³In Col 1:13 βασιλεία and έξουσία are antithetical, but in Rev 12:10 the two terms are epexegetical or parallel, thus pointing to the fact that έξουσία is not misused any more.
One, which is a "radical reorientation of values and power." But this hymn also celebrates the victory of the overcomers.

Rev 14:14-20

The other corresponding element (unit B') of the above-mentioned embracing units is Rev 14:14-20, which focuses on the second advent of Christ. The pericope naturally divides into two sections (14:14-16 and 14:17-20)

1Charles, A Critical and Exegetical Commentary, 1:326; Hughes, 139; Ladd, 172; Morris, 162; Roloff, 149; Swete, 155; Thomas, Revelation 8-22, 133.

3Rev 12:11 reads: καὶ αὐτοὶ ἐνίκησαν αὐτοὺς διὰ τὸ σῶμα τοῦ ἁρμίου καὶ διὰ τὸν λόγον τῆς μαρτυρίας αὐτῶν καὶ σὺν ἡγάπησαν τὴν ψυχὴν αὐτῶν ἄχρι ἁρμίου; cf. Prévost, 139-140.

4Rev 14:14 reads: Καὶ ἐίδον, καὶ ἰδοὺ νεφέλη λευκή, καὶ ἐπὶ τὴν νεφέλην καθήμενον δόμοιν υἱὸν ἀνθρώπου, ἦχον ἐπὶ τῆς κεφαλῆς αὐτοῦ στέφανον χρυσὸν καὶ ἐν τῇ χειρὶ αὐτοῦ δρέπανον ὄξυ. See also Rev 1:13, for the same phrase, δόμοιν υἱὸν ἀνθρώπου. The expression seems to be a direct translation of the Aramaic שַׁמֶּשׁ רַבָּא of Dan 7:13. Interestingly the Theodotion Greek of Dan 10:16 (καὶ ἰδοὺ ως ὅμοιος υἱὸν ἀνθρώπου) shows a closer verbal agreement with Rev 14:14 than the LXX Greek of Dan 7:13. For other NT allusions which emphasize "sitting on" and "coming on/with the clouds," see Matt 24:30; 26:64; Mark 13:26; 14:62; Luke 21:27; Rev 1:7. These allusions perhaps indicate exaltation ("sitting") as well as judgment ("coming"). Similarly, in Rev 1:13; 2:1, "walking" might mean priestly function.
depicting two harvests. The keyword “harvest” (θερισμός) is used here figuratively to denote the image of final judgment executed by God.2

The microdynamic of Rev 14:14-20,3 shows two epexegetical inverted parallelisms (ABA’ patterns):4

A “One like a son of man seated on the cloud with a sharp sickle” (14:14) καθήμενον ὁμοίων υἱὸν ἀνθρώπου ... καὶ ἐν τῇ χειρὶ αὐτοῦ δρέπανον δεῦ

B “Send forth your sickle and harvest . . .” (14:15) Πέμψων τὸ δρέπανόν σου καὶ θερίσων, ὅτι ἠλθεν η άρα θερίσαι ...

A’ “He who is seated on the cloud cast his sickle” (14:16) καὶ ἐβαλεν ὁ καθήμενος ἐπὶ τῆς νεφέλης τὸ δρέπανον αὐτοῦ

3 For similar duality, see Matt 13:24-30, 36-43; 25:31-46.

2 Cf. Matt 13:39b, which reads: ὁ δὲ θερισμός συντέλεια αἰώνος ἐστιν, οἱ δὲ θερισται ἄγγελοι εἰσίν, and Mark 4:29, which says: ὅταν δὲ παραδῷ οἱ καρποὶ, εὐθὺς ἀποστέλλει τὸ δρέπανον, ὅτι παρέστηκεν ὁ θερισμός. For a clear OT allusion, see Joel 4:13-14 (LXX), ἔξαποστείλατε δρέπανα ὅτι παρέστησαν τρύγητος εἰσπορεύσεσθε πατείτε διότι πλήρης ἡ λημός ὑπερεκχεῖται τὰ ὑπολήνια ὅτι πεπλήθυνται τὰ κακά αὐτῶν ἦχοι ἔχχησαν ἐν τῇ κοιλάδι τῆς δίκης ὅτι ἤγγισεν ἡμέρα τυφώνου ἐν τῇ κοιλάδι τῆς δίκης.

4 For similar literary phenomena, see my notes above on Rev 16:8-9 and 17:7-14.
A “Another angel came out of the temple with a sharp sickle” (14:17) 
Kai ãllloç ángelos ëxílethên ek toû vaoû toû 
ev tô ôuropû ëkôn kai áutoû drêpânoû òêû

B “Send forth your sharp sickle and gather . . .” (14:18) 
Pëmpûn sou tô drêpânoû tô òêû kai trûňhsou . . .

A’ “The angel cast his sickle . . .” (14:19-20) 
kai ëbaleû o ángelos tô drêpânoû áutoû

The second parallelism is longer and more detailed, which perhaps indicates John’s focus. It is evident that this literary device aims to emphasize the “harvest” motif by repetition and contrast. The two foci (units B) of these patterns depict the same activity, “reaping” or “gathering ripe fruit.” The clear verbal parallels are striking and highlight the dramatic tone of John. In the focus (14:18) of the second inversion one finds an angel ëkôn ëxoustitan ëpî tôû pûrûç.2 This passing note on the angel’s function adds further emphasis to the idea of judgment3 or divine wrath4 already expressed by the word ðérismûç.

1This dramatic tone is further expressed by using ingressive aor. (pëmpûn, ðérîson, and trûňhsôn) in 14:15, 18.

2For the importance of “fire” in Revelation, see my note above on Rev 16:8-9.

3Ladd, 201; Morris, 186; Roloff, 178; Walvoord, 222.

4Giblin, The Book of Revelation, 144; Swete, 191; Thomas, Revelation 8-22, 222.
Within the embracing units (B and B') of Rev 11:19-15:4, one finds five additional ἐξουσία passages (in units C and E). These provide a vivid picture of the Dragon-Beasts triad as they abuse their delegated authority and unite in an antidivine power struggle.

From a macrostructural point of view, Rev 13 and 14 are antithetical parallel elements focusing on the issue of divine and demonic worship. According to Bauckham, Rev 13 itself is primarily a religio-political critique of the Roman power. The very essence of this prophetic critique is the parody of the Roman ideology, which takes a "totalitarian direction" when it absolutizes its immense

1Rev 13: 2, 4, 5, 7, 12. It is almost one-fourth of the total ἐξουσία occurrences in Revelation clustered in a single chapter.

2It is signified by the divine passive ἔδοθη in vss. 5(2x), 7(2x), 14, 15; cf. Collins, The Apocalypse, 92-94; Ford, Revelation, 212; Ladd, 180; Morris, 168; Naden, 195; Thomas, Revelation 8-22, 161.

4Ibid., 36. Here Bauckham emphasizes the aspect of political critique in Rev 13, while he considers Rev 17-18 primarily economic critique, but both "deeply religious." The description of a boycott in Rev 13:16-17, however, seems to be an economic critique, too.

5Ibid., 37-38; Gunneweg and Schmithals, 173.
power. Rev 13 may also be understood as the amplification of Rev 12:13-17,¹ which is the "great wrath"² of the Dragon.

Rev 13:1-8, which describes the appearance and activity of the Sea Beast, shows verbal and thematic parallelism to 17:3, 8, 14, and 11:7. These passages, in turn, are clearly based on Dan 7-8.³ Rev 13:11-18, which depicts the activity of the Land Beast, evidently alludes to Dan 3:1-7.⁴

Beale observes, both in Dan 7 and in Rev 13, "a threefold pattern" of the beast’s activity.⁵ This activity

²See especially Rev 12:12, 17.
³Beale, The Use of Daniel, 313-320, proposes that Rev 1; 4-5; 13; 17, or perhaps Rev 12 and 20 too, are midrash on Dan 7-8. See also Steve Moyise, The Old Testament in the Book of Revelation, JSNTSS, 115 (Sheffield: Sheffield Academic Press, 1995), 59-63, who argues that this attempt is forced, with the exception of Rev 13, which is clearly based on Dan 7. Moyise offers the term "intertextuality" in the place of "midrash," meaning that "John has built a bridge between two contexts, thereby setting in motion an interaction that continues to reverberate throughout the whole book" (ibid., 142). See further Jean-Pierre Ruiz, Ezekiel in the Apocalypse: The Transformation of Prophetic Language in Revelation 16.17-19.10, EUS, 23 (Frankfurt am Main: Peter Lang, 1989), 520, who states that John persuades his readers to enter into a "dialogue with the text and with the texts within the text."
⁴Beale, The Use of Daniel, 242-244, lists Dan 3:5 (3:2-7) and 7:6 as "probable allusions."
⁵Ibid., 245-248. Here Beale provides the following three points: (1) the stepping forward of an agent, (2) the "authorization" of the agent, and (3) the effect of the given power; cf. also Hans-Peter Müller, "Formgeschichliche
is antidivine and inhuman, and its sole purpose is self-gloration, which manifests itself as coercive power worship.¹

Rev 13:1-10

Rev 13 is, then the principal chapter in the Apocalypse dealing with the abuse or misuse of (delegated) authority. This chapter naturally divides into two sections.² An analysis of the microdynamic of Rev 13:1-10 exhibits an odd chiasm (ABCB′A′ pattern),³ which is embraced by important introductory and concluding “frame-passages” as follows:

Untersuchagen zu Apc 4F” (Th.D. dissertation, University of Heidelberg, 1962), 108-111, who considers only two characteristics of the agent.

²Vss. 1-10 depict the activity of the Sea Beast, vss. 11-18 describe the activity of the Land Beast.

³Giblin, The Book of Revelation, 132-134, proposes a fivefold concentric pattern (abcb′a′) for Rev 13:3b-8, which he later calls “concentrically-structured, dramatized scene” and “geometrically-designed literary composition”; Lund, Chiasmus in the New Testament, 403, suggests an ABCDED′C′B′A′ pattern for Rev 13:1-5. See also E. Müller, 598-601, for a helpful analysis.
This pericope shows the most striking ἐξουσία clustering in the entire book. Although the term does not
appear in the focus (unit C) of this pattern, it dominates most of the structure. It occurs four times, in units A and BB' as well as in the introductory passage. The introductory passage and unit A provide the source\(^1\) of the Beast's ἐξουσία, while units BB' contain time limitations\(^2\) and a seemingly unlimited\(^3\) horizontal expansion of the Beast's power. Therefore, the ἐξουσία clustering in Rev 13 points to the highest intensity of demonic activity, which finally culminates in the power of the Land Beast.

Rev 13:1-8 also contains a vertical contrast between the "heaven dwellers" and the "earth dwellers."\(^4\) The blasphemy uttered by the Beast, as part of this contrast, resembles that of the rebellious humankind in the Seven Plagues section, but under different circumstances.\(^5\) These

\(^{1}\) An interesting dynamism can be observed in vss. 2, 4 and vss. 5, 7. In the first two verses the power source seems to be the Dragon, but in the latter two verses God is in control. This transition is perhaps a fine indication that even the misused authority is under God's ultimate rulership.

horizontal and vertical movements of the Sea Beast’s activity depict its immense power.

Rev 13:11-15

The microdynamic of Rev 13:11-15 exhibits an even chiasm (ABB’A’ pattern)\(^1\) with “frame-passages” as follows:

 Kai έιδον άλλο θηρίον άναβαίνον ἐκ τῆς γῆς... καὶ τὴν ἐξουσίαν τοῦ πρώτου θηρίου πάσαι ποιεῖ ἐνώπιον αὐτοῦ

A  “The earth dwellers worship the first Beast” (13:12b)
    καὶ ποιεῖ τὴν γῆν καὶ τοὺς ἐν αὐτῇ κατοικούντας ἵνα
    προσκυνήσουσιν τὸ θηρίον τὸ πρῶτον

B  “The Land Beast works great signs (13:13)
    καὶ ποιεῖ σημεῖα μεγάλα... ἐνώπιον τῶν ἀνθρώπων

B’  “The Land Beast deceives by the signs (13:14a)
    καὶ πλανᾷ τοὺς κατοικούντας ἐπὶ τῆς γῆς διὰ τὰ σημεῖα ἡ ἐκδόθη
    αὐτῷ ποιήσαι ἐνώπιον τοῦ θηρίου

A’  “The earth dwellers make an image for the (first) Beast”
    (13:14b) τοῖς κατοικούσιν ἐπὶ τῆς γῆς ποιῆσαι εἰκόνα τοῦ θηρίου
    καὶ ἐκδόθη αὐτῷ δούναι πνεύμα τῇ εἰκόνι τοῦ θηρίου, ἵνα καὶ λαλήσῃ ἡ εἰκών τοῦ θηρίου...

\(^1\)Lund, Chiasmus in the New Testament, 404, proposes an ABB’A’ pattern for Rev 13:11-14 only.
The central elements (units BB') of this structure affirm the miracle-working power of the Land Beast: whose purpose is "to mislead" (πλανάω). The last εξουσία occurrence in Rev 13 is in the introductory frame-passage of this unit (13:12a), which points out the "dragon-nature" of the executive power of the Land Beast.3

The key figures of Rev 13 are the Dragon and his allies, the Sea Beast and the Land Beast.4 This demonic

1The repetition of ἐνώπιον in vss. 12, 13, 14 underlines the visual effects of the Beast's activity.

2This is one of the reasons why the Land Beast is called ὁ ψευδοπροφήτης in Rev 16:13; 19:20; 20:10. Another reason is perhaps the double nature of this beast, εἶχεν κέρατα δύο δόμοια ἄρνιώ καὶ ἐλάλει ώς δράκων.

3The Land Beast works in harmony with the Dragon and the Sea Beast; his aim is not competition. In a sense he "serves" the other two, and at the same time he is controlled by God; cf. Giblin, The Book of Revelation, 135; Hughes, 151; Ladd, 183; Morris, 171; Swete, 169; Thomas, Revelation 8-22, 174; Walvoord, 205.

4The appearance of the Sea Beast resembles that of all four beasts in Dan 7:3-7; cf. Beale, The Use of Daniel, 230-231; Collins, The Apocalypse, 89-91; Fiorenza, Vision of a Just World, 83; Swete, 165-166. The Land Beast seems to be a unique figure to John. A number of scholars believe that the Sea Beast can be identified with the MT יְאָה (Job 3:8; 40:25; Pss 74:14; 104:26; Isa 27:1) or the LXX δράκων (Job 7:12; 26:13; 40:25; Pss 73:13-14; 103:26; Isa 27:1; 51:9), whereas the Land Beast is usually considered as the MT יִאָה or the LXX θηρία (Job 40:15); cf. especially Caird, Principalities and Powers, 61-62; Collins, The Combat Myth, 161-170; Snyder, 301-304; Mary Katharine Wakeman, "God’s Battle with the Monster: A Study in Biblical Imagery" (Ph.D. dissertation, Brandeis University, 1969), 88-115, 161-165, 179-191, 200-255; Howard N. Wallace, "Leviathan and the Beast in Revelation," in The Biblical Archeologist Reader,
triad is the counterpart of the angelic triad in Rev 14:6-11. It is evident that the activities of this demonic triad are described in an ironic way. Perhaps the most striking ironies are formulated in Rev 13:4b and 13:7b, which point to the fact that the seemingly absolute power of the Dragon-
Beast is only the remains of an already-lost fight.¹
Although the war continues the decisive battle has been won on a cosmic level.² The clustering of the divine passive εδώθη in Rev 13:5(2x), 7(2x), 14, 15 further emphasizes that something more than imperial persecution is “in mind.”³

Finally, the ambiguous number 666, the “human number” of the Beast, in Rev 13:18⁴ might also be a fine irony, for it summarizes the whole chapter in three numbers. This irony may reflect on the failed attempt of the demonic triad towards perfection,⁵ their becoming bestial,⁶ and their mimic of the sovereignty of the Lamb-Christ⁷ who is

¹Emil Brunner, Christianity and Civilisation, vol. 2 (New York: Charles Scribner’s Sons, 1949), 117-118, rightly argues that “the sovereignty of God excludes an absolute of human power. It excludes both the absolute sovereignty of the state and the absolute sovereignty of the people.” We may add that the absolute sovereignty of the Church is also excluded.

the final victor of the apocalyptic combat, because He is "King of kings and Lord of Lords."¹

**Synthesis of the Research**

This study investigated how ἐξουσία is employed in the context and literary structure of Revelation. As a general observation, it was concluded that in the majority (18) of the passages the term denotes the supernatural use of authority/power, which is in harmony with the LXX, Jewish apocalyptic, and NT usage.

Figure 1 made evident the use of ἐξουσία clusters in the central chapters (11-13) and in chapters 9 and 16-18 of Revelation. Figure 2 took into account the chiastic structure of the book, which highlights John’s intention for using the term in an artful way.

The theme of apocalyptic combat is the conceptual backdrop to Revelation, and 11:19-15:4 is the chiastic focus of the book. The high point of this combat is a life-and-death struggle between divine and antidivine powers, which former has a number which conceals a name, and the latter has a name which conceals a number." Further he suggests that "Christ has a name (King of kings and Lord of Lords) which when converted to Aramaic and added up results in 777." See also Patrick W. Skehan, "King of Kings, Lord or Lords (Apoc. 19:16)," CBO 10 (1948): 398, who provides the Aramaic מִלְךָ פְּלִいただける מְרִית.

centers around worship. Worship in this context is an expression of the acceptance of divine or demonic εξουσία.

The microstructural analysis of the εξουσία passages revealed that if the term occurs within an inverted parallelism (ABA' pattern), it is always found in the central unit (B), which is the focus of the author's thought. In the case of an odd (ABCB'A' pattern) or an even (ABB'A') chiasmus, εξουσία appears either in units A/A' or B/B' but never in unit C. This characteristic usually shows an imbalance or intensification within the structure. In rare cases, when the term occurs in balanced units (BB'), or in the introductory "frame passage," it provides a dramatic backdrop to the central unit or focus (C).1

In summary, it is evident that εξουσία plays a special focusing role both in the macro- and the microstructures of the Apocalypse. Thus, it significantly contributes to the overall message of Revelation, which is the activity and judgment of antidivine powers.

Figure 3 provides a summary visual display of the chiastic arrangement of Revelation. The nine literary units include the Prologue and the Epilogue, and seven major visions. Units AA', BB', CC', and DD' are parallels. There

are two balancing themes in units CC’ (Salvation and Judgment). The central units (DED’) form the chiastic focus of the book, labeled “Activity and judgment of antidivine powers.” The important ἐξουσία clustering in units DED’, and the distribution of the term in units A’, B, and CC’ are signified by the numbers in parentheses.

SUMMARY AND CONCLUSIONS

Summary

'Ἐξουσία is derived from ἐξουσία, and its most frequent Hebrew and Aramaic equivalents are מִסְתַּפָּל and מְנֵסָף, respectively. The corresponding Latin terms are potestas and auctoritas.

The review of the representative studies on ἐξουσία demonstrated that earlier works tend to interpret the term as power or authority, while recent publications focus on the meanings of freedom, liberty, and right. It appears that the legal aspect of ἐξουσία has become dominant. Recent dictionary articles emphasize philosophical categories for authority and their references to Revelation are marginal or nonexistent.

W. Foerster's article in TWNT/TDNT is still the most comprehensive exposition of ἐξουσία, especially his discussion of the word in Revelation. O. Betz's article in TBNT/NIDNTT groups ἐξουσία with δύναμις and θρόνος, which together form the bulk of the power language in the Apocalypse. Betz also points out the importance of the Book
of Daniel as background for the meaning of the term. Journal articles generally limit their ἐξουσία studies to the Gospels and the Pauline corpus.

The background study of the nonbiblical and biblical sources revealed that both the Greco-Roman and the Hellenistic Jewish writings emphasize the legal aspect of the term and discuss the problem of abusive power/authority. In the LXX ἐξουσία most frequently translates the Hebrew נפש ו and the Aramaic פֶּרֶשׁ, and predominantly denotes delegated authority and its misuse in the human realm. The OT Pseudepigrapha focus on the supernatural aspect of ἐξουσία.

In the NT the majority of the ἐξουσία passages closely follow the LXX and Jewish apocalyptic usage, especially in the area of delegated authority in human and supernatural relationships. In the Apocalypse, however, the supernatural aspect of the term is more emphasized, which includes the problem of abusive authority.

The structural studies of the ἐξουσία passages in Revelation showed that the term is clustered in certain parts of the book, predominantly in the central chapters (11-13). Considering the chiastic arrangement of Revelation, this means that ἐξουσία plays a special role at
the chiastic focus of the book by highlighting the apocalyptic combat theme.

A detailed study of this chiastic focus revealed that the key issue for John was a life-and-death struggle between true and false worship. He deliberately employed irony, especially in the central chapters, in order to unmask the bestial nature of the antidivine (anti-Christian) powers.

Conclusions

What complex role does ἐξουσία play within the chiastic ordering (including macro- and microstructures) of the Apocalypse? As one of the most important terms of the power language employed by John, ἐξουσία has a unique role both on the macro- and the microstructural levels. First, the clear association of the divine passive ἐνέπη with ἐξουσία in most of the passages makes evident that in the different phases of the power struggle (1) God is in control, and (2) the power, used or misused, is delegated by God. Second, the message of Revelation focuses on the activity and judgment of antidivine powers (8:2-18:24) which reaches its high peak in the central chapters (11-13) and is expressed by a heavy concentration of ἐξουσία passages.
What is the impact of the έξουσία clusters on the entire chiastic arrangement of the book? The foregoing analysis of the nine literary units of Revelation revealed that έξουσία, sometimes together with δύναμις and θρόνος, carries the dynamism of antidivine power struggle. The three main έξουσία clusters (Rev 9; 13; 17) express a development in this struggle. The final outcome of the combat is the self-destruction of the united abusive powers (Rev 17:12-18).

How does έξουσία function on the microstructural level? The microstructural analysis underlined the central function of the term. In the majority of the έξουσία passages, where even chiasms or inverted parallelisms are observed, έξουσία contributes to imbalance and intensification. In rare cases (Rev 9:3-10; 13:2-7), however, the term occurs in the balancing elements of odd chiasms and provides a dynamic and dramatic backdrop to the focus. What are some implications of these findings?

Implications

The Apocalypse unmasks the most dominant constructions of this world as an ideology of the powerful. In that sense Revelation is a theology of power, or more...
precisely, the issue of power/authority is one of its deepest theological concerns. This concern is expressed in a unique and artful way and shows that behind the abuse or misuse of power/authority in human relationships there is always a demonic force, which prompts for self-glorification and power worship. This force naturally comes from demons who are described in the NT as personal, spiritual beings (e.g. Mark 1:23-27; 3:11-12; 5:1-13, etc.).

The book of Revelation presents God’s rule as well, a rule which does not, however, contradict human freedom (e.g. Rev 2:7, 11, 17, etc., Rev 13:9; 22:17). God’s universal rulership is clearly associated with the term θρόνος which symbolizes His overall control of activities, both good and evil. The nature of God is shown as essentially good. John depicts this goodness in divine promises and liturgical hymns (Rev 21:1-7; 15:3, 4). God is good because He shares His θεοσια and θρόνος (Rev 2:26-28; 3:21; 5:9-10; and 20:4).

The theology of Revelation was certainly directed and still appeals to people who believe themselves to be in conflict because they are a despised minority. The Apocalypse offers a theology of hope to those who choose a powerful resistance to worldly power.

When power/authority is considered as an ethical issue, it is inseparable from our vertical (with God) and
horizontal (with humankind) relationships. In a general sense all authority is delegated by God, which evidently leads to human responsibility and discernment. This responsibility includes an assertion of all God-given personal human rights including resistance when one is confronted by unjust authority.

Revelation provides a balanced picture by describing both the use and misuse of power/authority. To avoid becoming an end in itself, power has to be rooted in love and controlled by justice. God shares power with His creatures and makes them responsible for it by pointing to eternal rewards and judgment.

This responsibility (or ethical action) of a person as a moral agent centers around fidelity, the worship of God alone. This behavior is also described as "patience" or "perseverance" in Rev 1-3, and 13-14. In short, the Apocalypse, especially its Epilogue (22:6-21), concentrates on one decisive factor--influencing behavior.

History teaches us that in any society, when a creative minority degenerates into a dominant minority, it provokes the breakdown of that civilization. This is precisely the case in Rev 13 and 17-18 where the Beast-Babylon power structure becomes tyrannical (13:11-18) and fully demonic (18:1-4). The prophetic critique of this abusive power is one of the main concerns of John.
Facing despotism or abuse by institutional power structures, where too much uncontrolled power is concentrated in the hands of a person, can be an almost everyday occurrence for anyone. It is, therefore, noteworthy that Plutarch (ca. A.D. 50-120) pointed out the irrationality of human behavior in situations determined by fear and superstition. His practical observation is as follows: “It is equally true that men give welcome to despots, and pay court to them, and erect golden statues in their honour, but in their hearts they hate them and ‘shake the head’” (Moralia, De superstitione 11., Plutarch’s Moralia II, LCL, 489). The power struggle described in the Apocalypse is thus played out in everyday life not only at the cosmic level.

Based on the central theme of the activity and judgment of antidivine powers in Revelation one can perceive a real danger for the Church too, as it can become a power structure at any time that it takes on a secular character and coerces human conscience. The balanced description of the use and abuse of authority in the Apocalypse, including eternal consequences, can help readers to avoid the trap of power delusion.

Possible areas of further study would include the following three main tasks:
1. A complex exegetical approach to the power language (θρόνος, ἐξουσία, δύναμις/δύναμαι, βασιλεία/βασιλεύω, κράτος/κρατέω, ἰσχύς/ἰσχύω) used in the Apocalypse, one which analyzes the literary, thematic, and structural context of the particular passages.

2. A detailed study of how the power language in Revelation relates to the language of the Hebrew cultus so frequently employed throughout the book.

3. An ethical study of the relationship between the power language employed by John and the nature of God, where God’s goodness is contrasted with the nature of evil and the demonic. In addition, the interdependence of human behavior and hope, rewards, and patience as motivating factors could also be explored.
